Introduction

About this guide and what you need

What the Help Center and this manual cover, how they are organised, and what you need to use School Sphere.

Address: /help | Checked against the application

Online version

School Sphere is a school management system that runs in a web browser and in three mobile apps. This guide explains how to do everyday tasks, one module at a time, with the exact menu names and buttons you will see.

How the guide is organised

- **Getting started** covers signing in, passwords and your account.
- **Guides by role** lists the articles written for school administrators, principals, teachers, accountants, librarians, receptionists, parents and students.
- **Modules** follow the menu on the left of the application: Academics, Online Exams, Human Resources, Finance, Campus Operations, Engagement, Insights, and so on. Every article names the menu path to the screen it describes.
- **Troubleshooting** articles list the messages you may see and what to do about them.

Each article is marked with its review state: **Draft** (written, not yet checked), **Checked against the app** (compared with the application's code) or **Verified** (followed step by step in the running application on a stated date).

What you need

You need	Details
A School Sphere account	Created for you by your school. See Signing in and your account.
A modern web browser	A current version of a mainstream browser such as Google Chrome, Microsoft Edge, Mozilla Firefox or Apple Safari. JavaScript must be on.
An internet connection	The application and its mobile apps work with your school's online system.
For online classes	A device with a camera and microphone, and permission for the browser to use them.

> **Note:** The exact minimum browser versions are not stated by the application. If something looks wrong, update your browser first.

Mobile apps

There are three mobile apps: one for **parents and students**, one for **teachers** and one for **staff** such as the librarian, front desk and finance staff. They use the same email address and password as the website, and show only the modules your role allows.

Your school may differ

Schools choose which modules to switch on and what each role can open under **Roles & Permissions**. If an article describes a screen you cannot see, your school's plan or your role does not include it. Ask your school administrator.

Open the Help Center (/help)

Use the Help Center

Search for a task, browse by module or role, open the screen an article describes and download the PDF manual.

Address: /help | Checked against the application

Online version

Open the Help Center

- When you are signed in, select the **Help** (question mark) button at the top right and choose **Help Center**.
- You can also go straight to the **/help** page of your school's School Sphere address. The same pages open at **/guide**.
- You do not need to sign in to read the public articles.

Find an article

1. Type what you want to do in the search box, for example "add a student" or "reset password". Results appear as you type. The words do not have to match exactly: "register" finds "add".
2. Select a result.

If nothing matches, the page suggests trying different words, browsing by module or asking School AI.

Browse instead of searching

- **Common tasks** lists frequently used how-to articles. Signed-in users see the ones written for their role first.
- **Browse by module** groups modules the way the menu does. Each module page shows its menu path, who gets it by default, and its articles split into overview, how-to, reference, questions and troubleshooting.
- **Browse by role** lists the articles written for one role.
- **Recently viewed** (on this browser only) brings back the articles you opened last.

Read an article

- The **breadcrumb** at the top shows where you are. **On this page** (on wide screens) jumps to a section.
- Numbered **steps** are in the order you do them. Select a screenshot to enlarge it.
- **Open this screen** takes you to the screen the article describes, when your account can open it. If it cannot, the article says why instead.
- **Related articles** and **Previous / Next** move to neighbouring articles.
- **Was this helpful?** records your answer on this browser.
- **Print this article** prints it without the page controls.

Download the PDF manual

Select **Download the PDF manual** at the top of the Help Center. The manual is built from the same articles, so it matches what you read online, and its contents list and index show page numbers.

Open the Help Center (/help)

Ask School AI how to do something

Ask the assistant a how-to question, and be taken to the right screen when your account can open it.

Online version

Address: /help | Checked against the application

Ask School AI can answer "how do I...?" questions from this guide, show the menu path and numbered steps, link to the full article, and take you to the screen when your account is allowed to open it.

Ask a how-to question

1. Select **Ask School AI** (the floating button, or the one on a Help Center page).
2. Type your question, for example "How do I add a student?".
3. Read the steps. Select **Read the full guide** for the article. When your account can open the screen, a button named after it, such as **Open Students**, takes you there.

Be taken to a screen

Type something like "Take me to the student list". If your account can open that screen you are taken there; if the question could mean more than one screen, you are asked "Which of these do you mean?" and can pick one; if your role or your school's plan does not include it, you are told that instead.

> **Note:** The assistant never creates, changes or deletes school records on its own for these requests. It only opens screens, and it only opens screens your account is already allowed to open.

Other questions

Questions that are not about using School Sphere, such as your child's fees or attendance, are answered by the AI assistant from your school's data, as described in AI Features and Ask School AI. A single common word on its own is passed to the assistant rather than treated as a request for a guide.

When it cannot answer

If the guide has nothing on your question, the assistant says it cannot verify an answer from the documentation rather than guessing. Search the Help Center or ask your school administrator.

Glossary

The words School Sphere uses on its screens, in plain language.

Address: /help | Checked against the application

Online version

Term	Meaning
Branch	A campus of your school. Users can be limited to one branch, or allowed to switch between all of them.
Role	A set of permissions given to users, such as Teacher or Accountant. Schools can also create their own.
Permission matrix	The grid under **Roles & Permissions** that decides which modules and actions each role has.
Module	One area of the application, such as Students or Fee Management. Your school's plan decides which are switched on.
Academic year	The school year that classes, fees and exams belong to. Set up under **Academic Setup**.
Term	A part of an academic year.
Class and section	A class (for example Class 5) is divided into sections (for example A and B). Students belong to a section.
Guardian	A parent or other adult recorded on a student's profile. A guardian can be linked to a login so they see the child in the Parent Portal.
Linked login	The link between a student, guardian or staff record and the sign-in account that belongs to them.
Admission	The process from a new application to an enrolled student.
Promotion	Moving a class's students to the next class at the end of a year.
Fee structure	The amounts a class pays, by type and how often. Invoices are generated from it.
Invoice	A bill for one student for one term. Payments are recorded against it.
Receipt	The record produced when a payment is recorded.
Payroll run	A calculation of staff salaries for a period, which produces payslips.
Question bank	Reusable questions that online exams are built from.
Online class	A live class or meeting held inside School Sphere.
Ticket	A complaint or request in the Help Desk.
Ask School AI	The assistant that answers questions about your school's data, and about how to use School Sphere.

Getting started

Signing in, recovering a password and looking after your account.

Signing in and your account

How you get into School Sphere, what you see after signing in, and where to manage your account.

Address: /login · Checked against the application

Online version

Every person at your school signs in with their own **email address** and **password**. What you can open afterwards depends on your role and on the modules your school has switched on, so two people at the same school can see different menus.

What happens after you sign in

- You always land on the **Dashboard**, not on the page you used last.
- The menu on the left (the menu button on a phone) lists only the modules available to you.
- Your name and role appear at the top right. Select your avatar to open the **Account menu**.

The Account menu

Item	What it does
Security settings	Change your password, review where you are signed in and remove trusted devices. See Change your password and manage sessions.
Log out	Ends this session and returns you to the sign-in page.

Sessions and timing out

A session ends when you choose **Log out**, when the time your school allows has passed, or when you sign out of a device from **Security settings** (/account/security). When a session runs out, you return to the sign-in page with the message "Your session has expired. Please sign in again to continue where you left off."

> **Tip:** Leave **Remember me** ticked on your own computer so you stay signed in for longer. Untick it on a shared computer.

Mobile apps

The parent and student app, the teacher app and the staff app use the same email and password as the website.

Sign in to School Sphere

Sign in with your email address and password.

Address: /login | Checked against the application

Online version

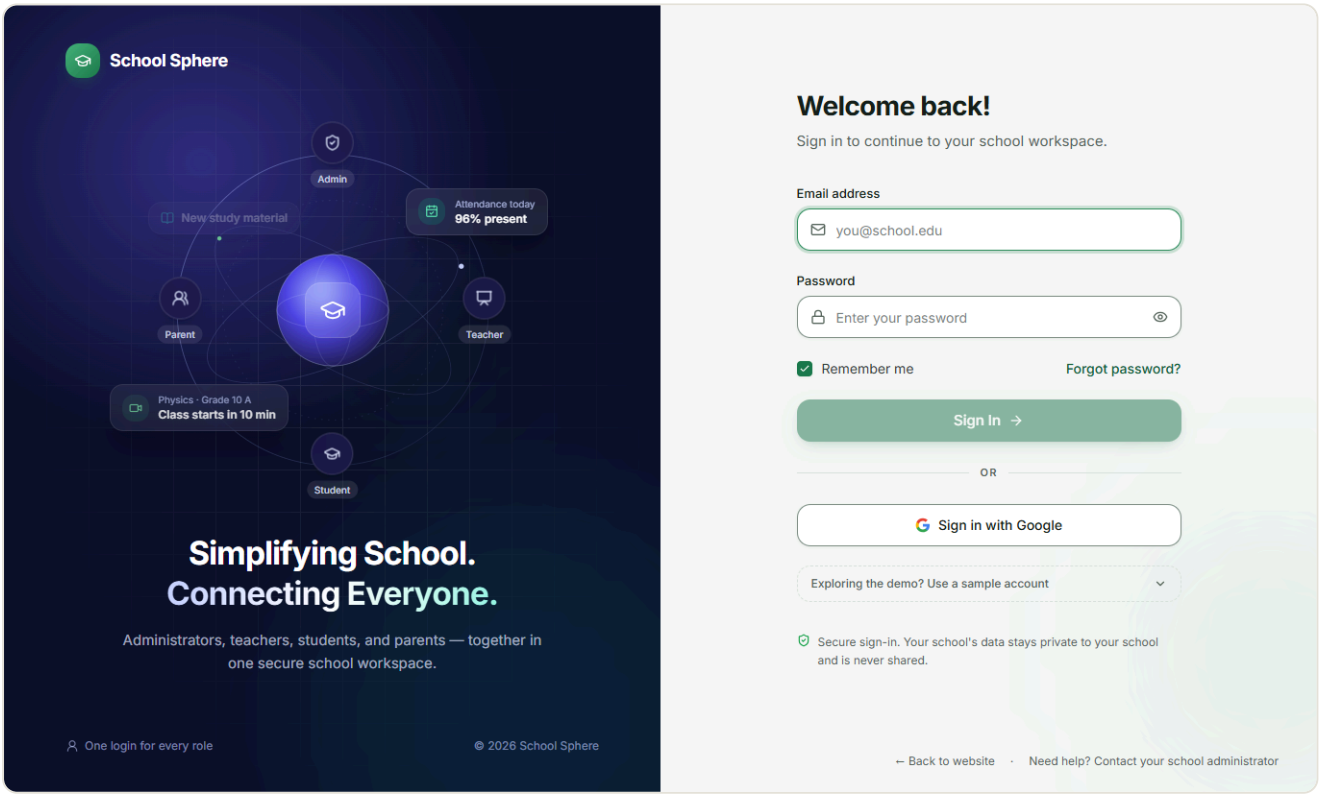

Use this when you want to open School Sphere with your own account.

Before you start

- Your school administrator must have created your account. Ask them if you do not have an email address and password.
- Use the address of your school's School Sphere site.

Steps

1. Open the sign-in page. It is headed **Welcome back!**
2. Type your **Email address**.
3. Type your **Password**. Select the eye button at the end of the field if you want to see what you typed.
4. Leave **Remember me** ticked if you want to stay signed in on this device.
5. Select **Sign In**.

The sign-in page.

After a short "Signed in" confirmation and a welcome message with your first name, the **Dashboard** opens.

Fields and checks

Field	Required	What is checked
Email address	Yes	Shows "Enter your email address" if empty and "That doesn't look like a valid email" if it is not an email address.
Password	Yes	Shows "Enter your password" if empty.
Remember me	No	Ticked by default.

Other options on the page

- If your school has turned on code sign-in, **Mobile OTP** and **Email OTP** options appear above the form. See Sign in with a one-time code.
- **Forgot password?** opens Reset a forgotten password.
- **Sign in with Google** is shown, but selecting it only shows the message "Google sign-in isn't enabled for your school yet."
- **Exploring the demo? Use a sample account** is for demonstration sites. It fills the form with a sample account so you can look around.

> **Note:** If the sign-in fails, a message appears above the form. Changing either field clears it. See Sign-in problems.

Open the sign-in page (/login)

Sign in with a one-time code (mobile number or email)

Online version

Sign in with a six-digit code sent by SMS to your verified mobile number, or by email, instead of a password.

Address: /login | Checked against the application

Use this when you want to sign in without typing your password. School Sphere sends a six-digit code to your mobile number or your email address and you type the code to get in.

Before you start

- Your school must have turned on code sign-in. If the sign-in page only shows the password form, the options are not available for your school yet. Ask your administrator.
- **Mobile OTP** works only for a mobile number you have already verified. See Verify your mobile number.
- **Email OTP** works for the email address your account was created with.
- Principals, administrators and the Super Admin keep to their password unless the platform has allowed otherwise.

Steps

1. Open the sign-in page.
2. Above the form, choose **Mobile OTP** or **Email OTP**. The options appear only when code sign-in is on. School Sphere remembers your last choice on this device.
3. Type your **Mobile number** (or your **Email address**) and select **Send code**.
4. Type the code into **Verification code**. It has six digits and expires after a few minutes.
5. Select **Verify and sign in**. The **Dashboard** opens.

If the code does not arrive, wait for the **Resend code in** timer to finish and select **Resend code**. To use a different number or address, select **Change mobile number** or **Change email address**.

If your number belongs to more than one account

After the code is checked you may see "This number is used by more than one account. Choose the one to sign in to." Pick your own account and continue.

Good to know

- The page always says the same thing whether or not the number or address is registered ("If … is registered, we've sent a code"). This keeps other people from finding out who has an account.
- Five wrong guesses cancel that code; request a new one. Too many requests in a short time are slowed down, so wait before trying again.
- Signing in with a code never asks you to change a temporary password first. If you were given a temporary password, you can change it later in Security settings.

- Password sign-in always keeps working. See Sign in to School Sphere.

> **Note:** The same options are in the School Sphere mobile apps (Student, Teacher and Staff), on their sign-in screen.

Open the sign-in page (/login)

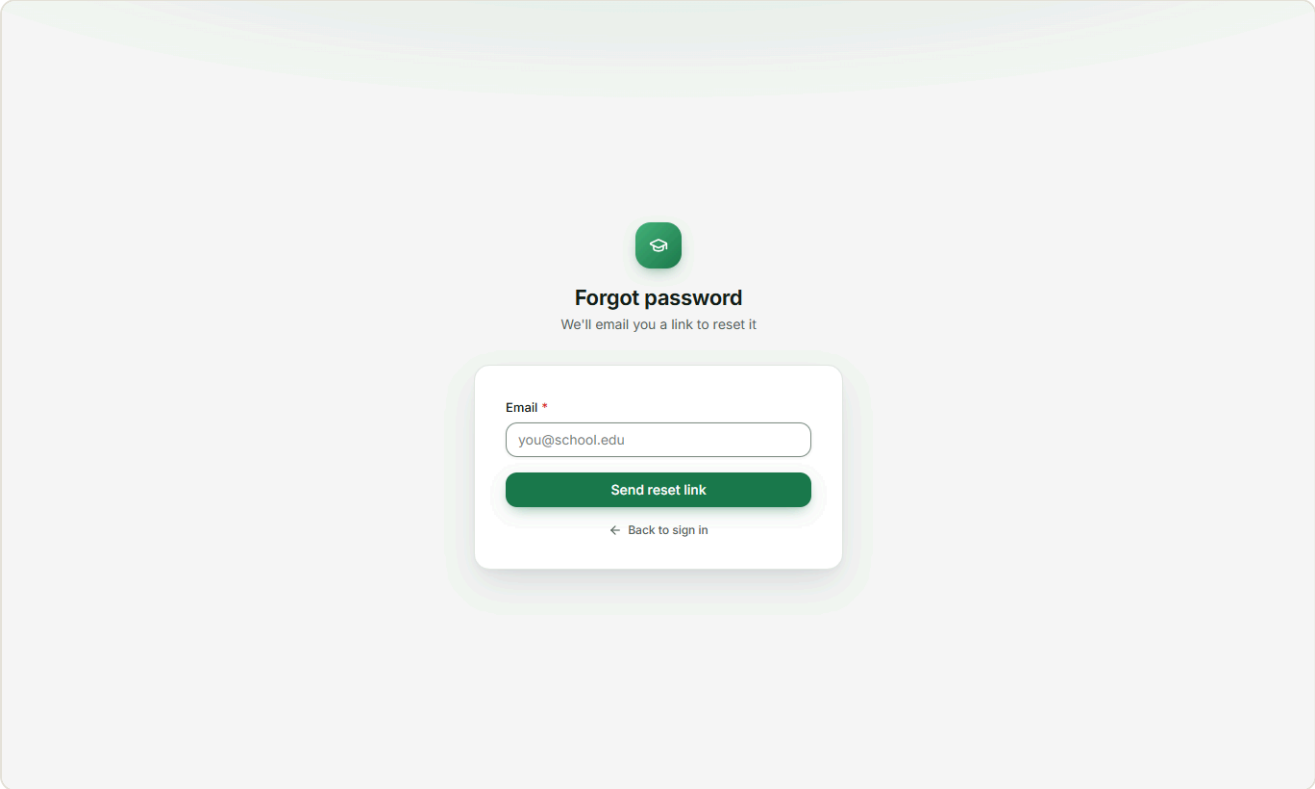

Reset a forgotten password

Ask for an email with a link that lets you choose a new password.

Address: /forgot-password · Checked against the application

Online version

Steps

The forgot password page.

1. On the sign-in page, select **Forgot password?** (or open the forgot password page directly).
2. Type your **Email** address. This field is required; "Email is required" and "Enter a valid email" appear if it is empty or not an email address.
3. Select **Send reset link**.
4. The page changes to **Check your inbox**: "If that email is registered, a reset link is on its way. It may take a few minutes to arrive."
5. Open the email and select the link. It opens **Set a new password**.
6. Type a **New password** of at least 8 characters, type it again in **Confirm password**, and select **Reset password**.
7. You see "Password reset — please sign in". Sign in with the new password.

Checks on the new password

Field	Rule	Message
New password	At least 8 characters	"Must be at least 8 characters"
Confirm password	Must be filled and match	"Please confirm your password" / "Passwords do not match"

If the link does not work

A link that is incomplete or no longer valid shows "This link is invalid or incomplete. Please request a new one from the forgot password page." Request a new link and use that one.

> **Note:** For safety, the page gives the same "Check your inbox" message whether or not the address is registered, so it cannot be used to find out who has an account.

Open the forgot password page (/forgot-password)

Set a new password after a temporary one

What to do when your administrator gives you a temporary password.

Address: /change-password · Checked against the application

Online version

When an administrator creates your account or resets your password, you may receive a **temporary password**. You can sign in with it, but you must choose your own password before you can use anything else.

Steps

1. Sign in with your email and the temporary password.
2. The page **Set a new password** opens. It says you signed in with a temporary password.
3. Type the temporary password in **Temporary password**.
4. Type your choice in **New password** (at least 8 characters) and again in **Confirm new password**.
5. Select **Update password**. The message "Password updated. Sign in with your new password." appears.
6. Sign in again with the new password.

Checks

Field	Message when wrong
Temporary password	"Enter the temporary password you were given"
New password	"Must be at least 8 characters"
Confirm new password	"Please confirm your new password" or "Passwords do not match"

You can leave this page without changing the password by selecting **Sign out** on it. You return to the sign-in page, and every other page sends you back here until you change the password.

Sign-in problems

What to try when you cannot sign in or keep being signed out.

Address: /login | Checked against the application

Online version

What you see	What to do
"Enter your email address" or "That doesn't look like a valid email"	Type the full email address your school gave you, for example name@yourschool.edu.
"Enter your password"	The password field is empty.
A message above the form saying the sign-in failed	Check the email and password. Passwords are case sensitive. If you are unsure of the password, use Forgot password.
"Your session has expired. Please sign in again to continue where you left off."	Sign in again. Sessions end after the time your school allows, or if you were signed out from another device.
You are sent to **Set a new password** every time	Your account still has a temporary password. Follow Set a new password after a temporary one.
The reset email does not arrive	It can take a few minutes. Check spam or junk folders, make sure you used the email address registered with your school, then ask your administrator.
"This link is invalid or incomplete"	The reset link is old or was cut off. Request a new one from **Forgot password**.
Sign in with Google does nothing useful	Google sign-in is not enabled for your school. Use your email and password.
The one-time code does not arrive, or "We couldn't send a code"	Wait for the **Resend code** timer and try again. Mobile codes go only to a **verified** number: see Verify your mobile number. Email codes go to your account email; check spam. If **Mobile OTP** / **Email OTP** are not shown at all, your school has not turned them on. See Sign in with a one-time code.
"We couldn't check that code" or the code is refused	Codes expire after a few minutes and five wrong tries cancel a code. Request a new one.
You can sign in but a menu item is missing	Your role or your school's plan does not include that module. Ask your school administrator.

Tip: If you share the computer with others, untick **Remember me** and always use **Log out** from the Account menu when you finish.

Guides by role

Find the articles written for your role. Schools can change what each role can open, so a screen described here may not be switched on for you.

Everyday modules

Co-Curricular

Activities, houses and teams, sessions and attendance, events and results, achievements and green campus campaigns.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Extra-Curricular at a glance

What the Extra-Curricular module covers and who can do what.

Menu: Co-Curricular | Address: /extracurricular | Checked against the application

Online version

Extra-Curricular is where the school runs everything outside lessons: sports, music, dance, art, clubs, competitions, houses and green campus programs.

What you see

The tab bar under the title depends on who you are.

