School Sphere

ADMINISTRATOR GUIDE

Registering new joinees, teachers and students

A step-by-step walk-through of onboarding a new staff member from Human Resources and enrolling a student from Student Management, with the screens exactly as you will see them.

1 · New joinee / teacher
Human Resources › Staff Management › New joining

2 · New student
Academics › Students › Register student

OVERVIEW

What you will do

School Sphere has one place for each kind of person. Staff and teachers are registered in **Human Resources**; students are registered in **Academics › Students**. Both take about two minutes and automatically prepare the sign-in for the person, so no separate "create user" step is needed.

New joinee or teacher

Menu: **Human Resources › Staff Management**
Button: **New joining**
Teachers are staff members whose designation is **Teacher**. They then appear automatically under **Academics › Teachers** for class and subject assignment.

New student

Menu: **Academics › Students**
Button: **Register student**
Enrols the student straight into a class and section and records the guardian. Students who are still applying use the **Admissions** tab instead.

The journey

1. Sign in as administrator › **2. Open the screen** Staff or Students › **3. Fill the form** one side panel › **4. Save** ID is generated › **5. Login ready** invitation sent

Before you start

For a new joinee

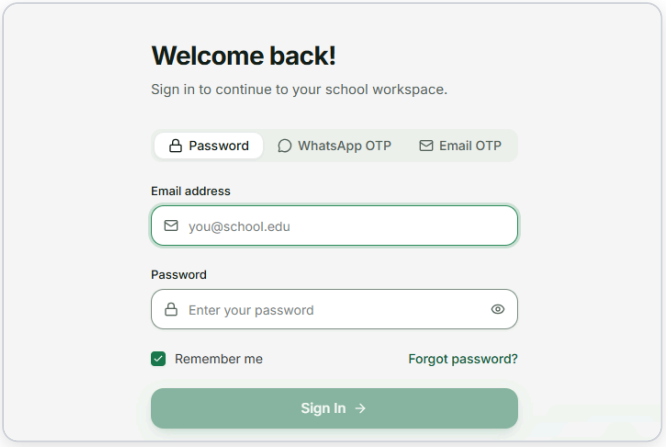

- Full name, date of birth, gender
- Designation (Teacher, Accountant, Librarian, ...)
- Department the person belongs to
- A mobile number and/or email address
- Residential address

For a new student

- Full name, date of birth, gender
- Class and section already created for the branch
- Residential address
- Guardian name, relation and mobile number
- Optional: student email, parent email

Signing in

Open the school's School Sphere address and sign in with your administrator account (email and password, or an OTP if your school has enabled it). Staff and student registration is available to **Administrators** and **Principals**.

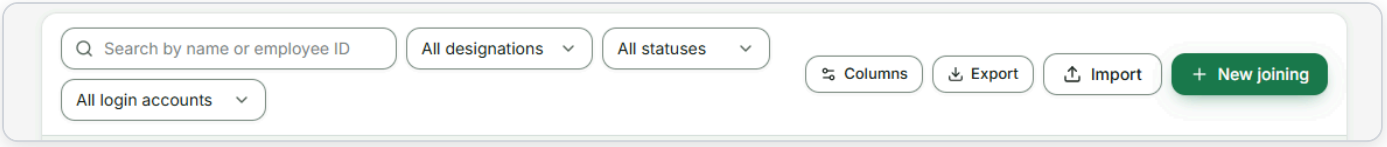

The sign-in page.

PART 1

Register a new joinee or teacher (Human Resources)