Tab	What it is for	Who sees it
Overview	Totals, participation by category, what is coming up, students not in any activity. Parents and students see their own places, houses, teams and awards.	Everyone
Activities	The catalog of activities, with places left and a button to join.	Everyone
Enrollments	Requests, places and the waiting list.	Everyone
Schedule	A week view and an upcoming list of sessions, the register, and an attendance summary.	Everyone (the summary is staff only)
Teams	Teams for each activity and their squads.	Staff
Houses & groups	Houses, teams, clubs and groups, with shuffling and history.	Staff
Events	Sports days, festivals and tournaments, registrations and results.	Everyone
Achievements	Medals, trophies and recognition.	Everyone
Sustainability	Green campaigns with targets and verified figures.	Staff
Settings	Rules and categories.	Staff who can set up the module

Who can do what

- **Parents and students** browse open activities, ask to join, withdraw, follow sessions and events, register their own children for events and see their published achievements.
- **Teachers and coaches** see the whole module and can take registers. Whether they can also set things up depends on the permissions the school gave their role.
- **Administrators** set up categories, activities, groups, teams, events and campaigns, approve requests and publish achievements.

> **Note:** The school's subscription plan must include Extra-Curricular, and the role must be allowed to open it in Roles & Permissions. If it is missing from your menu, ask your school administrator.

Ask to join an activity

Find an activity, ask for a place, and follow the answer.

Address: /extracurricular/activities | Checked against the application

Online version

Ask for a place

1. Open **Extra-Curricular** and select **Activities**.
2. Search, or pick a **Category**, or select **Open for enrollment** to see only what you can join now.
3. On the activity, select **Ask to join**. If the activity is full the button says **Join waiting list**.
4. Choose the **Student** (a parent with one child sees them already selected).
5. If the activity needs it, tick the parental consent line. Read any safety notice shown.
6. Add a **Note** if you want, then select **Send request**.

The message tells you what happened: **Request sent** (waiting for approval), **Enrolled**, or **Added to the waiting list**.

Follow it up

Open **Enrollments** to see each request and its status: Requested, Approved, Waiting list, Rejected, Withdrawn or Completed. Select **Withdraw** to give a place back; the next student on the waiting list takes it.

> **Note:** The button is greyed out when the activity is not active or its enrollment dates have passed. Some schools turn off requests from families; then the office or the teacher enrolls students and you will see a message saying so.

Why a request can be refused

- The student is outside the grades the activity is open to.
- The student already has a request or place in it, or is at the school's limit of activities.
- Parental consent is required and was not ticked.
- Approval would put the student in two sessions at the same time.

Create activities and categories

Add an activity with its capacity and enrollment dates, and keep the categories tidy.

Address: /extracurricular/activities · Checked against the application

Online version

Add an activity

1. Open **Extra-Curricular**, select **Activities**, then **New activity**.
2. Fill in **Name** and a short **Code** that is unique this year (for example FB-U14), pick the **Category** and **Academic year**.
3. Choose whether it is **Individual** or **Team**, indoor or outdoor, and its **Status**. Only **Active** activities can be joined; leave it **Draft** while you prepare.
4. Set **Capacity** (empty means no limit), **Minimum to run**, and the **Lowest grade** and **Highest grade** that may join.
5. Optionally add the **Coordinator**, **Venue**, when it meets, equipment, safety instructions and the **Enrollment opens** and **Enrollment closes** dates.
6. Turn **Needs approval** and **Needs parental consent** on or off, then select **Create activity**.

You can lower the capacity only down to the number of students already enrolled.

Edit or remove

Use the pencil to edit. The bin deletes an activity that was never used; one with enrollments, teams or sessions is set to **Inactive** instead so its history stays readable.

Categories

The school starts with fifteen categories (sports, music, dance, art, clubs, environment and more). Open **Settings** to add your own, rename, hide, reorder with the arrows, or delete one that has no activities.

Approve activity requests

Approve or reject requests and manage the waiting list.

Address: /extracurricular/enrollments | Checked against the application

Online version

Decide requests

1. Open **Extra-Curricular** and select **Enrollments**. It opens on **Requested**.
2. Filter by activity if you like.
3. Select **Approve** or **Reject** on one row, or tick several rows and use **Approve** / **Reject** at the top.
4. Rejecting asks you to confirm.

An approval into an activity that is already full puts the student on the **Waiting list** instead. When someone withdraws, the student who has waited longest takes the place.

> **Warning:** If the school stops clashing sessions (Settings), an approval is refused when the student would be in two sessions at the same time. The message names the session they clash with.

Other actions

- **Mark completed** closes an approved place at the end of the season.
- **Withdraw** gives a place back.
- Staff with setup rights can enroll a student directly from **Activities** with **Enroll**; that skips the request step.

Houses, groups and shuffling students

Create any number of houses or groups, place students by hand or shuffle them, and lock the result.

Address: /extracurricular/groups · Checked against the application

Online version

Create the groups

1. Open **Extra-Curricular**, then **Houses & groups**.
2. Choose the **Kind** (House, Team, Club, Activity group or Mixed group) and the academic year.
3. Select **Create groups**, enter **How many** (1 to 50) and a **Name prefix**, or type your own names one per line.

Place students

- Open **Members** on a group and use **Add students** to pick from students who have no group of this kind yet.
- Or select **Shuffle students**.

Shuffle

1. Select **Shuffle students**.
2. Choose **How to spread students**: equal numbers, pure random, or balanced by class, grade or gender.
3. Choose **Who to include**: only students without a group, or everyone.
4. Select **Preview shuffle**. Nothing is saved yet. You see how many move and each group's size before and after, and can open **See every move**.
5. Select **Shuffle again** for a different result. **Recalculate (same seed)** repeats the same one.
6. Add a note, then **Confirm and save**.

Lock and history

Lock on a group keeps its members through any later shuffle. Changing a locked group by hand asks for an override. **History** lists every move with who made it and why.

> **Note:** By default a student has one house at a time. Moving them replaces the old one and is recorded in the history. A school can change this in Settings.

Schedule sessions and take the register

Plan one-off or repeating sessions, avoid clashes and mark attendance.

Address: /extracurricular/schedule · Checked against the application

Online version

Create a session

1. Open **Extra-Curricular**, then **Schedule**, and select **New session**.
2. Choose the **Activity**, an optional **Team**, a **Title**, the **Date**, **Starts** and **Ends**, the **Venue** and **Instructor**.
3. To repeat it, set **Repeats** to every day, week or month and give an end date or a number of sessions.
4. Select **Create session** (or **Create series**).

The venue, the instructor and the team are checked for clashes. If any session in a series clashes, nothing is saved and the message names the date.

Change a session

On a session: **Reschedule**, **Cancel** (a reason is required), **Complete**, and for a cancelled one **Reinstate** or **Delete**.

Take the register

1. Select **Take register** on a session.
2. Mark each student **Present**, **Late**, **Excused** or **Absent**, or use **Mark everyone present** and change the exceptions.
3. Select **Save attendance**. Saving again updates the same marks.

The list is the team's squad for a team session, otherwise the activity's approved students.

Summary

Attendance summary shows sessions, present, late, excused, absent, the percentage and hours per student. Excused absences do not count against the percentage.

Create a team and manage its squad

Create a team for an activity, then add players with roles, jersey numbers and substitutes.

Address: /extracurricular/teams | Checked against the application

Online version

Teams belong to an activity. You can have as many as you need for the same sport, such as age groups, levels, boys', girls' or mixed. Create the activity first in Create activities and categories.

Create a team

1. Open **Co-Curricular** and select **Teams**.
2. Select **New team**.
3. Choose the **Activity** and enter the **Name**, and a **Code** if the school uses one.
4. Optionally add a **Level or category** (for example Under 14, Beginner, Girls or Mixed), a **Coach**, a **Colour** and a **Squad size limit**.
5. Leave it **Active**, then select **Create team**.

Use **Edit** to change a team later. **Delete team** removes it. Former members are kept as history.

Add players

1. On the team, select **Add a player** and choose a **Student**. Only students enrolled in the activity can join.
2. Set the **Role** (for example **Captain**), the **Position** and the **Jersey number**.
3. Tick **Substitute (not counted against the squad limit)** for a reserve.
4. Select **Add to team**.

Remove takes a player out of the squad. **Transfer...** moves a player to another team.

Open Teams (/extracurricular/teams)

Events, registrations and results

Create a sports day or tournament, take registrations and record results.

Address: /extracurricular/events · Checked against the application

Online version

Create an event

1. Open **Extra-Curricular**, then **Events**, and select **New event**.
2. Enter the **Name**, the **Kind of event** (for example Sports Day), the dates, **Register by**, **Level**, venue and organiser.
3. Set **Status**. Families only see events that are no longer **Draft**, and can register only while it is **Registration open** and before the deadline.

Register

Select **Register** on an event, choose a student (staff can also choose a team or a group) and register. A parent can register only their own child. **Withdraw** removes a registration while registration is open.

Record results

1. Select **Results** on the event.
2. Select **Add registered participants** or **Add a row**.
3. Enter the **Round**, **Score**, **Rank** and **Award**.
4. Leave **Rank by score when no rank is given** ticked to rank by score, highest first.
5. Select **Save results**. Saving a round replaces that round's results. Two participants cannot share a rank in a round.

Record and publish achievements

Record a medal or award, then publish it so the family sees it.

Address: /extracurricular/achievements · Checked against the application

Online version

Record

1. Open **Extra-Curricular**, then **Achievements**, and select **Record an achievement**.
2. Choose the **Student**, give a **Title**, and optionally the **Award**, **Level**, date, description and a link to a supporting document.
3. Select **Record**. It starts as **Awaiting approval** and is private.

Publish

Someone with approval rights selects **Publish** (or **Reject**). Only published achievements appear for parents and students. A published achievement cannot be edited or deleted until it is unpublished.

Green campus campaigns

Set targets for tree planting, recycling and more, and record measured and verified figures.

Address: /extracurricular/sustainability · Checked against the application

Online version

Start a campaign

1. Open **Extra-Curricular**, then **Sustainability**, and select **New campaign**.
2. Enter a **Name**, the kind of programme, **What is measured**, the **Unit** and the **Target**. Add the **Starting value** if there is one.
3. Select **Create campaign**.

Record figures

1. Select **Figures** on a campaign.
2. Enter the **Date** and **Value**, and say whether it is **Measured** (counted or weighed) or **Estimated** (calculated).
3. An estimate must say **How it was calculated**.
4. Add **Evidence**, participants and volunteer hours, then **Record figure**.

What counts

The progress bar counts only figures that are **Measured** and **Verified**. Someone with approval rights selects **Verify** on a measured figure that has evidence. Estimates are shown separately and are never counted towards the target. Editing a figure clears its verification.

Extra-Curricular rules and categories

The rules for enrollment and groups, and the list of categories.

Address: /extracurricular/settings · Checked against the application

Online version

Rules

Setting	What it does
Most activities per student	0 means no limit. Counts live requests and places.
Parents and students can ask to join	Off means only staff enroll students.
Stop clashing sessions	An approval is refused if the student would be in two sessions at once.
One house or group of each kind per student	Moving a student replaces their old house instead of adding a second.

Select **Save rules** to apply them.

Categories

Add, rename, recolour, hide, reorder and delete categories. A category that has activities cannot be deleted; hide it instead. Mark one as **Environmental / green** to group sustainability work.

Online Classes

Schedule, join and review live classes and meetings.

Available by default to: School administrator, Principal, Teacher, Accountant, Librarian, Receptionist, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Find and join an online class

See your classes and meetings, and join the live room when it opens.

Menu: Online Classes · Address: /online-classes · Checked against the application

Online version

The **Online Classes** page greets you by name ("Hi …") and has the lists **Today**, **Upcoming**, **Past** and (for organisers) **Drafts**, filtered by kind: **Online class**, **Parent meeting**, **Staff & management**, **Exam** and **Other**. The links **Calendar**, **Attendance**, **Recordings** and **Reports** are at the top. A banner may offer to **Turn on** reminders on this device.

Join or start

On a class, the host sees **Start class** (or **Start meeting**) and everyone invited sees **Join now** once the room is open. Before then, a disabled button shows when it opens.

The class's page has tabs for **People**, **Attendance**, **Materials**, **Notes** and **Recordings**, and **Activity** for those allowed to see it.

Calendar (the Class calendar) shows classes by date, and **Reports** (Online class reports) has **Overview**, **Student attendance** and **Teachers** (and **Settings** for administrators).

Open Online Classes (/online-classes)

Schedule an online class or meeting

Schedule a class or meeting and invite people.

Menu: Online Classes | Address: /online-classes | Checked against the application

Online version

Teachers, principals and administrators see **Schedule class** and **Schedule meeting** on the **Online Classes** page.

1. Open **Online Classes** from the menu and select **Schedule class**. The dialog is titled **Schedule a class** (or an exam, or a meeting, for those types). It says everyone you invite gets a notification and a reminder before it starts.
2. Enter a **Title** ("Give it a title"). Choose the **Class** (required for a class, optional otherwise) and the **Subject**.
3. Pick the **Date** ("Pick a date") or, for a repeating class, the **First class**, then **Starts** ("Pick a start time") and **Length**.
4. To repeat, switch on repeating, choose the days of the week and the **Until** date.
5. Choose **Who's invited**, and **Remind everyone** when you want reminders.
6. Under **Where**, choose **Built-in video room** (attendance is taken for you) or **Paste a link** for Zoom, Meet or Teams. A pasted link stays hidden until someone joins, and only invited people get it.
7. Optionally add a **Description**.
8. Select **Schedule class** (or **Schedule … sessions** for a series), or **Save as draft**.

A message confirms how many sessions were scheduled. If some people have no login yet, you are told they were not invited; link their accounts in their Student or Staff profiles.

Open Online Classes (/online-classes)

Reschedule, cancel or end an online class

Change the time of a class, cancel it, end a live class for everyone, or end a repeating series.

Menu: Online Classes | Address: /online-classes | Checked against the application

Online version

Open the class from the **Online Classes** list. Its page shows the actions you are allowed to use.

Publish a draft

A class saved as a draft has a **Publish** button. Publishing tells everyone invited ("Published. Everyone invited has been notified.").

Reschedule

1. Open the **More actions** menu and choose **Reschedule**.
2. Pick a new time. It must be in the future ("Pick a time in the future.").
3. For a repeating class, choose how far the change reaches: **Only this class**, **This and following** or **All upcoming**.
4. Select **Reschedule** ("Rescheduled. Everyone invited has been told."), or **Keep current time** to leave it.

Cancel

1. Choose **Cancel class** (or **Cancel meeting**) from **More actions**.
2. For a repeating class, choose the same scope as above.
3. Confirm. The message is "The class is cancelled" or "Sessions cancelled". **Keep it** backs out.

In the live room

From the class, **Start class** or **Join now** opens the live room. It has a **Chat** button for the class chat and, for the host, **Record** (which becomes **Stop recording**) and **End class**. Recording shows "Recording started" and then "Recording stopped. It'll appear under Recordings shortly.". If the video connection fails you see "Video connection problem" with the reason. When the class has ended or was cancelled, the room tells you and **Back to the class** returns to its page.

End a live class

Select **End for everyone** and confirm **End the class for everyone?**. Everyone is disconnected and attendance becomes final ("Ended. Attendance is final."), though it can still be corrected afterwards.

End a series, or delete

- **End the whole series** cancels every upcoming session and tells everyone invited; past sessions and their attendance are kept ("Series ended. Upcoming sessions are cancelled.").

- **Delete** removes it from everyone's list and cannot be undone.

Calendar and reports

- **Calendar** on the Online Classes page opens the **Class calendar**, which shows classes by date.
- **Reports** opens **Online class reports**, which shows, for the period you choose with **From**, **To** and **Class**, how many classes there were in **Total**, how many were **Held** (with the teaching time), how many were **Cancelled**, and the **Average attendance** (present or late). Managers see every class and meeting in the school; teachers see the classes they host. The print button opens the print dialog, where you can choose "Save as PDF".

Open Online Classes (/online-classes)

Parent Portal

A parent's view of each child: attendance, homework, results, fees, messages, leave and the school bus.

Available by default to: School administrator, Parent. Schools can change this under Roles & Permissions.

All articles online

Online version

Use the Parent Portal: fees, leave and your child's school day

See your child's attendance, homework and results, pay a fee online, apply for leave and track the bus.

Menu: Parent Portal | Address: /parent-portal | Checked against the application

The Parent Portal gathers everything about your child's school day in one place. Sign in with the account your school gave you; see Sign in to School Sphere.

Choose a child

If more than one child is linked to your account, choose the child with the child switcher at the top. Most tabs show information for that child.

If you see "No children are linked to this account yet", the school has not linked your account to a student. Ask the school office.

Tabs

Overview, **Attendance**, **Homework**, **Exam Results**, **Fees**, **Messages**, **Leave**, **Track bus**, **Notifications** and **Learning profile**. **Ask School AI** appears when the school has it on. The Overview also has quick actions such as **Pay fees**, **Apply for leave**, **Message teacher** and **Track bus**.

Pay a fee online

1. Open the **Fees** tab.

2. On the invoice you want to pay, select **Pay online**.
3. Check the amount in **Pay ... fee**. You will pay on Razorpay's secure page with UPI, card or netbanking; your card and UPI details go only to Razorpay.
4. Select **Continue to pay** with the amount.

"Payment received for ..." confirms it, and the receipt appears once the payment is confirmed. If the school has not set up online payment, the dialog says "Online payment isn't set up for this school yet. Please pay at the school office."

Apply for leave

1. Open the **Leave** tab and select **New request**.
2. Set **From** and **To**, and type a **Reason**. All three are required ("Start date is required", "End date is required", "Reason is required").
3. Select **Submit request** ("Leave request submitted").

Open Parent Portal (/parent-portal)

Store Management

Stores and warehouses, items and suppliers, purchase requisitions and orders, goods receipts, stock control, issues, sales, returns and reports.

Available by default to: School administrator, Principal, Teacher. Schools can change this under Roles & Permissions.

All articles online

Store Management at a glance

What the school store module covers, the tabs you see, and how stock stays trustworthy.

Menu: Store Management | Address: /store | Draft

Online version

Store Management is a main item in the sidebar, below Co-Curricular. It runs the school's stores and warehouses: what the school owns, what it buys, what it hands out and what it sells.

What you see

A menu down the left of the page (a **Menu** button at the top on phones) shows only what you are allowed to open, in five groups:

- **Overview**: Dashboard.
- **Master data**: Stores & Warehouses, Items, Categories, Suppliers.
- **Purchasing**: Purchase Requisitions, Purchase Orders, Goods Receipt (GRN).
- **Stock and distribution**: Stock Management, Item Issue / Distribution, Returns.
- **Sales and insight**: Store Sales, Reports.

A number beside an entry is how much is waiting there (requisitions or receipts to approve, item and return requests, low-stock items). The page you are on is highlighted. The bell beside the title lists alerts for you, such as low stock or a request waiting for approval.

Rules the module keeps

- Stock goes **up** only when a goods receipt is recorded (and approved, if the school asks for that), when opening stock or an inward adjustment is entered, or when a return is approved.
- Stock goes **down** only through an issue, a sale, a supplier return, a transfer, or an adjustment (damaged, expired, lost).
- You can never issue or sell more than a store holds, and two people cannot take the last unit at the same time.
- Every change is a line in the **stock ledger** that cannot be edited or removed. A correction is a new line.
- Every document has its own number, such as **PO-2026-00012**.
- Items, categories and suppliers are shared by the whole school; stores and their stock belong to one campus.

Ask School AI

Staff who can view the store can ask **Ask School AI** things like "how much stock do we have", "what is running low" or "how many notebooks are left". It only reads, and answers with what that person is allowed to see.

Hiding tabs for a role

A school can hide individual menu entries for a role under **Roles & Permissions > Sub-menus > Store Management**. This only tidies the screen; what a role may do is still set by its permissions.

Set up stores, categories, items and suppliers

Create stores, categories, the item master and suppliers before buying or issuing anything.

Address: /store/items · Draft

Online version

Stores and warehouses

Open **Stores & Warehouses** and select **New store**. Give it a name, a short code and (optionally) a location. Add the **managers and authorised staff**: anyone listed on a store can only work in the stores they are assigned to. People not listed anywhere can use every store of the campus. The same page holds the **Store rules**: require approval before issuing, require approval of goods receipts, and low-stock alerts.

Categories

Categories starts with ten school categories (stationery, books, uniforms, laboratory, sports, IT, furniture, cleaning, electrical, general). Add your own, and a **Subcategory** under any of them. A category in use cannot be deleted.

Items

Open **Items** and select **New item**. Enter the name and unit (Nos, Box, Kg, Litre…), choose a category, and set the **minimum level**, **reorder quantity** and **maximum level**. Leave the **item code** empty and one is generated. Add a **selling price** to sell the item from the store, a **tax %**, and the suppliers who provide it. An item that has been used is **made inactive** instead of deleted so history stays readable.

Suppliers

Suppliers holds contact details, GST number, payment terms and (for people who can edit) bank details. Select a supplier to see its purchase orders, invoices and what is still owed.

Buy goods: requisition, order, receipt and payment

Raise a requisition, get it approved, order from a supplier, receive the goods and record the invoice and payments.

Address: /store/requisitions | Draft

Online version

1. Requisition

Open **Purchase Requisitions**, select **New requisition**, choose the store, the items and quantities, then **Submit for approval** (or **Save as draft**). Someone who can approve opens it and selects **Approve** or **Reject** (a reason is required to reject). The person who raised it is alerted either way.

2. Purchase order

Open **Purchase Orders** and select **New purchase order**, or open an approved requisition and select **Create purchase order** to fill it in for you. Choose the supplier, the store the goods are for, and each item's quantity, price, discount % and tax %. The totals are worked out for you. **Place order** sends it on; a draft can still be edited. An order with nothing received can be cancelled.

3. Goods receipt (GRN)

When goods arrive, open **Goods Receipt (GRN)** and select **Receive goods**, or open the order and select **Receive goods**. Enter what actually arrived: **partial deliveries are fine**, and you cannot receive more than was ordered. **Stock is added only now.** If the school requires approval of receipts, the receipt waits and stock is added when an approver approves it. The order becomes **Partly received** and then **Received**. Use **Close as complete** on a partly received order that will not be fully delivered.

4. Supplier invoice and payments

On **Purchase Orders**, open the **Supplier invoices and payments** tab, or select **Record supplier invoice** on an order. Open an invoice to **Record a payment**; part payments are allowed and the status moves from **Unpaid** to **Part paid** to **Paid**. Invoices past their due date show **Overdue** and raise an alert.

To send goods back to a supplier, see **Issue items to people and places, and take returns**.

Stock levels, adjustments, transfers and physical counts

Online version

See what every store holds, move stock between stores, correct it with a reason, and reconcile a physical count.

Address: /store/stock · Draft

Open **Stock Management**. Its tabs are **Stock levels**, **Movement history**, **Adjustments**, **Transfers** and **Physical counts**.

Stock levels and movement history

Stock levels shows quantity, average cost and value by store and item, with **Low stock** and **Out of stock** flags. **Movement history** is the ledger: every change with its date, document number, reason and who did it. It cannot be edited or deleted.

Adjust stock

Select **Adjust stock**. Choose the type: **Opening stock** and **Stock inward** add stock; **Outward**, **Damaged**, **Expired** and **Lost** take it out; **Correction** can go either way. **A reason is required for every adjustment.** Stock cannot go below zero.

Transfer between stores

Select **Transfer**, choose the two stores and the items. Both stores change at once, at the cost the items were held at.

Physical count

Select **Start a count**, choose the store (and optionally one category). The system records what it holds, you enter what you counted and select **Reconcile**. Each difference becomes an adjustment (an explanation is required). Movements made while the count was open are kept: only the difference you found is applied.

Issue items to people and places, and take returns

Issue items to students, staff, departments, classes or labs, request items for approval, and record returns.

Address: /store/issues · Draft

Online version

Issue or request

Open **Item Issue / Distribution**. Someone who can issue selects **Issue items**; stock leaves the store at once. Everyone else selects **Request items**, and the request waits for an approver. If the school requires approval, every issue is a request first: an approver selects **Approve**, then a store keeper selects **Hand over and issue**.

Choose who the items are for (student, teacher, non-teaching staff, department, class, laboratory, other facility), the purpose, and whether the items are **returnable** and when they are due back. **Bulk issue** gives the same items to many recipients, each with their own record; if stock runs short, nothing is issued.

Returns

Open **Returns** and select **New return** (or **Record a return** on an issue).

- **Issued item returned**: choose the issue and how much of each item is coming back.
- **Sale return**: choose the sale.
- **Return to supplier**: choose the store, the supplier and the items; a reason is required.

Each line has a **condition**. **Good** goes back on the shelf. **Damaged** and **Expired** are written off (both movements are recorded). **Lost** is written off without a stock movement. Stock changes when the return is **approved**; a rejected return changes nothing. You cannot return more than is outstanding, and non-returnable issues cannot be returned.

Sell uniforms, books and stationery

Record a sale to a student, parent or staff member, take payment and print the receipt.

Address: /store/sales · Draft

Online version

Open **Store Sales** and select **New sale**. Choose the store and the buyer (a student, a parent buying for a student, a staff member, or a walk-in), then add the items. The price comes from the item; the discount and tax are worked out for you. Changing a price at the counter needs permission to edit store records.

Add the **payment**: cash, online, card, cheque or bank transfer, in one or more parts. Leave it empty to record the sale as **Unpaid** and collect later from the receipt (**Collect payment**). A sale is **Paid**, **Part paid** or **Unpaid**.

Stock is deducted when the sale is recorded, and a sale cannot be larger than the stock in hand. The **receipt** opens straight away with the school's letterhead; select **Print**.

Sales are recorded in the store only. They are not posted to Fee Management or Accounting.

Store reports, exports and the audit trail

The seventeen store reports, how to filter and export them, and the audit trail.

Address: /store/reports · Draft

Online version

Open **Reports**, choose a report on the left, set the filters and read the table. Totals are shown under it. All filtering and paging happen on the server.

Group	Reports
Stock	Current stock, Stock valuation, Low stock, Out of stock, Stock movement, Damaged / expired / lost stock, Stock adjustments, Store transfers
Purchasing	Purchase register, Supplier-wise purchases, Item-wise purchase history
Issues	Item issue register, Student-wise issues, Staff-wise issues, Department-wise consumption
Sales	Sales register, Sales collection

Filters offered depend on the report: date range, store, category, supplier, a type or status, and a search box. **Print this page** prints what is on screen. **Export** (CSV that opens in Excel, or PDF through the browser's Save as PDF) takes every row and needs the **Export** permission.

Audit trail

The **Audit trail** entry at the bottom of the list shows who changed what and when for every store record, with the document number. It is permanent: entries cannot be edited or deleted.

Study Materials

Browse and use study materials shared by the school.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Find study material

Browse, search and open the notes, papers and links your teachers shared.

Menu: Study Materials · Address: /study-materials · Checked against the application

Online version

Open **Study Materials** from the menu. On the **Browse** tab, search or filter the list. If nothing matches, the page says "No materials match" and offers **Clear filters**.

Open Study Materials (/study-materials)

Add study material for students

Upload notes, papers or a video link and share them with a class or section.

Menu: Study Materials | Address: /study-materials | Checked against the application

Online version

Teachers and the platform administrator see **Add material**. Other roles can browse only.

1. Select **Add material**.
2. Enter a **Title** (up to 200 characters) and choose the **Material type**: Notes, Textbook / E-book, Worksheet, Assignment, Question paper, Previous year paper, Answer key, Video, Presentation or Reference.
3. Optionally add a **Chapter / topic** and a **Description**.
4. Choose the **Class** and **Subject**, and who can see it: **All students**, **One class** or **One section** (a class, or a class and section, is then required).
5. Under **File or link**, attach a file (PDF, Word, PowerPoint, Excel, images, ZIP or text, up to the size shown) or add a link for a video. One of the two is required: "Attach a file or add a video/external link."
6. Select **Save as draft**, or **Publish** to share it with students ("Saved as draft" or "Material published").

If the file type is not supported you see "That file type isn't supported. Use PDF, Word, PowerPoint, Excel, images, ZIP or text."

Your own materials

The **My materials** tab lists what you uploaded. For the platform administrator it is the **Platform library**, shared with every school. A school's uploads stay inside that school.

Open Study Materials (/study-materials)

Talent Showcase

Share, discover and review students' creative work.

Available by default to: School administrator, Principal, Teacher, Accountant, Librarian, Receptionist, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Share a talent for approval

Post a showcase of your work, submit it for review, and see it once approved.

Address: /talents/new | Checked against the application

Online version

Share a talent

1. Open **Talent Showcase** from the menu and select **Share your talent**.

2. Under **Pick a category**, choose the kind of talent.
3. Enter a **Title** (under 150 characters) and **Tell the story**: what inspired it and what you are proud of.
4. Add up to 8 **Tags** to help others discover it.
5. **Add your media**: a photo, video or recording. For written work, write at least 20 characters in the description instead.
6. Under **Who can see it once approved?**, choose who may see it: **School Only** or **Public**. The public option is offered only if your school allows it.
7. Select **Save draft** to keep working, or **Submit for approval**. For something already submitted, the button reads **Resubmit for approval**.

A message says "Draft saved" or "Submitted! We'll notify you once it's reviewed."

The checks include "Give your showcase a title" and "Keep the title under 150 characters".

Change a showcase

On your own showcase's page, **Edit** opens the same form with your work filled in, so you can change it and use **Save draft** or **Submit for approval** (**Resubmit for approval** once it has been submitted). If a reviewer asks for changes, edit it and resubmit.

Review submissions (teachers and school administrators)

Open the **Review center**. The **Approval queue** shows how many are waiting and how many are from students. **Reviewed** shows past decisions. Administrators also see **Reports** (flagged work) and **Settings**.

Other pages: **Explore talents** to browse by category, **My talents** for your own, and creator and school pages.

Share a talent (/talents/new)

Find and follow your own work

- **Explore talents** lets you browse by category. Search with **Search talents** (for example a talent, a name or a school) and use the scope buttons **All schools** and **My school**.
- **My talents** lists your own showcases. Filter them with **All**, **Drafts**, **Pending**, **Published**, **Needs changes** and **Archived**; the counts show how many are in each.

Review, approve and manage talent showcases

Approve, send back or decline a submitted showcase, feature or archive talents, and set the approval rules.

Address: /talents/review | Checked against the application

Online version

Only teachers and school administrators can use the **Review center**; other people see "Reviewers only".

Review a submission

1. Open **Talent Showcase**, then the **Review center**. On the **Approval queue**, open a submission, or choose **Review this submission** on a talent's page.
2. Read the work. The panel shows its category and the visibility that was requested.
3. Choose **Approve**, **Request changes** or **Decline**.
4. Write a comment. It is optional for approval; for the other two, be kind and specific about what should change.
5. Select the button, which is named after your choice: **Approve & publish**, **Send back for changes** or **Decline submission**.

A message confirms it: "Approved and published", "Changes requested - the creator has been notified" or "Declined - the creator has been notified". The **Reviewed** tab lists past decisions.

Manage a talent

On a talent's page, people with the right access can **Edit**, **Restore to drafts**, **Feature this talent** (or **Remove from featured**), **Share link** ("Link copied") and **Archive**. The creator can **Submit for approval** or **Resubmit for approval**.

Reports and settings (administrators)

- **Reports** lists work that people flagged. Resolve a report by dismissing it ("Report dismissed") or hiding the content ("Content hidden").
- **Settings** has the **Tagline** and the **Approval rules**: **Who reviews student submissions?** is either **Teachers & school admins** or **School admins only**. Save with a "Settings saved" message.

Open the Review center (/talents/review)

Appreciate a talent, or report one

React to published work, visit a creator's or a school's page, and report work that should not be shared.

Online version

Menu: Talent Showcase · Address: /talents · Checked against the application

Browse

Open **Talent Showcase** from the menu. The **Discover** page has rails such as **Featured talents**, **Trending now**, **From your school**, **Recently added**, **Most appreciated**, **Most viewed** and **Teacher talents**. Open any card to see the showcase. A creator's page lists their **Talent highlights** and **All published showcases**; a school's page shows **Featured talents**, **Our talents by category**, **Student talents** and **Teacher talents**.

React

On a published showcase, the **Appreciate this talent** group offers the reactions **Like**, **Love**, **Appreciate**, **Amazing** and **Congratulations**. Reactions open only once the work is published.

Report

If a showcase should not be shared, select **Report content** on its page. If you have already reported it, the page says "You've reported this." **Report this showcase** asks why:

- **Inappropriate content**
- **Bullying or harassment**
- **Privacy concern**
- **Not their own work**
- **Spam or misleading**
- **Something else**, where you add details

After you send it you see "Thanks - the school's moderators will take a look." Moderators handle it from the **Reports** tab of the Review center.

If you open a showcase that is private, still under review or removed, the page says "This showcase isn't available" with **Back to Discover**.

Open Talent Showcase (/talents)

Academics

Academic Setup

Academic years, terms, departments, classes and sections, subjects, capacity and the academic calendar.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Online version

Set up academic years, terms, classes and sections

Create the academic year, its terms, the classes and their sections that other modules rely on.

Menu: Academics → Academic Setup | Address: /academics | Checked against the application

Attendance, timetable and examinations all use the academic year, classes and sections set up here.

Create an academic year and terms

1. Open **Academic Setup** from the menu. The page is headed **Academic management**.
2. On the **Academic Years** tab, create a new academic year: enter the **Name**, **Start date**, **End date** and **Status**. Tick **Set as current year** if it is the one in use. Select **Create academic year** ("Academic year created").
3. Open the **Terms** tab and create a term: **Name**, **Academic year**, **Start date**, **End date** and **Status**, then **Create term** ("Term created").

The checks are "Name is required", "Start date is required", "End date is required" and "Select an academic year".

Create a class and its sections

1. Open the **Classes & Sections** tab and select **New class**.
2. Enter the **Name** and choose the **Academic year**. A **Department / stream** is optional.
3. Select **Create class** ("Class created").

4. Select **New section** (or **Add section** on the class). Enter the **Name**, choose the **Class**, set **Capacity** (at least 1) and **Current strength**, and optionally a **Class teacher**.
5. Select **Create section** ("Section created").

Add a calendar event

1. Open the **Academic Calendar** tab and select **Add event**.
2. In **New calendar event**, enter the **Title** and choose the **Type**: Term start, Term end, Exam window, Holiday or Other.
3. Set the **Start date** (required) and an optional **End date**, and choose the **Academic year**.
4. Select **Add event** ("Event added").

Holidays and other dates added here show on the school Calendar.

Departments, subjects and class capacity have their own tabs.

Open Academic Setup (/academics)

Set up departments, subjects and class capacity

Create departments or streams and choose their head and members, add subjects and link them to classes, merge two sections, and check seats against capacity.

Menu: Academics → Academic Setup | Address: /academics | Checked against the application

Online version

These tabs on the **Academic Setup** page sit beside the ones in Set up academic years, terms, classes and sections. Do that first, because subjects link to classes.

Create a department

Departments or streams group classes, for example Primary, Secondary, Science or Commerce.

1. Open **Academics** > **Academic Setup** and select the **Departments** tab.
2. Select **New department**.
3. Enter the **Name** (for example Science) and a **Code** (for example SCI). Add a **Description** if you like.
4. Leave **Active** ticked. Inactive departments cannot take new members.
5. Select **Create department**. A message says **Department created**.

To change one later, select **Edit** on its row, then **Save changes**. **Delete** asks you to confirm because it is permanent.

Choose the head and the people

1. On the department's row, open **Head and employees**.
2. Under **Department head**, choose a person or **No head**, then select **Save head**. The department must be active to change its head.
3. Under **Employees**, pick someone from **Add an employee...** and select **Add**.
4. For each employee, set the **Reporting person**. Choose **Administrators (no reporting person)** if nobody sits above them.

> **Note:** Profile changes go for approval to a person's reporting person, or to the department head. See View and update your profile.

Add a subject

Subjects are core or elective and can be linked to one or more classes.

1. Open the **Subjects** tab and select **New subject**.
2. Enter the **Name** (for example Mathematics) and the **Code** (for example MATH).
3. Choose the **Type**.

4. Under **Classes**, tick every class that studies it.
5. Save. A message says **Subject created**. Use **Edit** or **Delete** on the row to change it later.

Teachers are attached to subjects in Assign subjects and class teachers.

Check class capacity

1. Open the **Class Capacity** tab. **Overall enrollment** shows total students against total seats.
2. Use **Filter by class** to look at one class. For each section you see **Capacity**, **Enrolled** and **Utilization**.
3. The **Status** badge reads **Available**, **Near capacity** (75% or more) or **Full** (100%).

Merge two sections

On the **Classes & Sections** tab, select **Merge sections**.

1. Choose the **Class**.
2. Choose the section to **Keep** and the section to **Merge into it**.
3. Select **Merge** and confirm with **Confirm section merge**.

> **Warning:** A merge cannot be undone, and the screen says student records are not moved automatically. Check the students of both sections afterwards.

Open Academic Setup (/academics)

Attendance

Mark and review student and staff attendance, with daily, monthly and yearly views.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Online version

Mark student attendance

Record who is present, absent, late, on half day or on leave for one class section on one date.

Menu: Academics → Attendance | Address: /attendance | Checked against the application

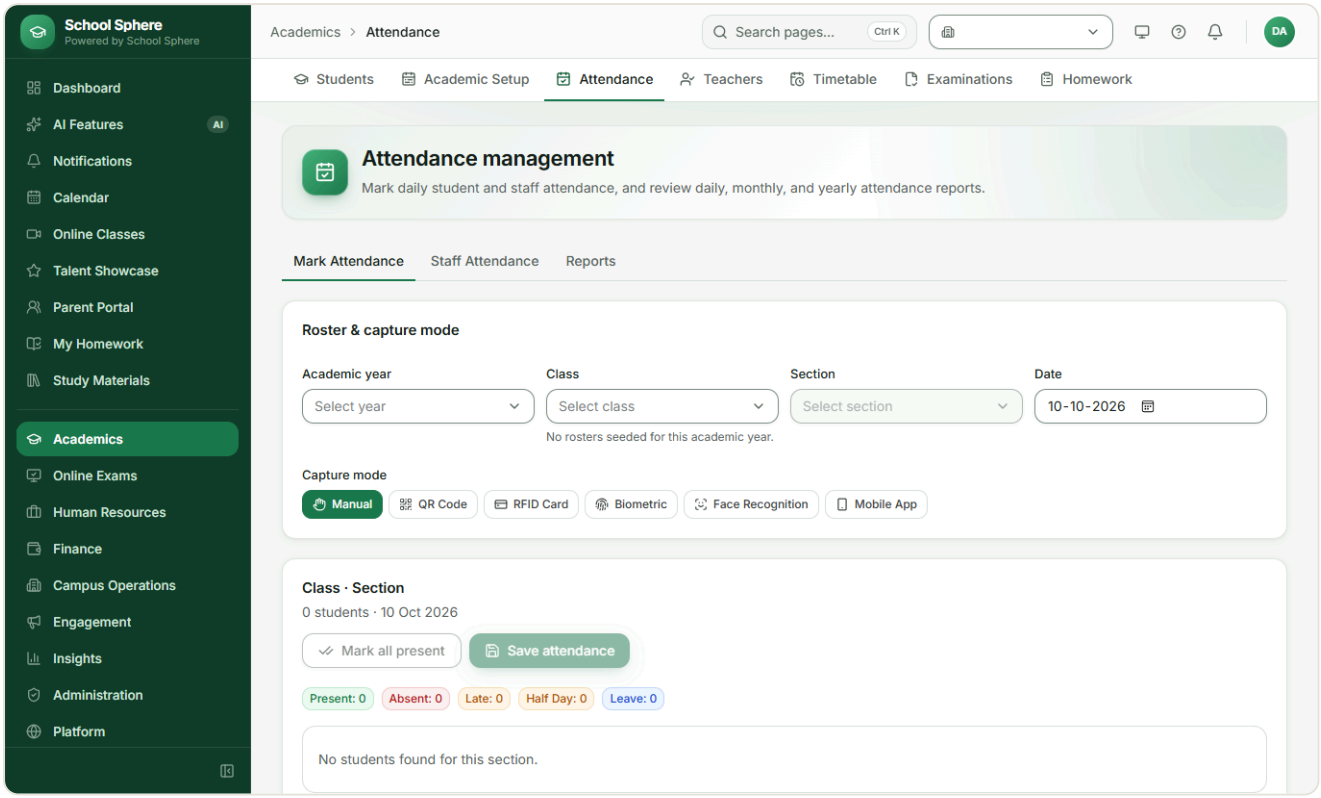

Use this to record attendance for the students of one section on one day.

Before you start

- You need access to the **Attendance** module.

- The section must have students in its roster. If none appear, the page says "No students found for this section."
- If the chosen academic year has no classes, the page says "No rosters seeded for this academic year."

Steps

The Mark Attendance tab.

1. Open **Attendance** from the menu. The page is headed **Attendance management**; stay on the **Mark Attendance** tab.
2. Choose the **Academic year**, **Class** and **Section**, then pick the **Date**.
3. Leave **Capture mode** on **Manual**. The other modes are described below.
4. Every student starts as **Present**. If attendance for this section and date was saved before, the saved marks are shown instead.
5. Change the status of anyone who was not present. The statuses are **Present**, **Absent**, **Late**, **Half Day** and **Leave**.
6. Check the totals above the list, then select **Save attendance**.

A "Attendance saved" message confirms it. If it cannot be saved you see "Could not save attendance".

To mark everyone present in one step, select **Mark all present** before changing the exceptions.

Capture modes

The choices are **Manual**, **QR Code**, **RFID Card**, **Biometric**, **Face Recognition** and **Mobile App**. Only **Manual** is working in the web app. Choosing another mode shows "Simulated" with a note that the hardware integration is not available; keep using the grid to record attendance.

> **Note:** If attendance was already saved for this section and date, the saved marks are shown when you pick them again. Check the date before you save.

Open Attendance (/attendance)

Mark staff attendance

Record whether each staff member was present, absent or late on a date.

Menu: Academics → Attendance | Address: /attendance | Checked against the application

Online version

Use this to record attendance for school staff.

Steps

1. Open **Attendance** and select the **Staff Attendance** tab.
2. Pick the date.
3. Select **Mark all present** if most people were in, then change the exceptions. The statuses are **Present**, **Absent** and **Late**.
4. Select **Save attendance**.

A "Staff attendance saved" message confirms it. If it fails you see "Could not save staff attendance". If the school has no staff to list, the page says "No staff to mark attendance for."

Open Attendance (/attendance)

View attendance reports

Review attendance by day for the whole school, by month for one section, and as a yearly trend.

Online version

Menu: Academics → Attendance | Address: /attendance | Checked against the application

Reports use the attendance recorded in Mark student attendance.