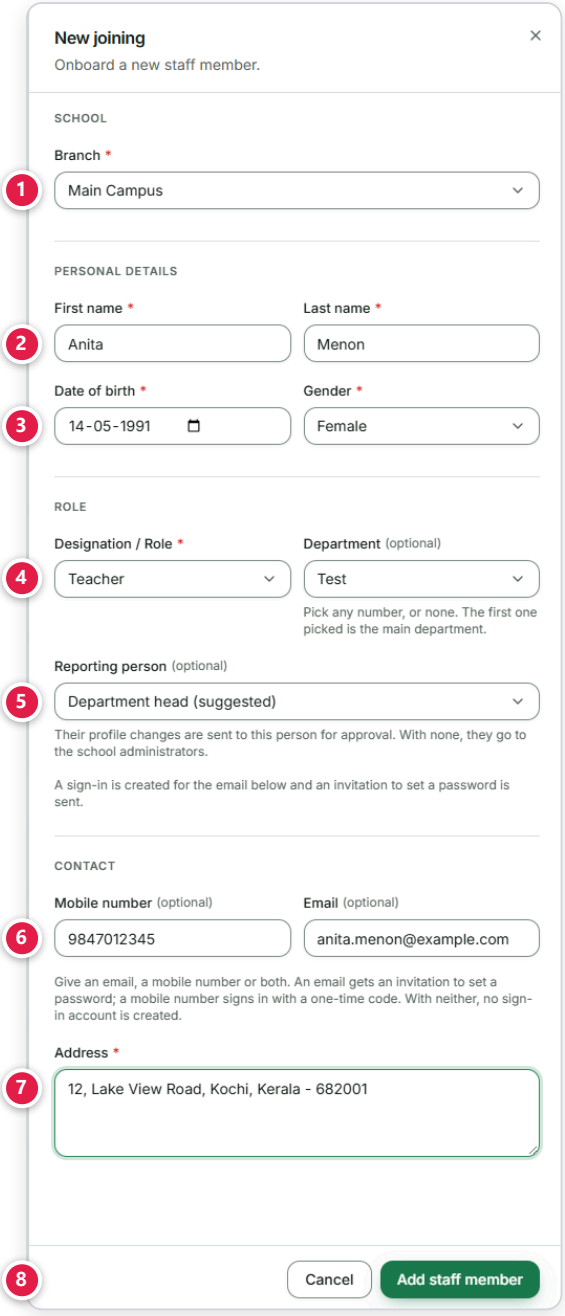

1 · Open Staff Management

In the left menu choose **Human Resources**. The **Staff Management** page lists every staff member with their designation, department, status and **Login account** state. Select the green **New joining** button at the top right.

Human Resources › Staff Management. "New joining" opens the registration panel.