1. Open **Attendance** and select the **Reports** tab.
2. Choose **Daily**, **Monthly** or **Yearly**.

Daily

Daily attendance shows one row for every class and section on the date you pick, with **Roster**, **Present**, **Absent**, **Late**, **Half Day**, **Leave** and **% Present**.

Monthly

Monthly attendance is for one section. Choose the **Class**, the **Section** and the **Month**. The grid has a row per **Student** and a column for each day, ending in **% Present**.

Yearly

Yearly attendance trend shows the percentage present by month across the recorded attendance history, for the section you choose.

Open Attendance (/attendance)

Take attendance by scanning QR passes or faces

Open a scanning session, scan students' or staff members' QR passes (or recognise faces), and see who was accepted.

Online version

Menu: Academics → Attendance | Address: /attendance | Checked against the application

Scanning is a faster way to take attendance than ticking a register. It only works when an administrator has switched on QR or face attendance for the branch (see Set up attendance methods and devices). The manual register always works.

Open a scanning session

1. Open **Attendance** from the menu and select the **Scan** tab.
2. Under **Open a scanning session**, choose who it covers: **Students of a section** (then choose the **Section**) or **Staff**.
3. Choose **Scans mean**: **Arrival** or **Arrival (first scan), then departure**.
4. Choose how long it stays open in **Open for**, then select **Open session**. A "Scanning session opened" message appears.

Today's sessions are listed under **Today's sessions**. Use **Close session** when you are finished, or **Resume** on a closed one. A closed session accepts no more scans.

Scan people in

- **Camera:** select **Start camera** and hold each QR pass in front of it. Select **Stop camera** when done. If the browser has no camera access, use a handheld scanner.
- **Handheld scanner:** click in the **Handheld scanner: focus here and scan** box and scan the passes.
- **Face:** where face attendance is on, choose **Recognise**. If a face is not matched with enough confidence the page says to mark the person in the register instead.

Results appear as people are scanned, with the count against those expected. A pass is accepted only while the session is open and only for the people the session covers. Anything else shows as **Not accepted** with the reason.

Students and staff show the pass from their app or from **My attendance pass** (Show your attendance QR pass).

After scanning

Anyone not scanned stays unmarked until you mark them in the register. Scanned people are marked present, or late if they arrive after the school's late time. Mistakes are fixed through Attendance corrections, and administrators review odd scans in **Exceptions**.

Correct attendance and review exceptions

Ask for a recorded day to be changed, approve or reject requests, and review unusual scans.

Online version

Menu: Academics → Attendance | Address: /attendance | Checked against the application

When your school has **Lock past days** switched on, teachers cannot edit an earlier register directly. They send a correction request, and an administrator decides.

Request a correction

1. Open **Attendance** and select the **Corrections** tab.
2. Select **Request a correction**.
3. Choose the **Person type** (**Student** or **Staff member**), the person and the **Day**.
4. Choose what it **Should be**, then write the **Reason**: say what should change and why.
5. Select **Send request**. A "Correction requested" message appears.

The current record stays until an administrator approves the request.

Approve or reject a request

1. On the **Corrections** tab, use **Correction status** to show **Pending** requests.
2. Select **Approve** to update the record and the audit trail ("Correction applied"), or **Reject** ("Correction rejected"). A rejection asks **Why is this rejected?**.

Decided requests show who decided and the reason.

Exceptions

Administrators and principals also see an **Exceptions** tab that collects what needs a human look:

- **Waiting for review** — scans (for example a face match below the automatic threshold) that need **Approve** or **Reject**.
- **Refused scans** and **Accepted scans**, and **Duplicates ignored**.
- **Unknown cards and ids** — cards or terminal ids that are not linked to a person.
- **Offline devices** — devices that have not reported in recently.
- **Scanned in, marked absent**, **Present without a scan** and **Staff who did not check out**.

Select **Approve** on a waiting item to mark the person; select **Reject** to refuse it.

Examinations

Exams, marks entry, results and ranking, report cards and transcripts.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

Online version

Create an exam, schedule subjects and enter marks

Set up an exam for a class and term, add subject papers, then record each student's marks.

Menu: Academics → Examinations | Address: /examinations | Checked against the application

Use this to prepare an exam and record the marks.

Create the exam

1. Open **Examinations** from the menu. The page is headed **Examination management**; stay on the **Exams** tab.
2. Select **New exam**. The dialog says exams are scoped to a class and term, with subject schedules added separately.
3. Enter the **Name** and choose the **Exam type**: **Internal**, **Mid-term**, **Final**, **Practical** or **Viva**.
4. Choose the **Class**, the **Term** and the **Status**: **scheduled**, **ongoing** or **completed**.
5. Set the **Start date** and **End date**.
6. Select **Create exam**.

An "Exam created" message appears. The checks are "Name is required", "Select a term", "Select a class", "Start date is required" and "End date is required".

Add subject schedules

1. Choose the exam in the subject schedules section on the same tab.
2. Select **Add subject**.
3. Choose the **Subject** and set the **Date**, **Start time** and **End time**.
4. Set **Max marks** (at least 1) and **Pass marks** (not negative). They start at 100 and 35. A **Room** is optional.
5. Select **Add subject schedule**. A "Subject schedule added" message appears.

Enter marks

1. Open the **Marks Entry** tab.
2. Under **Select exam and subject**, choose the exam and then the subject.
3. For each student, type the **Marks obtained**, or tick **Absent**.

4 Select **Save marks**.

A "Marks saved" message confirms it, or "Could not save marks" if it failed. Marks above the maximum are brought down to the maximum.

Grades, rankings, report cards and transcripts are on the **Results & Ranking**, **Report Cards** and **Transcript** tabs.

Open Examinations (/examinations)

See results and rankings, write report card remarks and view a transcript

Review an exam's grades and ranking, add remarks to a student's report card, and see a student's transcript.

Online version

Menu: Academics → Examinations | Address: /examinations | Checked against the application

Results appear after marks have been saved; see Create an exam, schedule subjects and enter marks.

Results and ranking

1. Open **Examinations** and select the **Results & Ranking** tab.
2. Choose an exam in **Select an exam**.
3. The list shows each student's **Rank**, **Admission No.**, **Student**, **Section**, **Total**, **Percentage**, **Grade** and **GPA**.

Where the school has AI on, **Draft remarks with AI** opens a dialog that drafts remarks for the class. Read them before using them.

Report cards

1. Open the **Report Cards** tab. Under **Select student and exam**, choose the student and the exam.
2. The report card lists each subject with **Marks obtained** (or Absent), **Max marks** and **Grade**, and a **Total**.
3. Type teacher or principal comments in **Remarks** and select **Save remarks** ("Remarks saved").

Transcript

Open the **Transcript** tab and choose a student. It lists that student's exam results. Until you choose, it says "Select a student to view their transcript."; if there are none, "No exam results recorded for this student yet."

Open Examinations (/examinations)

Homework

Assign, submit and grade homework; students see their own homework.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Assign homework to a class

Create homework for a class or one section, publish it, and review what students hand in.

Menu: Academics → Homework | Address: /homework | Checked against the application

Online version

Use this to give a class homework for a subject.

Steps

1. Open **Homework** from the **Academics** menu. The page is headed **Homework & assignments**; stay on the **Homework** tab.
2. Select **New homework**.
3. Enter a **Title** (up to 200 characters) and a **Description** (up to 2000 characters).
4. Choose the **Class**. Choose a **Section** if only one section should get it; this is optional.
5. Choose the **Subject** and who it was **Assigned by**.
6. Set the **Assigned date** and **Due date**. An **Attachment note** is optional.
7. Set the **Status** to **Draft** while you are still working on it, or **Published** to give it to students.
8. Select **Create homework**.

A "Homework created" message confirms it.

Field	What is checked
Title	"Title is required"; "Title can be at most 200 characters".
Description	"Description is required"; "Description can be at most 2000 characters".
Class	"Select a class".
Subject	"Select a subject".
Assigned by	"Select a teacher".
Assigned date	"Assigned date is required".
Due date	"Due date is required".

Review submissions, edit or delete

On the homework's row, open the actions menu:

- **View / grade submissions** opens what students handed in.
- **Edit** changes the homework ("Homework updated").
- **Delete** removes it ("Homework deleted").

Open Homework (/homework)

Lesson & Portions

Syllabus by class and subject, lesson plans and their approval, daily teaching progress, completion tracking, examination portions, and the syllabus view for parents and students.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Online version

Lesson & Portions at a glance

What the Lesson & Portions module covers, which tab does what, and who can do what.

Menu: Academics → Lesson & Portions | Address: /lesson-portions | Checked against the application

Lesson & Portions is where a school plans its syllabus class by class and subject by subject, plans the lessons that cover it, records what was actually taught, and sees which subjects are falling behind. It sits under **Academics** in the menu.

The tabs

Tab	What it is for	Who sees it
Overview	**My teaching**: today's lessons, updates still to record, deadlines. **School overview**: completion against plan, classes and subjects behind, term-end forecast.	Everyone with the module
My plan	Your lesson plans: create, submit, revise, reschedule.	People who can create lesson plans
Daily progress	Your classes and subjects; mark topics started, completed or delayed.	People who can record progress
Calendar	Planned lessons by day, with holidays and exam days marked.	Everyone with the module
Class tracking	Completion by class and subject, pending chapters, delayed lessons with a suggested action.	Everyone (teachers see only their own classes)
Approvals	Lesson plans waiting for review.	People who can approve plans
Syllabus	Curricula, syllabus plans, chapters and topics, templates.	Everyone to read; managers to change
Exam portions	Which chapters and topics an exam covers.	Managers, approvers and teachers
Subject report, Teacher report	Planned against actual, forecasts, teacher-wise progress.	Subject report: everyone. Teacher report: people who see all classes
Resources	Links and study materials attached to the syllabus.	Everyone
Settings	School rules, your alert choices, what you may do, the audit trail.	Everyone

Parents and students do not see these tabs. They see **Syllabus Progress** instead; see Syllabus progress for parents and students.

Who can do what

The school decides in **Roles & Permissions** (Syllabus & Portions). Until a school changes a role: administrators and principals can do everything; teachers can plan lessons and record progress for the classes and subjects they teach. A teacher never sees another teacher's classes.

What the percentages mean

Completion counts only topics marked **Completed**. The school chooses whether that is measured by planned periods (the default), topics, chapters or topic weights; see Settings. The tick on a progress bar is where the plan says the subject should be today, from the chapter dates.

Set up a syllabus

Add a curriculum, create a syllabus for a class and subject, add chapters and topics (or import them), and publish it.

Online version

Address: /lesson-portions/syllabus · Checked against the application

Add a curriculum

1. Open **Lesson & Portions**, then **Syllabus**, then the **Curricula** tab.
2. Select **Add curriculum**. Give it a name (for example CBSE 2026), choose the board (CBSE, ICSE, Kerala State Board, International Baccalaureate, Cambridge or Other) and save.

A curriculum that has syllabus plans cannot be deleted; mark it inactive instead.

Create the syllabus

1. On the **Syllabus plans** tab select **New syllabus**.
2. Choose the curriculum, academic year, class and subject, and give it a title. Add when teaching starts and when the syllabus must be complete, and optionally the textbooks, reference materials and learning objectives.
3. Select **Create syllabus**. It starts as a **Draft**.

There can be only one syllabus for the same year, class, subject, curriculum and version. To change a published syllabus later, choose **New version** from its row menu; the new version is a draft copy, and publishing it archives the old one.

Add chapters and topics

Open the syllabus. Select **Add chapter** and give it a title, planned periods, an optional weight and a deadline. Each chapter starts with one whole-chapter topic; select **Add topic** to break it down, and the small list icon on a topic to add subtopics. Use the arrows to reorder.

Progress is recorded on topics (or on subtopics when a topic has them). A chapter, topic or subtopic that already has teaching records, lesson plans or an exam portion cannot be deleted; create a new version without it instead.

Import from a file

1. Open the syllabus and select **Import CSV**. Select **Download template** to see the columns: Chapter, Topic, Subtopic, Periods, Deadline and Objectives.
2. Fill it in (in Excel, use Save As, CSV UTF-8) and choose the file. The screen tells you how many rows are ready and lists any row it cannot read.
3. Select **Import**. Everything is added together, or nothing is. Switch on **Replace the existing chapters** to start over; that is refused once teaching has been recorded.

Templates for next year

From a syllabus's row menu choose **Save as template**. On the **Templates** tab, **Use for a new year** copies it into an academic year for the classes you choose. Chapter dates move by the same number of days as the new start date. Classes that already have the syllabus are skipped.

Publish

Select **Publish**. Teachers can then record progress against it and it appears in dashboards. Archiving stops new records but keeps the old ones.

> **Note:** Every change to a syllabus, including deadline changes, is kept in the audit trail under **Settings**.

Plan lessons

Create a lesson plan from the syllabus, check there is enough time, submit it, and revise or reschedule it later.

Address: /lesson-portions/my-plan Checked against the application

Online version

Create a plan

1. Open **Lesson & Portions**, then **My plan**, and select **New plan**.
2. Choose the class, optionally a section (leave it to cover all sections) and the subject. The plan follows the class's published syllabus.
3. Give it a title and choose the type: weekly, monthly, term-wise or annual. Set when it starts and ends, and how many periods are available.
4. Tick the chapters or topics you will teach. For each topic you can set a date and the periods. Select **Spread across the dates** to place them in order over the teaching days.
5. Select **Save draft**.

The screen compares the periods your topics need with the timetabled periods between the dates, after holidays and exam days from the school calendar. If there is not enough time it says so; move the end date or choose fewer topics.

Draft with AI

Select **Draft with AI** to have the AI write a lesson outline into the description from the topics you chose. It is only a draft: read it, edit it, and submit it yourself. Nothing is published or recorded as taught until you (and, if your school requires it, a coordinator) approve it.

Submit

Choose **Submit for approval** from the plan's row menu. If your school requires approval the plan waits for a coordinator; otherwise it is published straight away. A rejected plan or one with changes requested can be edited and submitted again.

Revise and reschedule

An approved plan is not overwritten. Choose **Revise** (or **Reschedule lessons** to only move dates), say why, and save: the change is kept as a numbered revision with your reason, and goes back for approval if your school requires it. Lessons can also be moved from the **Calendar** by selecting them.

> **Note:** A teacher plans only for classes and subjects they teach. Assigning a plan to another teacher takes the approval permission, and is recorded.

Record what you taught

Mark topics as in progress, completed or delayed, with the date, periods, homework and notes.

Address: /lesson-portions/progress · Checked against the application

Online version

Update a topic

1. Open **Lesson & Portions**, then **Daily progress**. Your classes and subjects are listed with how far each syllabus has got; **To record** shows lessons whose planned date has passed with nothing recorded.
2. Open a class. Chapters that are under way are open; select a chapter to open or close it.
3. Select **Record** (or **Update**) on a topic. Choose **In progress**, **Completed** or **Delayed**, the date it was taught (not in the future) and the periods used.
4. For **Delayed**, say why. Optionally add teaching notes, homework, classroom observations and the date of the next lesson.
5. Select **Save**.

Teaching notes and observations stay inside the school. Homework is shown to parents and students only if the school allows it.

A whole chapter

Select **Mark chapter taught** to update every topic of the chapter that is not completed, using 1 period each. Topics already completed are left as they are, and the whole set is saved together.

Mistakes

There is one record per topic and section; a second entry is refused. A **Completed** topic cannot be changed by the teacher. A coordinator can use **Correct** (the shield icon) to change it with a reason; the earlier state stays in the history, which anyone can open with the clock icon. If two people save at the same time, the second is told to reload instead of overwriting the first.

> **Tip:** On the Teacher app, **More**, then **Lesson & portions** shows today's lessons and lets you record progress from your phone.

Track syllabus completion

Completion by class and subject, planned against actual, delayed subjects and what to do about them, forecasts and reports.

Online version

Address: /lesson-portions/tracking | Checked against the application

Class tracking

Class tracking lists every class, section and subject with a published syllabus. Filter by year, term, class, section, subject and teacher.

Column	Meaning
Chapters	Completed / started / not started, out of the total. For example 7 completed, 2 in progress and 3 pending of 12 chapters is 58.3% by chapters.
Completion	The bar is the actual completion; the tick is where the plan says it should be today.
Status	**On track**, **At risk** (not enough timetabled periods left before the deadline), **Behind** (trailing the plan by more than the school's threshold) or **Overdue** (the deadline has passed), or **Complete**.
Forecast finish	When the syllabus will be finished if teaching continues at the pace so far. An estimate.

The other tabs show **Pending chapters** (what is left, oldest deadline first) and **Delayed lessons and actions**, which gives each late subject a suggested action, such as how many topics a week to teach to catch up, or how many extra periods are needed.

Drilling into a subject

People who see all classes can select a subject to open its class and section, teacher, chapters, pending topics, the same subject in other sections and a suggested catch-up schedule. The schedule spreads the pending topics over the teaching days left, skipping holidays and exam days. It is a suggestion for the teacher to review; it changes no plan or record.

Reports

Subject report averages completion by subject, compares planned with actual (ahead or behind in percentage points) and shows the term-end forecast. **Exam portions not covered** lists topics in the portions of upcoming exams that have not been taught. **Teacher report** shows, for each teacher, average completion, topics completed and periods used in a date range, and the subjects with no recent update. Every table has an **Export** button for a CSV file, which opens in Excel; **Print or save as PDF** prints the page.

> **Note:** Teachers see only their own classes in all of these. School-wide figures need the permission to see all classes.

Approve lesson plans

Review submitted and revised lesson plans, approve them, ask for changes or reject them.

Address: /lesson-portions/approvals | Checked against the application

Online version

Approval is switched on in **Settings** (**Lesson plans need approval**). With it off, a submitted plan is published straight away.

Review

1. Open **Lesson & Portions**, then **Approvals**. **Waiting for review** lists submitted plans and plans a teacher revised after approval, with their topics and history.
2. Select **Approve**, **Ask for changes** or **Reject**. Asking for changes and rejecting need a comment, which the teacher is sent; approving takes an optional note.

You cannot review your own plan, and only submitted plans can be reviewed. The **Decided** tab lists approved, rejected and returned plans.

> **Note:** Every decision, with who made it and when, is kept in the plan's history and the audit trail.

Set the syllabus for an exam

Choose the chapters and topics an exam covers, publish them to students and parents, and see what has not been taught yet.

Online version

Address: /lesson-portions/exams | Checked against the application

1. Open **Lesson & Portions**, then **Exam portions**, and choose an examination (created in **Examinations**).
2. Tick the chapters or topics each subject covers. The list comes from the class's published syllabus, so the exam points at the same chapters and topics rather than copying them.
3. Select **Save portions**, then **Publish** to show them to students and parents (if the school shows exam syllabus to families). **Unpublish** to change them again.

Have they been taught?

Have these been taught? shows, per subject, how many topics have been completed in every section of the class, and lists the ones that have not. Select **Revision plan** for a suggested order for revising what has been taught, on the teaching days left before the exam.

> **Note:** Only people who set up the syllabus, or approve plans, can change or publish exam portions.

Use the lesson calendar and attach resources to a syllabus

Online version

See planned lessons by month or week and move one to a new date, and link textbooks, notes and worksheets to a syllabus, chapter or topic.

Address: /lesson-portions/calendar | Checked against the application

Lesson calendar

Open **Lesson & Portions** and select the calendar.

1. Switch between **Month** and **Week**, and use **Previous**, **Next** and **Today** to move around.
2. Lessons appear on the dates set in your lesson plans. Holidays and examination days from the school calendar are marked.
3. If a day has too many lessons, **+n more** opens the rest.
4. To move a lesson, open **Move lesson**, pick the **New date**, give a **Reason** and save. It is saved as a revision of the plan with your reason.

If the page says **No lessons planned in this period**, nothing is planned in the range you are viewing. The page also shows the plan's dates. Change them from **My plan**.

Lesson resources

Link textbooks, reference notes, presentations and worksheets to a syllabus, chapter or topic.

1. Open **Resources** under Lesson & Portions and select **Add resource**.
2. Under **Type**, choose **Study material** (a file from this school) or **Web link**.
3. For a study material, upload the file first in **Study Materials** (/study-materials) and then pick it here. There is one place for files and one set of access rules. For a web link, paste the address.
4. Enter a **Title** and choose the **Syllabus**. You can narrow it to a **Chapter** or **Topic**.
5. Choose **Visible**: **Staff only**, or **Show to students and parents**. Families see it only when your school turns the family view on and the syllabus is published.
6. Save. Use **Edit** to change it later, or **Remove** to detach it. A file in Study Materials stays there.

Open the lesson calendar (/lesson-portions/calendar)

Syllabus progress for parents and students

What has been taught in each subject, what is being taught now and next, and the portions for upcoming exams.

Menu: Syllabus Progress | Address: /lesson-portions/family | Checked against the application

Online version

Open **Syllabus Progress** in the menu. Parents with more than one child choose the child at the top.

You see	What it shows
Subject cards	The share of the syllabus covered, chapters completed, the topic being taught now and the next topics.
Show chapters	Each chapter and topic with its status, and the homework recorded for it. Resources the school marked for families appear as links.
Exam syllabus	The chapters and topics of upcoming exams, once the school has published them.

This view is read-only. It never shows a teacher's notes, observations, reasons for delays, or how the school rates a subject's progress; a topic that is delayed simply reads as being taught. If the school has not turned the view on, a message says so.

> **Note:** You see only your own children. A student sees only their own class.

Lesson & Portions settings, alerts and audit trail

School rules for approval, family view and how completion is measured; which alerts reach you; and the audit trail.

Online version

Address: /lesson-portions/settings | Checked against the application

Module settings

People who set up the syllabus can change these; everyone else sees them read-only.

Setting	What it does
Lesson plans need approval	Submitted plans wait for a coordinator. Off: they are published at once.
Parents and students can see syllabus progress	Turns on the read-only view. Off by default.
Show homework / Show published examination syllabus	What the family view includes.
How completion is measured	Planned periods (default), topics, chapters or topic weights. Only completed topics count.
Behind when trailing by	How many percentage points under the plan a subject may be before it is marked **Behind**.
Missing update after	Days with nothing recorded before a teacher is reminded.
Deadline reminder	How many days before a chapter or term deadline an alert is sent.
Alerts the school sends	Switch off any of the six kinds of alert for everyone.

My alerts

Switch off the alerts you do not want: upcoming chapter deadlines, overdue lesson plans, missing teaching updates, syllabus behind target, revised lesson plans, and approvals and decisions. You are only ever alerted about classes and plans you are responsible for.

What you can do here

Shows which of the five actions your role has: set up syllabus and settings, create lesson plans, record progress, approve plans and correct progress, and see school-wide reports. Administrators change them in **Roles & Permissions**.

Audit trail

People who see school-wide reports can list syllabus creation and revision, deadline changes, lesson plan assignment and decisions, progress updates and corrections, exam portion publication and settings changes, with who made each and when.

Students

Admissions, student records, guardians, documents, promotion and graduation.

Available by default to: School administrator, Principal, Teacher, Librarian, Receptionist. Schools can change this under Roles & Permissions.

All articles online

Online version

Register a student

Enrol a student directly, without going through the admissions pipeline.

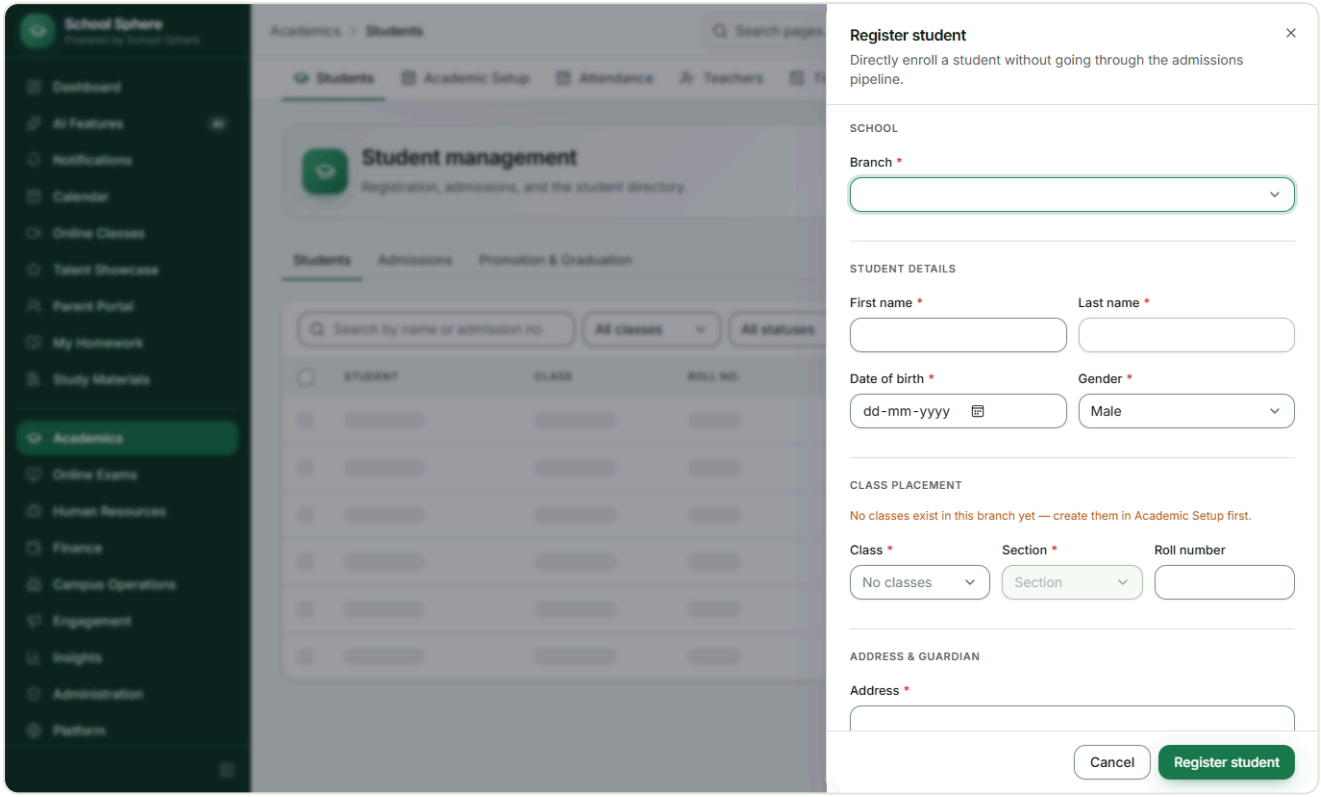

Menu: Academics → Students | Address: /students | Checked against the application

Use this to put a student on the school's roll straight away. If the student is still applying, use the **Admissions** tab instead.

Before you start

- You need access to the **Students** module. If **Students** is missing from your **Academics** menu, ask your school administrator.
- Have the student's class and section, date of birth, address and a guardian's name and phone number ready.
- The class and section must already exist for the branch you choose.

Steps

The Register student form.

1. Open **Academics**, then **Students**. The page is headed **Student management**.
2. Stay on the **Students** tab and select **Register student**.
3. Under **School**, check the **Branch**.
4. Under **Student details**, fill in **First name**, **Last name**, **Date of birth** and **Gender** (Male, Female or Other).
5. Under **Class placement**, choose the **Class**, then the **Section**. Add a **Roll number** if you use one.
6. Under **Address & guardian**, fill in **Address**, **Guardian name**, **Relation** and **Guardian phone**.
7. If you have them, fill in **Student email** and **Parent email**. Both are optional and appear only when you are registering, not when you are editing.
8. Select **Register student**.

A "Student registered" message appears and the student is listed on the **Students** tab.

Fields and checks

Field	Required	What is checked
Branch	Yes	Shows "Select a branch" if empty.
First name	Yes	Shows "First name is required".
Last name	Yes	Shows "Last name is required".
Date of birth	Yes	Shows "Date of birth is required".
Class	Yes	Shows "Select a class".
Section	Yes	Shows "Select a section".
Address	Yes	Shows "Address is required".
Guardian name	Yes	Shows "Guardian name is required".
Guardian phone	Yes	Shows "Guardian phone is required".
Student email	No	Shows "Enter a valid email address" if it is not an email address.
Parent email	No	Shows "Enter a valid email address" if it is not an email address.

Important: Each email you enter creates a login automatically (a student login for **Student email**, a parent login for **Parent email**), linked to the student, and a temporary password is emailed to that address. Leave the emails empty if you do not want logins created yet.

Note: If the school cannot save the student, the message shown is the one the server returns, or "Could not register student" when it returns none.

Open Students (/students)

Edit a student or mark a student as transferred

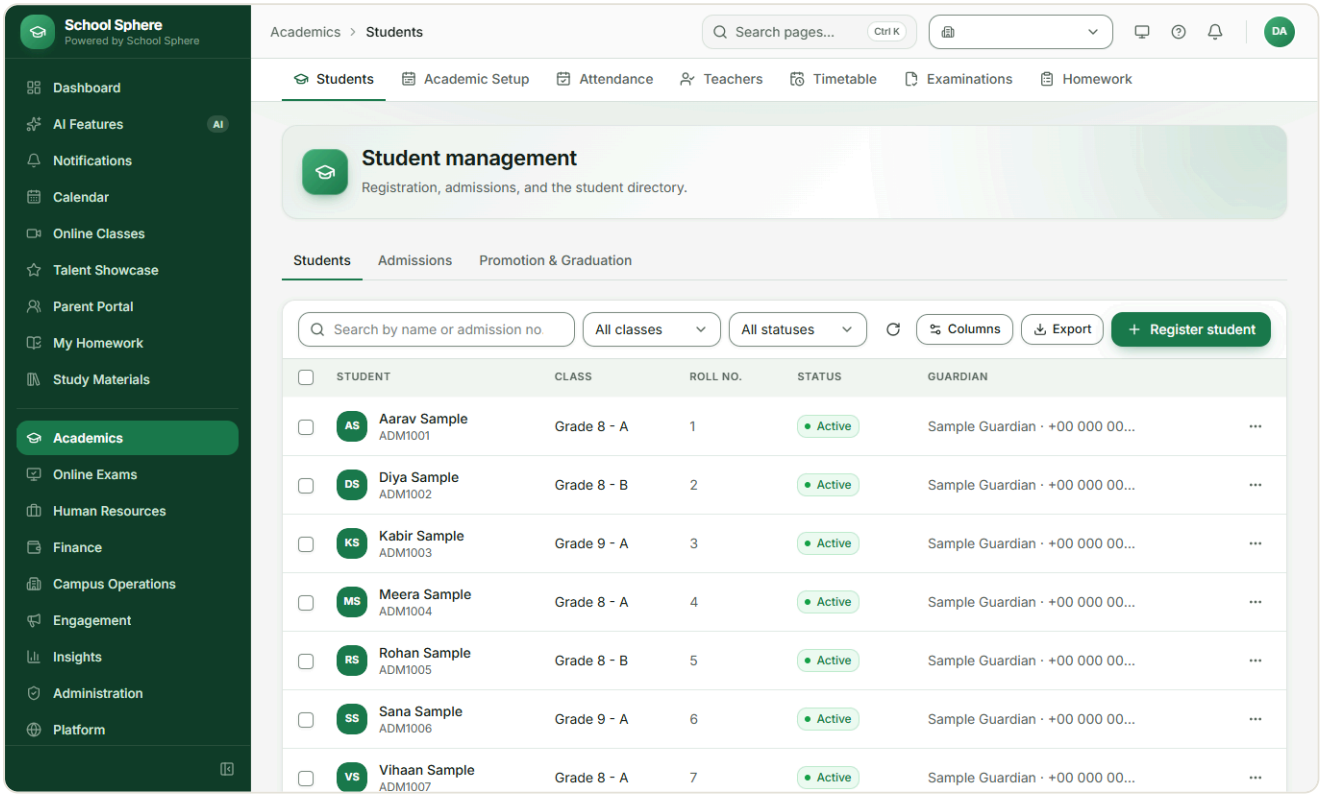

Find a student, change their details, or record that they have left for another school.

Menu: Academics → Students | Address: /students | Checked against the application

Online version

Use this to find a student on the roll, correct their details, or record a transfer out of the school.

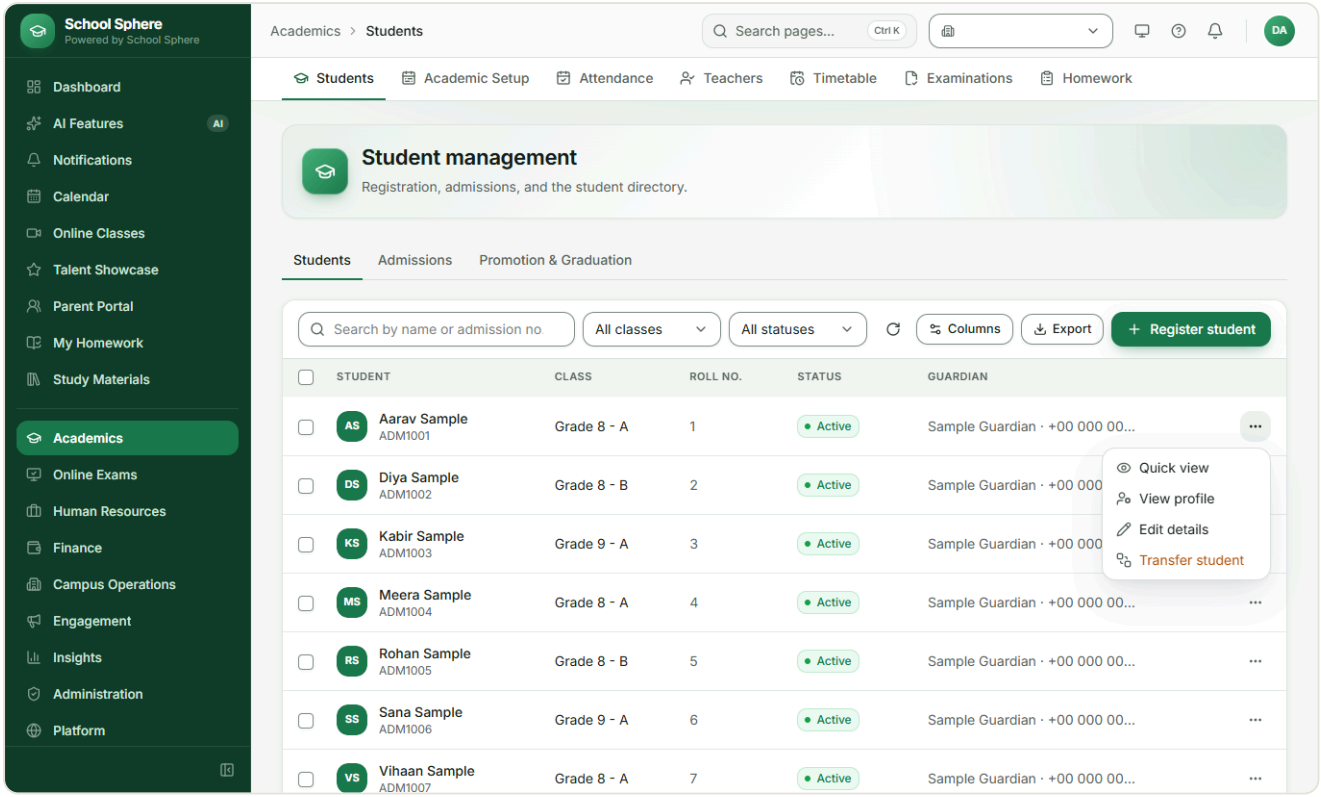

Find a student

The Students tab.

1. Open **Academics**, then **Students**, and stay on the **Students** tab.
2. Type a name or admission number in **Search by name or admission no.**
3. To narrow the list, use the **Class** filter (**All classes** shows everyone) and the **Status** filter (**All statuses** shows everyone).

Open or edit a student

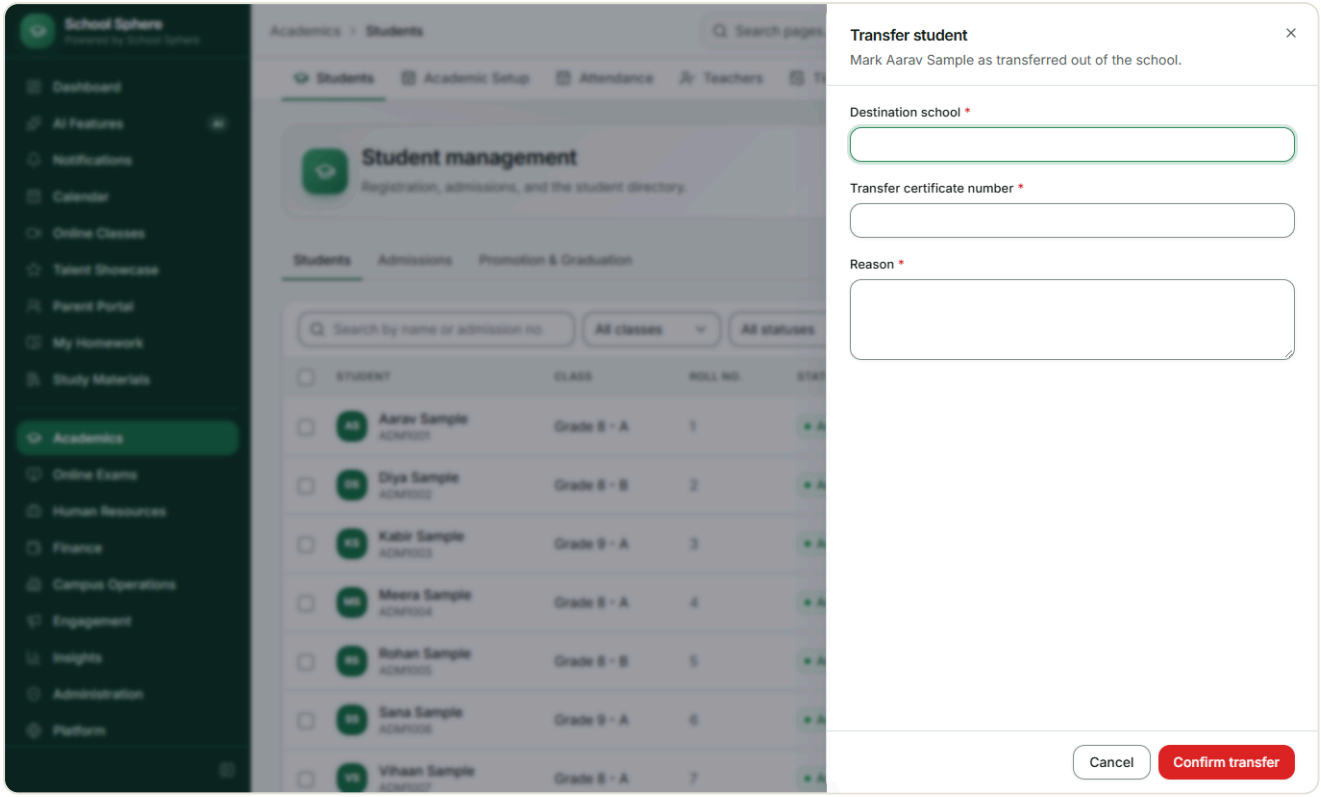

The actions menu on a student row.

1. On the student's row, open the actions menu (**Actions for** the student's name).
2. Choose one of:
   - **Quick view** for a short summary.
   - **View profile** to open the full profile.
   - **Edit details** to change the student's core details.
3. In **Edit student**, change what you need and select **Save changes**.

A "Student updated" message confirms it. The form is the same as in Register a student, without the optional email fields.

Mark a student as transferred

The Transfer student dialog.

Only students whose status is active show this option.

1. On the student's row, open the actions menu and choose **Transfer student**.
2. Fill in **Destination school**, **Transfer certificate number** and **Reason**.
3. Select **Confirm transfer**.

The student is marked as transferred, and a message names them.

Field	Required	What is checked
Destination school	Yes	Shows "Destination school is required".
Transfer certificate number	Yes	Shows "TC number is required".
Reason	Yes	Shows "Reason is required".

> **Important:** Check the name in the dialog description before you confirm. This records that the student has left the school.

Open Students (/students)

Work with a student's profile

Open a student's profile to add guardians, record medical details, set transport and hostel, upload documents, print an ID card and link their login.

Online version

Menu: Academics → Students | Address: /students | Checked against the application

Open the profile

On **Academics > Students**, open the actions menu on the student's row and choose **View profile**. Use **Back to students** to return.

The profile has these tabs: **Overview**, **Guardian & Emergency**, **Medical**, **Transport & Hostel**, **Documents** and **ID Card**. **Learning profile** appears when the school's AI features include it, and **Logins** appears for administrators.

Guardian & Emergency

- Select **Add guardian**, enter the **Name**, **Relation** (father, mother or guardian) and **Phone**, and optionally **Email** and **Occupation**, then **Save** ("Guardian details saved"). The checks are "Name is required" and "Phone is required". Each guardian can be edited or removed.
- Under the emergency contact, fill in the **Name**, **Relation** and **Phone** and select **Save emergency contact** ("Emergency contact saved").

Medical

Enter the **Blood group**, **Allergies**, **Ongoing conditions**, **Current medications**, **Doctor name** and **Doctor phone**, then select **Save medical information** ("Medical information saved"). The button stays off until you change something.

Transport & Hostel

Tick **Requires school transport**, then choose the **Route** from the list of active routes set up under Transport, and the **Pickup point** from that route's stops (choose the route first; changing the route clears the pickup point). Select **Save transport details** ("Transport details saved"). Under Hostel, tick **Resides in hostel**, choose the **Hostel** from the active hostels, then the **Room number** from that hostel's rooms that are in use, and save ("Hostel details saved"). Whatever was saved earlier is shown already chosen. If your account cannot read the transport or hostel lists, the fields are plain text boxes instead. If a list is empty, the field says "No routes set up", "No stops on this route", "No hostels set up" or "No rooms in this hostel"; add them in Transport or Hostel first.

Documents

Select **Upload document** and choose a file ("Document uploaded"). The remove button deletes a document ("Document removed").

ID Card

The tab shows the card with a QR code and barcode that encode the admission number, for scanning at gates and libraries. Select **Print ID card** to print it.

Logins

Administrators see **Login accounts**, which links the record to the login that signs in as the student. Online classes use it to decide who can join. Choose the login in **Choose a login** (search by name or email) and select **Link** ("Login linked"), or **Unlink**.

Open Students (/students)

Take an applicant through admissions

Record an inquiry and move the applicant through registration, entrance exam, interview and fee collection until you enrol them.

Online version

Menu: Academics → Students | Address: /students | Checked against the application

The **Admissions** tab tracks each applicant through stages: **Inquiry**, **Registration**, **Entrance Exam**, **Interview**, **Fee Collection** and **Enrolled**. An applicant can also end as **Waitlisted**, **Rejected** or **Withdrawn**. To enrol a student without this pipeline, use Register a student.

Before you start

- Create the classes and sections the applicant will join in Academic Setup.
- Open **Academics** > **Students** and select the **Admissions** tab.