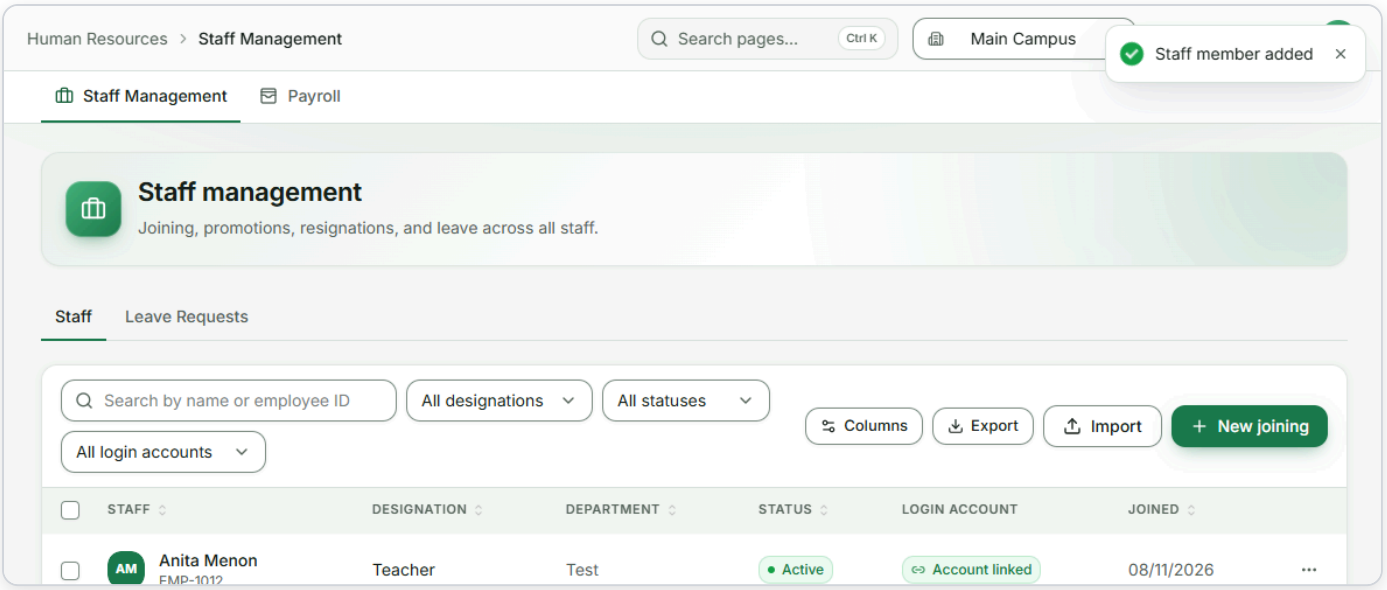

2 · Fill in the New joining panel

1. **Branch**: the campus the person will work at. It is pre-selected for single-campus schools.
2. **First name** and **Last name**.
3. **Date of birth** and **Gender**.
4. **Designation / Role**: choose **Teacher** for a teacher (or Principal, Accountant, Librarian, Receptionist, …). Then pick the **Department**.
5. **Reporting person**: who approves this person's profile changes. The default, *Department head (suggested)*, is right for most joinees.
6. **Mobile number** and **Email**: these create the sign-in (see next page).
7. **Address**: required.
8. Select **Add staff member**. The message *"Staff member added"* confirms it.

PART 1 · CONTINUED

After saving: the new joinee is ready

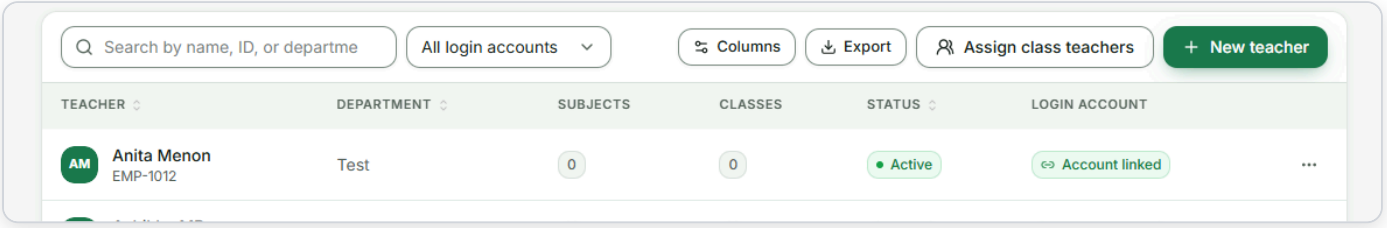

The new staff member appears at the top of the list with an employee ID (here EMP-1012) and "Account linked".

What happens automatically

- An **employee ID** is generated (EMP-xxxx).
- The status is set to **Active** with today as the joining date.
- A **staff login** is created and linked, so the column shows **Account linked**.
- With an **email**: an invitation is sent to set a password. With a **mobile number**: the person can sign in with a one-time code. With neither: no login is created, and it can be linked later.

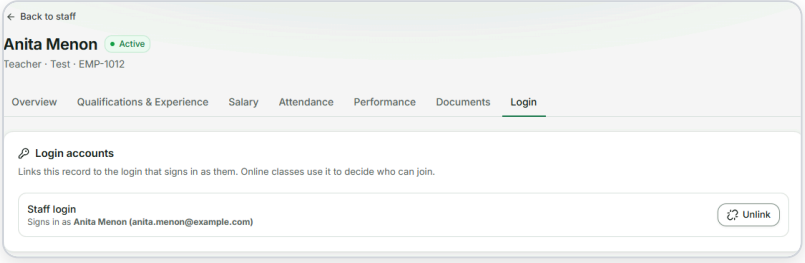

Teachers

A joinee registered with the designation **Teacher** also appears under **Academics › Teachers**, where you assign subjects and classes. Until assigned, Subjects and Classes show 0.