Add an applicant

1. Select **New inquiry**.
2. Fill in the applicant and the **Applied class**, then save. The applicant appears in the list at **Inquiry**.
3. Use the stage filter, **All stages**, to narrow the list.

Move the applicant along

Each row offers the action for its current stage:

1. **Register** moves an inquiry to **Registration**. A message says **Application registered**.
2. **Edit exam details** records the **Entrance exam**. A message says **Entrance exam updated**.
3. **Edit interview details** records the **Interview**. A message says **Interview updated**.
4. **Decide** records the decision. Use **Reject** to mark the application **Rejected**.
5. **Record fee** records the admission fee payment. A message says **Fee payment recorded**.
6. **Promote** takes someone from the waitlist to fee collection.
7. **Enroll** turns the applicant into a student. A message says the applicant is enrolled with an admission number.
8. **Withdraw** marks an application **Withdrawn**.
9. **View student** opens the new student record.

> **Note:** If a parent sign-in account could not be created, the message says it **needs attention**. Open the student's profile and link or create the login under Logins.

Open Students (/students)

Import many students from a CSV file

Register a whole class at once by uploading a CSV file, then fix any rows that failed.

Menu: Academics → Students | Address: /students | Checked against the application

Online version

Use **Import** to register many students from one file. Class and section must already exist, so set those up first in Academic Setup.

Steps

1. Open **Academics** > **Students** and select **Import**. The **Import students** dialog opens.
2. Select **Download template** and fill it in. Do not rename the headings.
3. The columns are: **First name*** *Last name**, Date of birth*, Gender*, Class*, Section*, Roll number, Address*, Guardian name*, Guardian relation*, Guardian phone*, Student email **and** Parent email**. A star means required.
4. Write dates as `yyyy-mm-dd` or `dd/mm/yyyy`. Use the exact names of your classes and sections.
5. Choose the file in the dialog and start the import.
6. If any rows fail, select **Download failed rows**. The file adds **Row** and **Error** columns. Correct those rows and import only them.

Logins

An email creates a login. A **Student email** creates one for the student, and a **Parent email** creates one for the parent. Leave both empty if you do not want a login created from the file.

If it refuses the file

- **Missing columns** means a required heading is missing or misspelled. Use the template headings.
- **Gender must be…** or **Guardian relation must be…** lists the allowed values.
- **Missing…** names the required fields that were empty on that row.

> **Tip:** Import a few rows first to check the template, then the rest.

Open Students (/students)

Promote a class to the next year and graduate the final class

Online version

At year end, move every active student of a section to the next class, and move a final-year class to alumni.

Menu: Academics → Students | Address: /students | Checked against the application

Teachers do not see the **Promotion & Graduation** tab. Administrators and principals do.

Before you start

- Create the next academic year, and the target class and section, in Academic Setup.
- Clear fee dues and record any transfers first. See Edit a student or mark a student as transferred.

Promote a section

1. Open **Academics** > **Students** and select **Promotion & Graduation**.
2. In **Promote students**, choose **From class** and **Section**.
3. Choose **To class** and the target **Section**. The two sections must differ, or the screen says **Source and target sections must differ.**
4. Select **Promote** and confirm. The confirmation says how many students will move from one section to the other.
5. A message reports how many students were promoted.

Repeat for each section. It moves every active student of the section.

Graduate the final class

1. In **Graduate students**, choose the class under **Graduate class**.
2. Select **Graduate** and confirm. The confirmation says how many students will be marked as graduated.
3. A message reports how many students graduated.

> **Warning:** Graduation moves all active students in the class to alumni status. Check the class before you confirm.

Open Students (/students)

Teachers

Teacher profiles, assigned subjects and classes, lesson plans and performance.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Online version

Assign subjects and class teachers, and keep lesson plans

Give a teacher subjects to teach, name class teachers for sections, and write a lesson plan.

Menu: Academics → Teachers | Address: /teachers | Checked against the application

Assign a subject

1. Open **Teachers** from the menu. The page is headed **Teacher management**.
2. On the teacher's row, open the actions menu and choose **Assign subject**.
3. Choose the **Class** and the **Subject** ("Select a class", "Select a subject") and select **Assign**.

A "Subject assigned" message confirms it.

Assign class teachers

1. Select **Assign class teachers**. The dialog says: "Pick a teacher to be the class teacher for each section."
2. Choose a teacher for each section.

Messages "Class teacher assigned" and "Class teacher removed" confirm changes.

Write a lesson plan

1. Open the teacher's profile and open the **Lesson Plans** tab.
2. Select **New lesson plan**.
3. Choose the **Class** and **Subject**, enter a **Title** and **Description**, and set the **Week of**. An **Attachment note** is optional.
4. Set the **Status** to draft or published and save.

A "Lesson plan created" message appears. The checks are "Title is required", "Description is required" and "Week is required". Plans can be edited ("Lesson plan updated") or deleted ("Lesson plan deleted").

The profile also has tabs for **Overview**, **Qualifications & Experience**, **Salary**, **Attendance**, **Performance**, **Documents**, **Subjects & Classes** and **Student Performance**.

Subjects & Classes on the profile

On a teacher's profile, the **Subjects & Classes** tab lists their assignments. Select **Assign subject** to add one, and the remove button on a row, then confirming **Remove assignment**, to take one away.

Open Teachers (/teachers)

Timetable

Build and view timetables by section, room, teacher and student; periods, rooms and substitutions.

Available by default to: School administrator, Principal, Teacher, Parent, Student. Schools can change this under Roles & Permissions.

All articles online

Online version

Build a section's timetable and set up periods

Define the school day's periods, fill a section's weekly grid, and assign a substitute teacher for one date.

Menu: Academics → Timetable | Address: /timetable | Checked against the application

Use this to set up the school day and plan each section's week.

Set up the periods

1. Open **Timetable** from the menu. The page is headed **Timetable management**.
2. Open the **Periods** tab.
3. Edit the label, start and end times of each period. Use **Add period or break** to add a row, and the remove button on a row to take one out.
4. Select **Save periods** ("Periods saved"). **Discard changes** puts back what was saved.

Fill in a section's weekly grid

1. Open the **Class/Section View** tab and choose the section.
2. Select a cell of the grid (a day and period).
3. In the dialog, choose the **Subject**, **Teacher** and **Room**, and select **Save** ("Slot updated"). **Clear** empties the cell ("Slot cleared").
4. To start from a suggestion, select **Auto-generate draft**. The message "Draft timetable generated. Review and adjust manually before publishing." reminds you to check it.

If the teacher is already teaching another section at that time, a warning says so.

Assign a substitute for one date

1. Open the **Substitutions** tab and select **Assign substitute**.
2. In **Assign substitute teacher**, choose the **Date**, **Section**, **Scheduled period** and **Substitute teacher**. A **Reason** is optional.

3 Select **Assign substitute**.

The substitution covers a single date only; the recurring weekly timetable is left untouched. The checks are "Date is required", "Section is required", "Select a scheduled period" and "Substitute teacher is required".

Other views

Teacher View and **Student/Parent View** show a timetable from those points of view, and **Rooms** manages rooms.

Open Timetable (/timetable)

Online Exams

Online Exams

Build online exams from a question bank, evaluate attempts and publish results; students take exams online.

Available by default to: School administrator, Principal, Teacher, Student. Schools can change this under Roles & Permissions.

All articles online

Online version

Create and publish an online exam

Build an online exam step by step, then schedule it or publish it now.

Address: /online-exams/exams/new | Checked against the application

Use this to set up an exam that students take on screen.

Steps

1. Open **Exams** in the **Online Exams** menu and start a new exam. The wizard has six steps: **Basic information**, **Schedule**, **Configuration**, **Questions**, **Assign students** and **Review & publish**. A stepper shows "Step … of 6".
2. **Basic information:** enter the **Exam name** (at least 3 characters), choose the **Exam type**, **Subject** and **Class**. **Description / instructions** (shown to students before they start), **Academic year** and **Teacher** are optional.
3. **Schedule:** set the **Start date**, **Start time**, **End date** and **End time**, the **Exam duration (minutes)** (1 to 600, the countdown each student gets once they start) and the **Time zone**.
4. **Configuration:** set **Passing marks** and **Number of attempts** (1 to 5). Total marks come from the questions. Switch on the options you want: **Shuffle questions**, **Shuffle options**, **Show question numbers**, **Allow back navigation**, **Auto submit when time expires**, **Allow review before submit**, **Show result immediately** and **Show answers with results**.
5. **Questions:** add questions, from the question bank or new ones. Each must be complete.
6. **Assign students:** choose sections or individual students (at least one).

7 **Review & publish:** check the summary. Select **Save draft** to keep working later, **Schedule exam** to open it at the start time, or **Publish now** to open it immediately.

Checks you may see

- "Give the exam a name (at least 3 characters)."
- "Enter the start and end date and time."
- "The exam must end after it starts."
- "The duration can't be longer than the exam window (… min)."
- "Question … is incomplete - open it to fix."
- "Choose at least one section." / "Choose at least one student."

> **Note:** The server always closes an attempt when time is up, whatever the auto-submit setting.

Create an exam (/online-exams/exams/new)

Build a question bank, evaluate answers and publish results

Keep reusable questions, mark written answers, and publish results to students.

Online version

Menu: Online Exams → Question Bank | Address: /online-exams/question-bank | Checked against the application

Question bank

The **Question bank** page holds reusable questions for your subjects. Exams copy a question when it is added, so editing a question here never changes an exam that has already been set.

1. Open **Question Bank** in the **Online Exams** menu.
2. Select **Add question**. Choose the **Subject**, and optionally a **Class**, **Chapter / topic** and **Tags** (comma separated). Choose the **Difficulty**.
3. Choose the **Question type**, set the **Marks**, and type the **Question**. What else you fill in depends on the type: options with the correct one marked, a **Correct answer** for true or false, **Accepted answers** for fill in the blank (any one counts as correct; use underscores to show the blank), or an **Expected answer** for written answers (a guide for the teacher, not an exact match).
4. Save. A message says "Question added to the bank".

Other buttons are **Import CSV** and, where the school has AI on, **Generate with AI**. Filter by **Subject**, **Class**, **Topic**, **Difficulty** and **Question type**, and use **Clear filters** to reset. Selecting questions lets you delete them; exams that already use them keep their own copy.

Evaluate answers

Written answers need a teacher's marks.

1. Open **Evaluations**. The page is headed **Pending evaluation**; if nothing is waiting it says "All caught up".
2. Choose **Start evaluating** on an exam.
3. For each answer that needs marks, enter the marks (between 0 and the question's marks) and an optional comment. Answers marked automatically show "Auto-marked".
4. Select **Save**, or **Save & next student** to move on. For the last one the button reads **Complete evaluation**; it stays off while any answer still needs marks.

Results and publishing

1. Open **Results**, or an exam's **Results** from its row. The page shows how many students took it, **Passed**, **Failed** and the **Average score**.
2. **Analysis** opens exam reports, **Export CSV** downloads the results, and **Print** opens a printable sheet (allow pop-ups if asked).

3. Select **Publish results** and confirm **Publish results?**. Students see their marks and are notified straight away. If answers still need evaluation, the dialog says so.

Open the Question Bank (/online-exams/question-bank)

Monitor a proctored exam, import questions and read exam reports

Online version

Watch candidates during a proctored exam and decide on flagged events, import questions from a CSV file, and see how each exam went question by question.

Menu: Online Exams → Exam Dashboard | Address: /online-exams | Checked against the application

Exam Dashboard

Exam Dashboard is the home of the module. **Summary** shows **Total exams**, **Drafts**, **Live now**, **Completed**, **Students appeared**, **Average score** and the numbers who **Passed** and **Failed**. **Upcoming & live** lists the next exams, and **Quick actions** includes **Create exam**. **Evaluate** → jumps to answers waiting for marks.

Monitor a proctored exam

1. Open **Online Exams** > **Exams**, open the exam and select **Monitor**.
2. The page refreshes every 10 seconds. It lists the **Candidates** with a status: **Not started**, **Taking the exam** or **Submitted**. It also shows whether each is **Connected** or **Not connected**, and when they were last seen.
3. A row shows the incident and warning counts. Select a candidate to open the **Timeline** of recorded events. A **Camera snapshot** can be shown with **Show photo**.
4. Decide on a flagged candidate. Write a **Decision note**, which is required for a warning, misconduct or an appeal reply. Then choose **Clear**, **Warning** or **Misconduct**. If the student has appealed, choose **Accept appeal** or **Keep decision**. A message says **Decision saved**.

If the exam is not proctored, the page says so and shows only progress.

> **Important:** Events show what the browser reported. A tab switch could be a notification. Treat events as reasons to look, not as proof.

Import questions from a CSV file

You can import in the **Question Bank** and when adding questions to an exam.

1. Select **Import questions**.
2. Select **Download template** to get the file, then fill in one question per row. The columns are type, question, marks, difficulty, topic, options (`A|B|C`), correct (`B` or `A|C`), answers, explanation, model_answer and tags.
3. Choose the CSV file, or paste the rows under **...or paste CSV**. In the question bank, also choose the subject and class.
4. Every row is checked before import and problems are listed. Select **Import** to bring in the valid rows. A message says how many questions were imported.

Read exam reports

1. Open **Online Exams** > **Exam Reports** and choose an exam under **Choose an exam**. Reports appear once students have submitted.
2. See **Students appeared** out of those assigned, the class average and average marks.
3. **Question analysis** shows correct, incorrect and skipped answers for every question.
4. **Worth revisiting** lists the questions fewest students got right.

Open Online Exams (/online-exams)

Human Resources

Payroll

Payroll runs and payslips.

Available by default to: School administrator, Principal, Accountant. Schools can change this under Roles & Permissions.

All articles online

Online version

Run monthly payroll and pay payslips

Generate a month's draft payslips, finalize the run, and mark payslips as paid.

Menu: Human Resources → Payroll | Address: /payroll | Checked against the application

Use this to prepare and pay staff salaries each month.

Generate the month's payroll

1. Open **Payroll** from the menu and stay on the **Payroll Runs** tab.
2. Select **Generate payroll**.
3. Choose the **Month** (required: "Month is required") and select **Generate**.

The dialog explains that it creates a draft payslip for every active or on-leave staff member who has not already been paid for that month, using their current salary structure. A message says how many payslips were generated, and how many were skipped because they were already paid.

Finalize or remove a draft run

On the row of a draft run (finished runs have no actions), open the actions menu:

- **Finalize** closes the run ("… payroll finalized").
- **Delete** removes a draft run after you confirm in **Delete draft payroll run**. Its payslips are removed and it cannot be undone ("Draft run removed").

Pay a payslip

1. Open the **Payslips** tab.
2. On the payslip's row, choose **Mark paid**. A message confirms who was paid and for which month.
3. Open a payslip to view it.

Open Payroll (/payroll)

Staff Management

Staff records, leave requests, salary, attendance, documents and logins.

Available by default to: School administrator, Principal. Schools can change this under Roles & Permissions.

All articles online

Request leave and approve staff leave

Staff request leave; people who manage staff approve or reject pending requests.

Menu: Human Resources → Staff Management | Address: /staff | Checked against the application

Online version

Use this to ask for leave, or to decide on leave that staff have asked for.

Request leave

1. Open **Staff Management** from the menu and select the **Leave Requests** tab.
2. Select **Request leave**. People who manage staff see **New leave request** instead, and can record leave for any staff member.
3. In **New leave request**, choose the **Type**: **Sick leave**, **Casual leave**, **Earned leave** or **Unpaid leave**.
4. Set **From** and **To**, and type a **Reason**.
5. Select **Submit request**.

A "Leave request created" message appears. A request you make for yourself goes to HR for approval.

The checks are "Select a staff member", "Start date is required", "End date is required" and "Reason is required".

> **Note:** If your login is not linked to a staff record, the screen tells you to ask an administrator to link it, and **Submit request** stays off.

Approve or reject

People who can manage staff see **Approve** and **Reject** on each request whose status is pending. Choosing one updates the request and shows a message with the staff member's name and the new status.

Open Staff Management (/staff)

Add a staff member, promote them or record a resignation

Online version

Onboard a new member of staff, change their designation, record that they have left, or reactivate them.

Menu: Human Resources → Staff Management | Address: /staff | Checked against the application

Add a staff member

1. Open **Staff Management** from the menu. The page is headed **Staff management**; stay on the **Staff** tab.
2. Select **New joining**. The dialog says "Onboard a new staff member."
3. Choose the **Branch**, then enter the **First name**, **Last name**, **Date of birth** and **Gender**.
4. Choose the **Designation** and enter the **Department**.
5. Enter the **Phone**, **Email** and **Address**.
6. Select **Add staff member** ("Staff member added").

All fields are required: "Select a branch", "First name is required", "Last name is required", "Date of birth is required", "Department is required", "Phone is required", "Email is required" (or "Enter a valid email") and "Address is required".

Adding a staff member does not give them a login. Create one in Add a user and manage their account, then link it from the **Login** tab of the staff profile (administrators).

Promote

On the staff member's row, open the actions menu and choose **Promote**. Choose the **New designation**, set the **Effective date** (required) and optional **Remarks**, and select **Promote** ("… promoted").

Record a resignation or reactivate

- Choose **Record resignation**, enter the **Last working date** and a **Reason** (both required) and select **Confirm resignation** ("… marked as resigned").
- For someone who has resigned, **Reactivate** brings them back ("… reactivated").

The staff profile

View profile opens tabs for **Overview**, **Qualifications & Experience**, **Salary**, **Attendance**, **Performance** and **Documents**.

Open Staff Management (/staff)

See and manage login accounts for staff, teachers and students

Online version

Check who has a linked sign-in account, filter the lists by it, and send a temporary password to someone who is locked out.

Menu: Human Resources → Staff Management | Address: /staff | Checked against the application

A staff member, teacher or student can only sign in once they have a login account linked to their record. The **Staff**, **Teachers** and **Students** lists show whether that has happened.

Check the login account

1. Open **Staff Management**, **Teachers** or **Students** from the menu.
2. Look at the **Login account** column. It shows **Account linked** or **Not linked**.
3. Use the **Filter by login account** control to show **All login accounts**, only the linked, or only the **Not linked**.

Someone who is **Not linked** cannot sign in. Open their profile and use its **Login** (staff) or **Logins** (student) tab to create the account, or add them from **User Management** (Add a user).

Email or mobile number

The email address and the mobile number on the form are both optional, but a login needs at least one of them. A person can then sign in with their password or with a one-time code sent to that email or mobile number (Sign in with a one-time code). If the email or mobile number is already used by another login, the form says which field is taken.

Reset a password

1. On the person's row, open the actions menu and select **Reset password**. It is offered only for a linked account that has an email, and only to people allowed to reset passwords.
2. Confirm **Reset password?**. The message explains that the person will be emailed a temporary password and signed out everywhere.
3. A "Password reset for {name}. A temporary password has been emailed." message appears.

They choose a new password when they next sign in (Sign in with a temporary password). If it fails, "Could not reset password" appears with the reason.

> **Note:** The temporary password goes to the person's email, not to you. If the account has no email, add one first.

Work with a staff member's profile

Record qualifications and experience, set a salary structure, log a salary payment, add performance reviews and upload documents.

Menu: Human Resources → Staff Management | Address: /staff | Checked against the application

Online version

Open **Staff Management**, choose **View profile** on the person's row, then the tab you need. Teachers have a similar profile under **Teachers**.

Qualifications & Experience

- Under **Qualifications**, select **Add**. Enter the **Degree**, **Institution** and **Year completed** (all required), then **Add** ("Qualification added").
- Under **Experience**, select **Add**. Enter the **Organization**, **Role** and **From year**; **To year** and **Description** are optional. Then **Add** ("Experience added").
- Each entry has a remove button ("Qualification removed", "Experience removed").

Salary

- Under **Salary structure**, enter the **Basic**, **Allowances** and **Deductions**, and the **Bank name** and **Account number**. Select **Save salary structure** ("Salary structure saved"). The button stays off until you change something.
- **Payment history** lists payments. The button **Record this month's payment** records it ("Payment recorded"); once paid it reads **Paid this month**. For a whole month at once, use Run monthly payroll.

Performance

Under **Performance reviews**, select **Add review**. Enter the **Reviewer**, a **Rating** and **Comments** (the reviewer and comments are required), then **Add review** ("Performance review added").

Attendance and Documents

The **Attendance** tab shows the person's attendance. On **Documents**, select to upload a file ("Document uploaded"); the remove button deletes it ("Document removed").

Open Staff Management (/staff)

Finance

Accounting

Chart of accounts, journal, trial balance, profit and loss, and GST.

Available by default to: School administrator, Principal, Accountant. Schools can change this under Roles & Permissions.

All articles online

Online version

Add accounts and post a journal entry

Create ledger accounts, record a balanced journal entry as a draft, and post it to the ledger.

Menu: Finance → Accounting | Address: /accounting | Checked against the application

Add an account

1. Open **Accounting** from the menu and stay on the **Chart of Accounts** tab.
2. Select **Add account**.
3. Enter the **Code**, **Name** and **Type**: Asset, Liability, Equity, Income or Expense. A **Description** is optional.
4. Select **Create account** ("Account created"). The checks are "Account code is required" and "Account name is required".

Create a journal entry

1. Open the **Journal** tab and select **New entry**. The dialog says every entry is created as a draft.
2. Set the **Date** and an optional **Reference**, and write the **Narration** (required).
3. Under **Lines**, choose an account for each line and enter either a **Debit** or a **Credit** amount. Use **Add line** for more. At least two lines are needed ("Add at least two lines").
4. Watch the total at the bottom. It reads **Balanced** when debits equal credits and **Not balanced** otherwise.
5. If GST applies, fill in the **Tax amount**.

6 Select **Save as draft** ("Journal entry saved as draft").

Post it

On the entry's row, choose **Post to ledger**. A message such as "… posted to the ledger" confirms it. Posted entries count in the **Trial Balance**, **Profit & Loss** and **GST** tabs.

> **Warning:** A posted entry can no longer be edited or deleted, because it is part of the books. To correct a mistake, post a new correcting entry. Only draft entries can be deleted.

Open Accounting (/accounting)

Fee Management

Fee structures, discounts, student invoices, receipts and refunds.

Available by default to: School administrator, Principal, Accountant. Schools can change this under Roles & Permissions.

All articles online

Online version

Generate fee invoices for a term

Create invoices in bulk for every student covered by a fee structure.

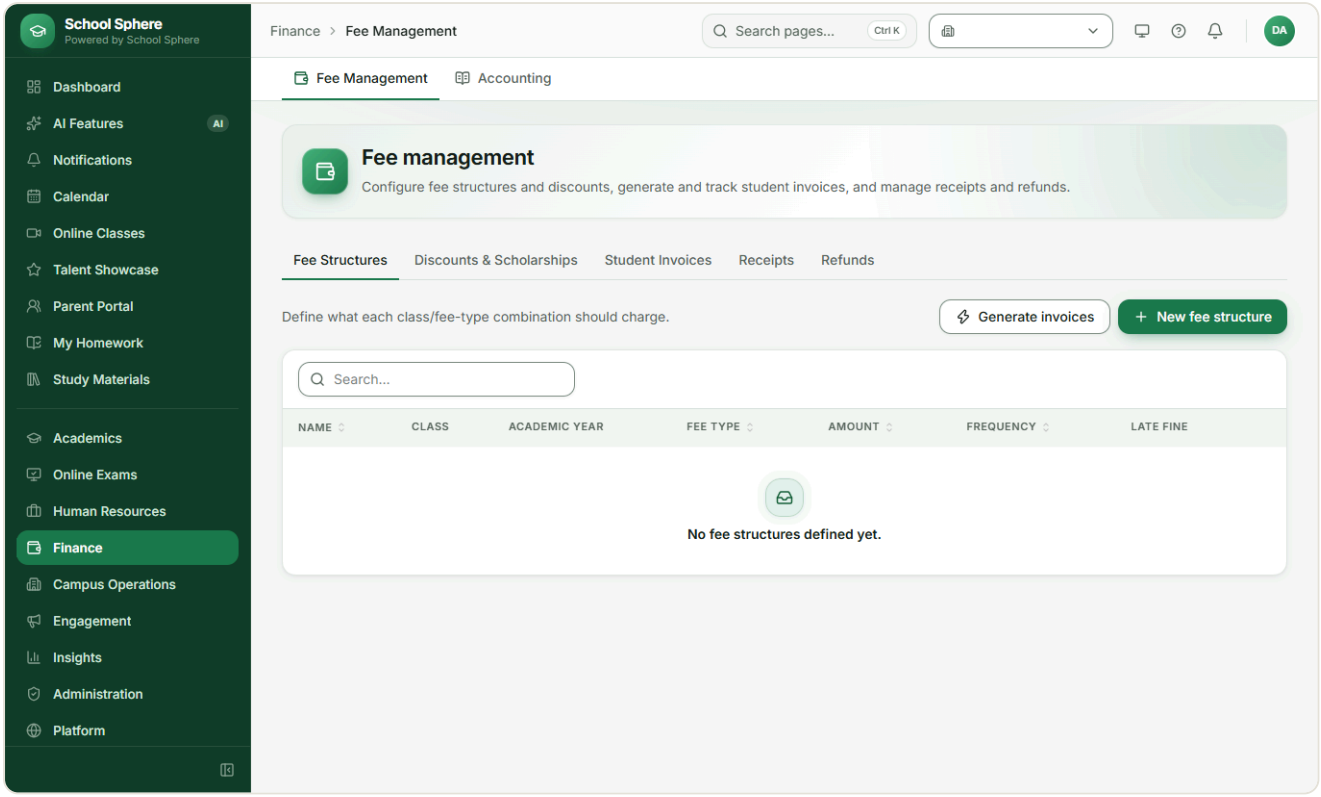

Menu: Finance → Fee Management | Address: /fees | Checked against the application

Use this to bill a whole class, or the whole school, for a term in one go.

Before you start

- A fee structure must exist on the **Fee Structures** tab. Invoices are created from it.
- Have the academic year, the term and the due date decided.

Steps

Fee management on the Fee Structures tab, with Generate invoices at the top right.

1. Open **Fee Management** from the menu. The page is headed **Fee management**.
2. On the **Fee Structures** tab, select **Generate invoices**.
3. Choose the **Fee structure**, **Academic year** and **Term**, and set the **Due date**. All four are required.
4. Select **Generate invoices**.

The dialog explains that invoices are created for every active student covered by the fee structure: the structure's class, or all students if the structure has no class.

A message tells you how many invoices were generated, and how many already existed. If every student already has an invoice for that term, you see "No new invoices generated — they already exist for this term".

Field	What is checked
Fee structure	Shows "Select a fee structure".
Academic year	Shows "Select an academic year".
Term	Shows "Select a term".
Due date	Shows "Due date is required".

> **Note:** If it fails, the message shown is the server's, or "Could not generate invoices".

Open Fee Management (/fees)

Record a fee payment

Record a payment against a student's invoice and generate a receipt.

Menu: Finance → Fee Management | Address: /fees | Checked against the application

Online version

Use this when a student's family pays, to record it and produce a receipt.

Steps

1. Open **Fee Management** and select the **Student Invoices** tab.
2. Find the invoice. You can filter by class and by status.
3. Open the actions menu on the invoice row and choose **Record payment**. This option is not shown once the invoice is paid.
4. The dialog shows the term, the fee type and the **Balance due**. Choose the **Payment mode**: **Cash**, **Card**, **Online** or **Cheque**.
5. Enter the **Amount**. It must be greater than zero.
6. Select **Record payment**.

A "Payment recorded and receipt generated" message appears. The receipt is on the **Receipts** tab.

Other actions on an invoice

Action	When it is offered
Apply discount	Always. A "Discount applied" message confirms it.
Generate installments	When the fee is not one-time, has no installments yet, and is not paid.
Refund	When something has been paid. It submits a refund request ("Refund request submitted"); see the **Refunds** tab.

> **Note:** If a payment cannot be recorded, the message is the server's, or "Could not record payment".

Open Fee Management (/fees)

Set up fee structures and discounts, and handle refunds and receipts

Define what is charged, create discounts and scholarships, process refund requests and view receipts.

Online version

Menu: Finance → Fee Management | Address: /fees | Checked against the application

Create a fee structure

1. Open **Fee Management** and stay on the **Fee Structures** tab. Select **New fee structure**.
2. Enter a **Name** and choose the **Academic year**. Choose a **Class** if the fee applies to one class only; leave it empty for all students.
3. Choose the **Fee type**: Tuition, Bus, Hostel, Library, Exam or Miscellaneous.
4. Choose the **Frequency**: One time, Monthly, Term-wise or Annual, and enter the **Amount (per cycle)**.
5. Optionally set a **Flat late fine** and a **Per-day late fine**.
6. Select **Create structure** ("Fee structure created").

The checks are "Name is required", "Select an academic year" and "Amount must be greater than zero". A structure can be edited ("Fee structure updated") or deleted ("Fee structure deleted") from its row. Then follow Generate fee invoices for a term.

Create a discount or scholarship

1. Open the **Discounts & Scholarships** tab and select **New discount**.
2. Enter a **Name**, choose the **Type** (**Percentage** or **Flat amount**) and the **Value** (greater than zero).
3. Under **Applies to**, choose all students or specific students, and pick the **Students** if specific.
4. Select **Create discount** ("Discount created").

To use a discount on one invoice, choose **Apply discount** on the invoice; see Record a fee payment.

Refunds

A refund is requested from an invoice that has a payment (**Refund**, then **Submit refund request**, with the **Amount** and a **Reason**). On the **Refunds** tab, choose **Mark processed** on a request once the money has been returned ("Refund marked as processed").

Receipts

Open the **Receipts** tab and choose **View** on a receipt to see it.

Open Fee Management (/fees)

Add and collect previous dues

Record old balances from earlier years or from before the school used School Sphere, then collect payments against them.

Online version

Menu: Finance → Fee Management | Address: /fees | Checked against the application

Use this when students owe money from an earlier year, or from before your school started using School Sphere, and you want those balances tracked and collected alongside normal fees.

Add previous dues

1. Open **Fee Management** and choose the **Previous dues** tab. It reads "Old balances from earlier years, or from before your school used SchoolSphere", followed by the number of records.
2. Select **Add previous dues**.
3. Type a **Name of these dues**, for example `2023–24 balance`. The name groups the entries; adding the same name for a student twice is skipped.
4. Set the **Due date**.
5. Under **Add a student**, search by name or admission number and pick each student. Type the **Amount** due for every student. Select **Remove** to drop one.
6. Check the summary line ("N student(s), total ...") and select **Add previous dues**.

A message such as "3 previous dues added" or "2 added, 1 skipped (already recorded under this name)" confirms the result.

Errors you may see: "Enter a name for these dues", "Due date is required", "Add at least one student", and "Enter an amount greater than zero for every student".

Collect a payment

On the **Previous dues** tab the list shows each student, the **Dues from** name, **Amount**, **Due date** and **Status**. Select **Record payment** on a row, enter the payment, and confirm. "Payment recorded and receipt generated" appears and the row shows how much is paid. The receipt is also listed under **Receipts**.

Open Fee Management (/fees)

Campus Operations

Health & Medical

Health records, checkups, vaccinations, infirmary visits and reports.

Available by default to: School administrator, Principal. Schools can change this under Roles & Permissions.

All articles online

Online version

Record a checkup, a vaccination or an infirmary visit

Log a student's health checkup, schedule and complete vaccinations, and record infirmary visits.

Menu: Campus Operations → Health & Medical | Address: /health | Checked against the application

Health records contain sensitive information about students. Only record what your school's policy asks for.

Record a checkup

1. Open **Health & Medical** from the menu and open the **Checkups** tab.
2. Select **Record checkup**.
3. Choose the **Student**, set the **Checkup date**, and enter **Height (cm)** and **Weight (kg)**.
4. Enter **Vision (left eye)** and **Vision (right eye)**. Dental remarks, general remarks and **Examined by** are optional.
5. Select **Save checkup** ("Checkup recorded").

Height must be 30 to 250 cm and weight 5 to 200 kg, otherwise you see "Enter a valid height" or "Enter a valid weight".

Schedule and complete a vaccination

1. Open the **Vaccinations** tab and select **Schedule vaccination**.

2. Choose the **Student**, enter the **Vaccine name** and **Dose number** (at least 1), and set the **Due date**.
3. Select **Schedule vaccination** ("Vaccination scheduled").
4. When it is given, choose **Mark administered** on its row, complete **Mark as administered** and confirm ("Marked as administered").

Log an infirmary visit

1. Open the **Infirmary Visits** tab and select **Log visit**.
2. Choose the **Student** and set the **Visit date/time**.
3. Describe the **Symptoms** and the **Treatment given**. **Temperature °C** (30 to 45), **Medicine given** and **Attended by** are optional.
4. Choose the **Outcome** and select **Log visit** ("Infirmary visit logged").

The checks are "Describe the symptoms" and "Describe the treatment given".

Reports

The **Reports** tab shows **Overdue vaccinations** (past their due date with no dose administered, so you can follow up with these families), **Upcoming vaccinations**, **Infirmary visit outcomes** and **BMI distribution** (based on each student's most recent checkup).

Open Health & Medical (/health)

Hostel

Hostels and rooms, student allocation, visitor register, attendance, fees and the mess menu.

Available by default to: School administrator, Principal. Schools can change this under Roles & Permissions.

All articles online

Online version

Add a hostel and allocate a student to a room

Create a hostel, then give a student a room and bed.

Menu: Campus Operations → Hostel | Address: /hostel | Checked against the application

Use this to set up a hostel and place students in it.

Add a hostel

1. Open **Hostel** from the menu. The page is headed **Hostel management**; stay on the **Hostels & Rooms** tab.
2. Select **New hostel**.

3. Enter the **Hostel name**, choose the **Type** (boys, girls or co-ed) and the **Status** (active or inactive).
4. Optionally choose the **Warden** and enter an **Address**. The warden list shows only staff with the designation "Warden" who are not already assigned elsewhere.
5. Select **Create hostel** ("Hostel created"). "Hostel name is required" appears if the name is empty.

Rooms and beds are managed from the hostel's row on the same tab.

Allocate a student

1. Open the **Student Allocation** tab and select **Allocate student**.
2. Choose the **Student**, the **Hostel** and the **Room**. Only rooms with a free bed are offered. A **Monthly fee** is optional.
3. Select **Allocate** ("Student allocated"). The checks are "Select a student", "Select a hostel" and "Select a room".

Vacate or remove an allocation

On the allocation's row, **Vacate** ends it ("Allocation vacated"). **Remove** deletes the record after you confirm; it cannot be undone.

Open Hostel (/hostel)

Hostel attendance, visitors, fees and the mess menu

Take hostel attendance, log hostel visitors, generate and collect hostel fees, and edit the weekly mess menu.

Online version

Menu: Campus Operations → Hostel | Address: /hostel | Checked against the application

All of these are tabs on the **Hostel** page (**Hostel management**).

Hostel attendance

1. Open the **Hostel Attendance** tab.
2. Choose the **Hostel** and the **Date**.
3. Use **Mark all present**, then change the exceptions.
4. Select **Save attendance** ("Hostel attendance saved").

Visitor register

1. Open the **Visitor Register** tab and select **Check in visitor**. The dialog logs a visitor against the resident student they are here to see.
2. Choose the **Hostel** and the **Resident student**, then enter the **Visitor name**, **Relation** and **Phone**. **Purpose** is optional.
3. Select **Check in** ("Visitor checked in").
4. When they leave, choose **Check out** on their row ("Visitor checked out").

The checks are "Select a hostel", "Select a student", "Visitor name is required", "Relation is required" and "Phone number is required".

Hostel fees

1. Open the **Hostel Fees** tab, choose the **Month**, and select **Generate for month**. A message says how many fee records were generated, or that every active allocation already has one.
2. When a fee is paid, choose **Mark paid** on its row ("Payment marked paid").

Mess menu

1. Open the **Mess Menu** tab and choose the **Hostel**.
2. Select a day and meal in the grid. The dialog is titled with the day and meal, and says to edit the menu items served for this meal.
3. Enter the **Menu items** ("Enter at least one menu item") and select **Save** ("Menu updated").

Open Hostel (/hostel)

Inventory

Items, stock transactions, vendors and categories, and reports.

Available by default to: School administrator. Schools can change this under Roles & Permissions.

All articles online

Record stock coming in, going out and adjustments

Record received stock, issue items to a department or class, and correct stock levels.

Menu: Campus Operations → Inventory | Address: /inventory | Checked against the application

Online version

Use this to keep the inventory counts right.

Before you start

Add the item on the **Items** tab (**Item created**) and, if you want to name a supplier, a vendor on **Vendors & Categories**.

Record stock received

1. Open **Inventory** from the menu. The page is headed **Inventory management**.
2. Open the **Stock Transactions** tab and select **Stock in**.
3. Choose the **Item**, then enter the **Quantity** and **Unit cost**. A **Vendor** and a **Reference** are optional.
4. Set the **Date**, then select **Record stock in** ("Stock in recorded").

The dialog describes this as newly received stock: a purchase, donation or restock.

Issue stock

1. On the same tab, select **Issue stock**.
2. Choose the **Item**, enter the **Quantity** and **Issued to**, and optionally a **Purpose**. Set the **Date**.
3. Select **Issue stock** in the dialog. A "Stock issued" message appears.

Adjust stock

Select **Adjust stock** to correct a count. An "Adjustment recorded" message confirms it.

Field	What is checked
Item	"Select an item".
Quantity	"Quantity must be greater than zero".
Unit cost	"Cost can't be negative".
Issued to	"Enter who this is issued to".
Date	"Date is required".

Reports

The **Reports** tab shows a **Low stock alert** (items at or below their reorder level) and **Valuation by category** (current stock value).

Open Inventory (/inventory)

Library

Books, authors, members, issue and return, fines and reservations.

Available by default to: School administrator, Principal, Teacher, Librarian. Schools can change this under Roles & Permissions.

All articles online

Online version

Issue and return library books

Lend a book to a library member, and record its return.

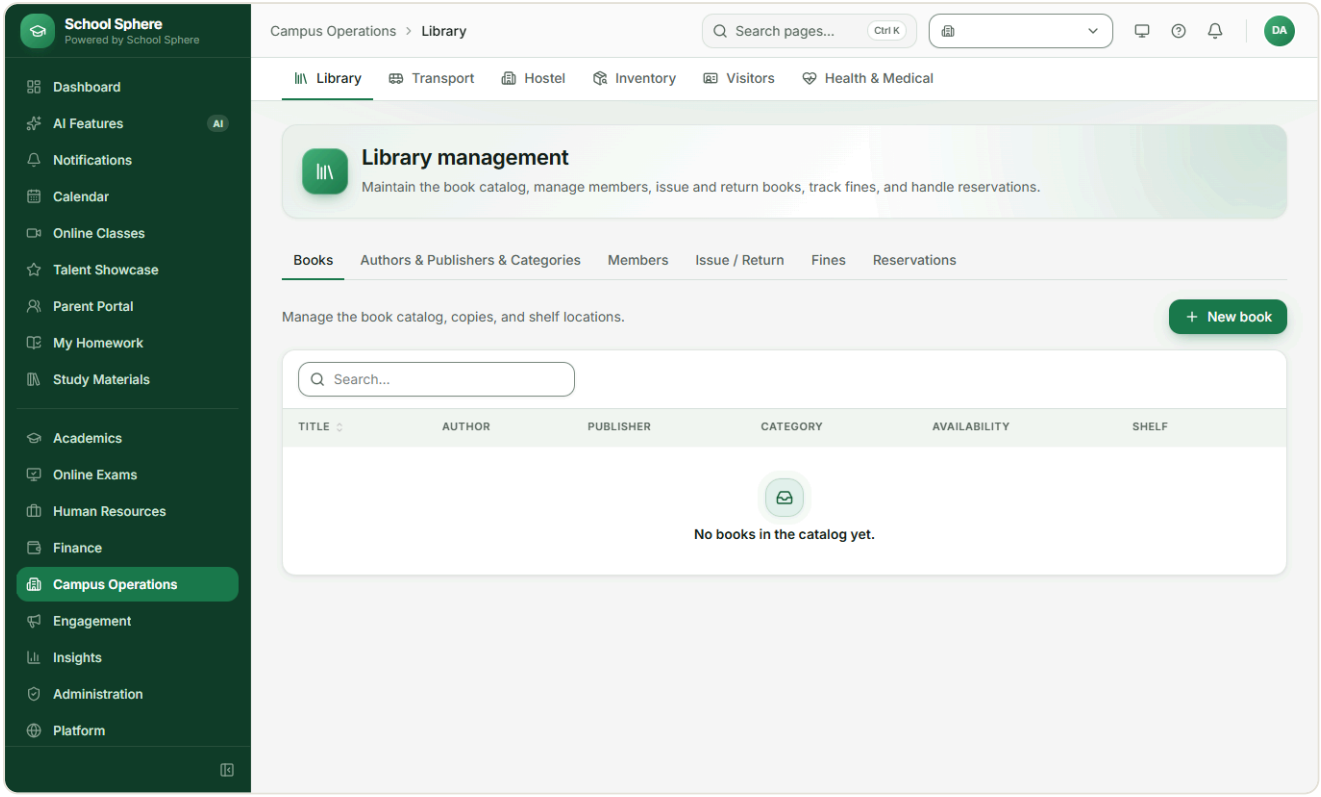

Menu: Campus Operations → Library | Address: /library | Checked against the application

Use this when a member borrows or returns a book.

Before you start

- The book must be in the catalog and available, and the person must be an active library member. See Add a book and a library member.

Issue a book

Library management and its tabs.

1. Open **Library** from the menu. The page is headed **Library management**.
2. Open the **Issue / Return** tab and select **Issue book**.
3. Choose the **Book** and the **Member**, and set the **Due date**. All three are required.
4. Select **Issue book**.

A "Book issued" message appears. The checks are "Select a book", "Select a member" and "Due date is required".

Return a book

1. On the **Issue / Return** tab, find the loan and select **Return**.
2. Confirm **Return book** with **Mark returned**.

A "Book returned" message appears. When the return is late, it reads "Book returned — fine of … applies"; fines are computed automatically and appear on the **Fines** tab.

Open Library (/library)

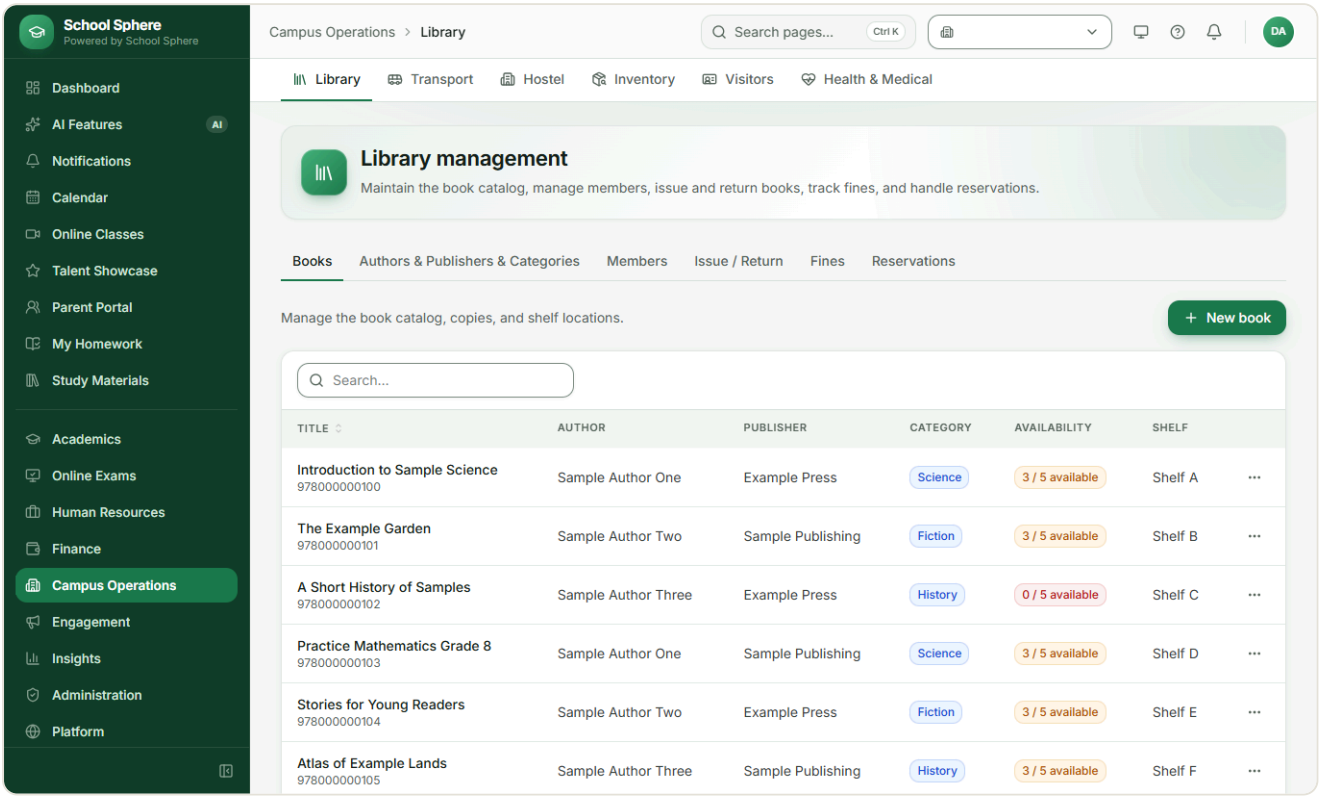

Add a book and a library member

Add a book to the catalog, and register a student or staff member as a library member.

Menu: Campus Operations → Library | Address: /library | Checked against the application

Online version

Add a book

The Books tab.

1. Open **Library** and stay on the **Books** tab.
2. Select **New book**.
3. Enter the **Title**, the **ISBN** (at least 6 characters) and the **Total copies** (at least one).
4. Choose the **Author**, **Publisher** and **Category**. If one is missing, add it first on the **Authors & Publishers & Categories** tab.
5. Optionally enter the **Shelf location** and a **Note**.
6. Select **Create book**.

A "Book added to catalog" message appears. The checks are "Title is required", "ISBN must be at least 6 characters", "Select an author", "Select a publisher", "Select a category" and "Must have at least one copy".

Add a library member

1. Open the **Members** tab and select **New member**.

2. In **New library member**, choose the **Person type** (student or staff), then the person.
3. Set the **Status**: active or suspended.
4. Select **Add member**.

A "Member added" message appears. "Select a person" is shown if you skip the person.

Open Library (/library)

Collect library fines and manage reservations

Mark a fine as paid, reserve a book that has no copies left, and fulfil or cancel a reservation.

Menu: Campus Operations → Library | Address: /library | Checked against the application

Online version

Library fines

Fines are worked out automatically when a late book is returned; see Issue and return library books. Open the **Fines** tab to see them. On a fine's row, select **Mark paid** once it is settled ("Fine marked as paid").

Reserve a book

Reservations are only for books with no copies currently available.

1. Open the **Reservations** tab and select **Reserve book**.
2. Choose the **Book** and the **Member** ("Select a book", "Select a member").
3. Select **Reserve** ("Reservation placed").

Fulfil or cancel a reservation

On the reservation's row:

- **Fulfill** (available once a copy is back) asks you to confirm **Fulfill reservation** with **Fulfill & issue**. A message says the book was issued to the member.
- **Cancel** asks you to confirm with **Cancel reservation**. The member must place a new reservation if they still want the title ("Reservation cancelled").

Open Library (/library)

Transport

Routes and stops, buses, drivers, student assignments, live bus tracking, tracking setup and the driver's trip.

Available by default to: School administrator, Principal. Schools can change this under Roles & Permissions.

All articles online

Add buses and drivers, and choose how buses are tracked

Register buses and drivers, then choose whether parents see a demo, the driver's phone or a hardware GPS tracker.

Online version

Menu: Campus Operations → Transport | Address: /transport | Checked against the application

Use this to set up the fleet. You need the transport permission that lets you manage transport; without it, the page tells you to ask an administrator for **Manage transport** or **Drive a bus trip**.

Add a bus

1. Open **Transport** from the menu. The page is headed **Transport management**.
2. Open the **Buses** tab and select **New bus**.
3. Enter the **Registration number**, **Model**, **Seating capacity** and **Manufacture year**. A **GPS device ID** is optional.
4. Set the **Status**: Active, Maintenance or Inactive.
5. Select **Add bus** ("Bus added").

The checks are "Registration number is required", "Model is required" and "Must seat at least one".

Add a driver

1. Add the person in **Staff Management** with the designation "Driver". The driver form lists only eligible staff and says so when there are none.
2. Open the **Drivers** tab and select **New driver**.
3. Choose the **Staff member**, and enter the **License number**, **License expiry** and **Experience (years)**.
4. Set the **Status**: Active, On leave or Inactive, and select **Add driver**.

Choose how parents see the bus

1. Open the **Tracking setup** tab. It asks **How should parents see the bus?**
2. Choose one of the three options:
   - **Demo (simulated)**: no real GPS; buses move along their route when staff simulate a GPS ping. Use it for demos and training.
   - **Driver's phone**: the driver shares their phone's location during a trip. See Share a bus's location from a driver's phone.
   - **Hardware GPS tracker per bus**: a device in each bus sends its location. Enter the device ID against each bus.
3. Select **Save**. The current choice is marked **Current**, and "Tracking source saved" appears.

Open Transport (/transport)

Share a bus's location from a driver's phone

A driver starts a trip so parents can see the bus.

Menu: Campus Operations → Transport | Address: /transport | Checked against the application

Online version

Use this when the school tracks buses with **Driver's phone**.

Before you start

- You need a School Sphere login with the **Drive a bus trip** permission, linked to your staff record, and a bus assigned to you. Otherwise the page says "No bus is assigned to you" and asks you to contact the school office.
- Your device must be able to share location. If not, the page says "This device or browser cannot share location."

Steps

1. Open **Transport** and select the **Driver trip** tab.
2. Choose your bus in **Select your bus**.
3. Allow location access when your phone asks.
4. Select **Start trip**. A **Sharing location** badge appears.
5. Keep the page open and the screen on while you drive.
6. When you finish, select **End trip**.

> **Note:** If the school is not using driver phones for tracking, the page says parents will not see this location. An administrator can change that under **Tracking setup**.

Open Transport (/transport)

Visitors

Visitor log, pre-approved visits, watchlist and reports.

Available by default to: School administrator, Principal, Receptionist. Schools can change this under Roles & Permissions.

All articles online

Check a visitor in and out

Record a visitor at the front desk, issue a badge, and check them out when they leave.

Menu: Campus Operations → Visitors | Address: /visitors | Checked against the application

Online version

Use this at the front desk to log everyone who visits the school.

Check in

1. Open **Visitors** from the menu. The page is headed **Visitor Management**; stay on the **Visitor Log** tab.
2. Select **Check in visitor**.
3. Enter the **Visitor name** and **Phone**.
4. Optionally add the **ID proof type** and **ID proof number**.
5. Choose the **Purpose of visit**, and add **Notes** if useful.
6. Under **Here to see**, choose a student, a staff member, or somewhere else. Then pick the person, or describe the place in **Where / department**.
7. Select **Check in**.

The dialog says this issues a badge number and starts the visit. A message shows the visitor's name and badge number.

The checks are "Visitor name is required", "Phone number is required", "Select who they're visiting" and "Describe who or where they're visiting".

Check out

On the visitor's row, open the actions menu and choose **Check out**. A message confirms it. **Delete** removes an entry from the log.

Other tabs

Pre-Approved Visits holds scheduled appointments, **Watchlist** the security watchlist, and **Reports** the visitor reports.

Open Visitors (/visitors)

Schedule a pre-approved visit and manage the watchlist

Online version

Schedule an expected visitor so the front desk can check them in on arrival, and keep a security watchlist.

Menu: Campus Operations → Visitors | Address: /visitors | Checked against the application

Schedule a pre-approved visit

1. Open **Visitors** and select the **Pre-Approved Visits** tab, then **Schedule visit**. The dialog says the front desk can check the visitor in on arrival against this appointment.
2. Enter the **Visitor name** and **Phone**, choose the **Purpose**, and set **Scheduled for**.
3. Under **Here to see**, choose a student, a staff member or somewhere else, and pick who or where. **Notes** are optional.
4. Select **Schedule visit** ("Visit scheduled").

The checks are "Visitor name is required", "Phone number is required" and "Scheduled date/time is required".

When the visitor arrives, choose **Check in now** on the visit ("… checked in — badge …"). A visit can also be cancelled ("Visit cancelled") or deleted ("Pre-approval deleted"). For a visitor who has no appointment, see Check a visitor in and out.

Watchlist

1. Open the **Watchlist** tab and select **Add to watchlist**. The dialog says the front desk sees a warning if this name is entered during check-in.
2. Enter the **Name** and a **Reason** (both required: "Name is required", "Reason is required"). **Phone** is optional.
3. Select **Add to watchlist** ("Added to watchlist").

To take someone off, choose the remove option on their row and confirm **Remove from watchlist** ("Removed from watchlist").

The **Reports** tab shows **Visits by purpose** and **Most-visited hosts**.

Open Visitors (/visitors)

Engagement

Certificates

Generate certificates and keep the list of those issued.

Available by default to: School administrator, Principal. Schools can change this under Roles & Permissions.

All articles online

Online version

Generate a certificate

Create a bonafide, transfer, character, study, achievement or staff service certificate.

Menu: Engagement → Certificates | Address: /certificates | Checked against the application

Use this to produce a certificate for a student or staff member.

Steps

1. Open **Certificates** from the menu. The page is headed **Certificate generator**; stay on the **Generate** tab.
2. Choose the **Certificate type**: **Bonafide Certificate**, **Transfer Certificate**, **Character Certificate**, **Study Certificate**, **Achievement Certificate** or **Staff Service Certificate**.
3. Choose the **Student** (or the **Staff member** for a staff service certificate).
4. Fill in what the type needs:
   - **Purpose** is optional, for example for a passport application.
   - **Study Certificate**: **From** and **To** dates are required.
   - **Achievement Certificate**: **Event**, **Achievement** and **Event date** are required.
5. Select **Generate certificate**.

A message shows the new certificate number. The checks include "Start date is required", "End date is required", "Event name is required", "Achievement is required" and "Event date is required".

Past certificates are on the **Issued Certificates** tab.

Open Certificates (/certificates)

Communication Center

Compose messages, manage templates and groups, and review history.

Available by default to: School administrator, Principal. Schools can change this under Roles & Permissions.

All articles online

Online version

Send or schedule a message

Write a message, choose channels and recipients, and send it now or later.

Menu: Engagement → Communication Center | Address: /communication | Checked against the application

Use this to message parents, students, staff or groups.

Steps

1. Open **Communication Center** from the menu. The page is headed **Communication center**; stay on the **Compose** tab.
2. Optionally choose **Start from a template**.
3. Add a **Subject** if the message goes by email, then write the **Message**.
4. Under **Channels**, choose at least one: **Email**, **SMS**, **Push**, **WhatsApp** or **In-app**.
5. Under **Recipients**, choose **Groups**, **Individual students** or **Individual staff**.
6. To send later, set **Schedule for later**.
7. Select **Send now** (or **Schedule message** when a time is set).

A "Message sent" or "Message scheduled" message appears. The checks are "Message body is required" and "Select at least one channel".

> **Important:** Email, SMS and WhatsApp messages leave School Sphere only through providers your administrator has connected, and WhatsApp only reaches people who opted in. If a channel is not set up, the delivery is recorded as skipped. See Connect providers and manage consent and check results in the Delivery log.

Use **History** to see sent and scheduled messages, and **Templates** and **Groups** to prepare reusable text and recipient lists.

Open Communication Center (/communication)

Track deliveries and message usage

See every message sent, who got it, whether it arrived and what it cost, and export the list.

Online version

Menu: Engagement → Communication Center | Address: /communication | Checked against the application

Two tabs of **Communication Center** show what happened after you sent a message.

Delivery log

1. Open **Communication Center** and select **Delivery log**.
2. Narrow the list with the filters: **From** and **To** dates, **All channels**, **All statuses**, **Event, e.g. fee.reminder**, and **Recipient name, phone or email**.
3. Read each row: **When**, **Recipient**, **Channel**, **Event**, **Status**, **Provider**, **Tries** and **Cost**. A row marked **fallback** was sent because an earlier channel failed. A row marked **Broadcast** came from a message you composed.
4. Use **Previous** and **Next** to move through the pages. The total appears as "{n} deliveries".
5. Select **Export CSV** to download the filtered list, or **Print**.

What the statuses mean

Status	Meaning
queued, sending	Waiting to go out or being handed to the provider.
sent	The provider accepted it.
delivered, read	The provider confirmed it reached the phone or inbox (and, for WhatsApp, was opened).
failed, bounced	It did not arrive. A bounced address is not tried again.
skipped	It was not attempted: the person opted out, there was no provider or approved template, or no contact detail. The reason is recorded.
standby	A fallback channel waiting in case the earlier channels fail. It costs nothing unless it is released.

Usage

1. Select the **Usage** tab and choose a **From** and **To** date.
2. Read the totals: **Messages attempted**, **Delivered**, **Failed or bounced**, **Skipped** and **Estimated cost**.
3. Use **By day** and the **Channel** and **Provider** breakdowns to see where the volume and cost come from.

The cost is an estimate from the price per message you entered in **Settings**, so it may differ from your provider's invoice.

> **Note:** If a message you expected is missing, check its status in the **Delivery log** first. "Skipped" with a reason usually points to consent, a missing template or an unconnected provider; see Connect providers and manage consent.

Help Desk

Tickets for complaints and requests: raise, handle and report.

Available by default to: School administrator, Principal, Receptionist. Schools can change this under Roles & Permissions.

All articles online

Online version

Raise a help desk ticket

Log a complaint or support request so it can be assigned and tracked to resolution.

Menu: Engagement → Help Desk | Address: /helpdesk | Checked against the application

Use this to record a complaint or support request.

Steps

1. Open **Help Desk** from the menu. The page is headed **Complaint / Help Desk**.
2. Open the **Raise a Ticket** tab. The card is titled **Raise a ticket**.
3. Choose the **Category** and the **Priority**: **Urgent**, **High**, **Medium** or **Low**.
4. Enter a **Subject** (a short summary) and a **Description** (what happened, and any details).
5. Under **Raised by**, choose who is raising it: student, parent, staff or anonymous. Then pick the student or staff member, or enter the **Parent/guardian name** and an optional **Contact**.
6. Select **Raise ticket**.

A message such as "Ticket … raised" shows the new ticket number. The checks are "Subject is required" and "Description is required".

Track and update tickets on the **Tickets** tab; **Reports** summarises them.

Reports

The **Reports** tab shows **Overdue tickets** (open or in-progress tickets past their priority's SLA window), **Tickets by category** and **Tickets by priority**.

Open Help Desk (/helpdesk)

Surveys & Feedback

Create surveys, record responses and see reports.

Available by default to: School administrator, Principal. Schools can change this under Roles & Permissions.

All articles online

Online version

Create, publish and record responses to a survey

Build a survey, publish it, record responses and review the results.

Menu: Engagement → Surveys & Feedback | Address: /surveys | Checked against the application

Create a survey

1. Open **Surveys & Feedback** from the menu and stay on the **Surveys** tab.
2. Select **New survey**.
3. Enter a **Title** and, if you like, a **Description**.
4. Choose the **Audience**: **Students**, **Parents**, **Staff** or **Everyone**. **Created by** is optional.
5. Set when it **Opens** (required) and optionally when it **Closes**.
6. Select **Add question** and write each question. Choose its type: **Rating (1–5)**, **Multiple choice**, **Yes / No** or **Open text**, and whether it is required. Multiple choice questions need options.
7. Select **Save as draft**.

A message says the survey was saved as a draft. The checks are "Title is required", "Open date is required", "Question text is required" and "Add at least one question".

Publish, close or delete

On the survey's row, open the actions menu. **Publish** is offered for a draft ("Survey published"), **Close** for a published survey ("Survey closed"), **View results** shows the results, and **Delete** removes it ("Survey deleted").

Record a response

1. Open the **Record a Response** tab and choose the **Survey**.
2. Choose the **Respondent**: **A student**, **A parent / guardian** or **A staff member**, then pick the person (for a parent, enter the **Parent/guardian name** and optionally the **Child**).
3. Answer the questions and select **Submit response** ("Response recorded").

Reports

The **Reports** tab shows **Responses by audience**, which groups are engaging most with surveys.

Open Surveys & Feedback (/surveys)

Insights

Reports & Analytics

Reports on student performance, attendance, fees, teachers, admissions, dropouts, library, transport and hostel.

Available by default to: School administrator, Principal, Accountant. Schools can change this under Roles & Permissions.

All articles online

Find the report you need

What each tab of Reports & analytics shows.

Menu: Insights → Reports & Analytics | Address: /reports | Checked against the application

Online version

Reports & analytics shows live charts and figures pulled from the other modules. Open **Reports & Analytics** from the menu; the page is headed **Reports & analytics**. Choose a tab:

Tab	Figures at the top	Charts
Student Performance	**Overall average**, **Exams tracked**, **Latest exam**	**Average score by exam** (school-wide, in date order) and **Average by class** for the latest exam
Attendance	**Student attendance (avg.)**, **Staff attendance (avg.)**	**Attendance trend**: student against staff percentage over the last 6 months
Fee Collection	**Collected**, **Pending**, **Overdue**, **Collection rate**	**Fee collection**: collected (by payment date) against pending (by due date) over the last 6 months
Teacher Performance	**Teachers with classes**, **School-wide average**	**Average class performance by teacher** (top 10)
Admissions	**Total applications**, **Enrollment rate**, **Enrolled**	**Applications by status** and **Applications received** over the last 6 months
Dropout Analysis	**Total students**, **Inactive (dropout)**, **Dropout rate**	**Students by status** and **Inactive students by class**
Library Usage	**Total loans**, **Currently issued**, **Overdue**	**Loan volume** per month for 6 months and **Busiest categories**
Transport	**Students assigned**, **Total seating capacity**, **Overall utilization**	**Route utilization**: active assignments as a share of each route's bus capacity
Hostel Occupancy	**Beds occupied**, **Total beds**, **Overall occupancy**	**Occupancy by hostel**: occupied against vacant beds

> **Note:** You see only the reports your role may open. Some figures, such as the fee totals, are sensitive; share them only with people who should see them.

Open Reports (/reports)

Find, filter and export a report from the Report library

Search the report catalogue, set filters, read the results and export or print them.

Online version

Menu: Insights → Reports & Analytics | Address: /reports | Checked against the application

The **Report library** tab of **Reports & analytics** is a searchable catalogue of the reports your role may open, gathered from every part of School Sphere. It sits next to the chart tabs described in Find the report you need.

Find a report

1. Open **Reports & Analytics** and choose the **Report library** tab.
2. Type in **Search reports** (name, category or keyword), or pick a category under **Report categories** (**All categories**). **Frequently used** and **Recently opened** shortcuts appear above the list.
3. Each report shows how many filters and columns it has. A report marked **Restricted** needs a permission you may not have.

If the list is empty you see "No reports are available to you": the school's plan must include Reports & Analytics and your role must be allowed to view them. "No reports match your search" means you should try a different word or another category.

Run it

1. Select a report. Set the filters shown under **Report filters**, for example **Period** (a date range or a **Month**), then select **Apply filters**. **Reset filters** clears them.
2. The results appear as a table with **Rows per page** and page buttons. Select **Refresh** to reload.

Export or print

Select **Export** and choose what to include: **Current page** or **All filtered records**, in **CSV** or **Excel (summary and data sheets)**. "Export downloaded." confirms it. **Print** opens a print preview; choose **Save as PDF** there to keep a copy.

> **Note:** Reports respect the same access rules as the rest of School Sphere. You only see records you are allowed to see, and exports contain only what is on screen for the filters you chose.

Open Reports (/reports)

Revision history

Version	Date	Changes
1.0	2026-10-09	First edition, generated from the Help Center articles.
1.1	2026-11-09	Added notification rules, delivery log and usage, providers and consent, QR and face attendance, corrections and setup, login accounts, sub-menus per role and the announcement banner.

This manual is generated from the same source files as the online Help Center. A screen or step may have changed since the content revision above; the online version is always the latest.