Academics › Teachers lists the new teacher, ready for subject and class assignment.

Check or manage the login

Staff profile › Login tab.

Select the staff member's name to open the profile. The tabs hold **Overview, Qualifications & Experience, Salary, Attendance, Performance and Documents**.

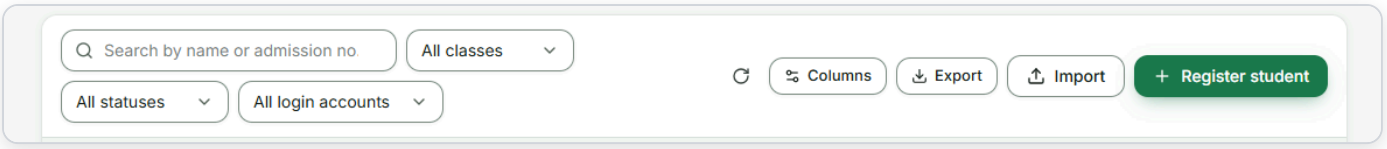

The **Login** tab (administrators) shows the linked sign-in. **Unlink** separates it if the wrong account was linked. Records created without an email or mobile number can be linked here later.

PART 2

Register a new student (Student Management)

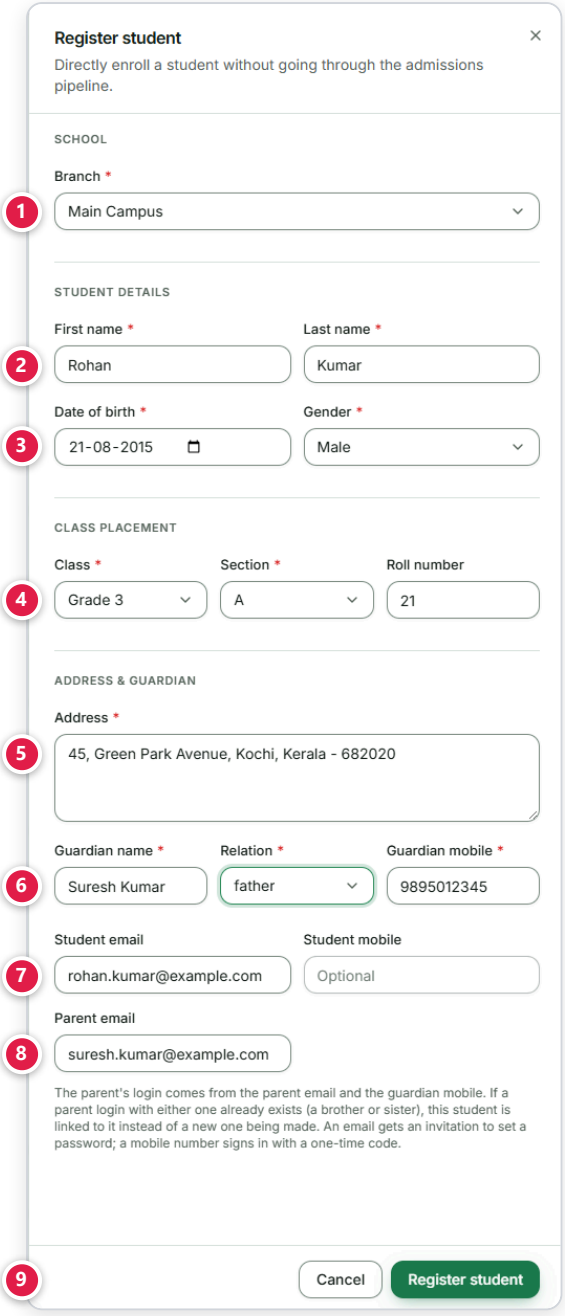

1 · Open Students

From the left menu choose **Academics**; the **Students** tab opens first. The page lists each student with class, roll number, status, guardian and **Login account** state. Select **Register student** at the top right.

Academics › Students. “Register student” opens the form; “Import” is for bulk enrolment from a file.

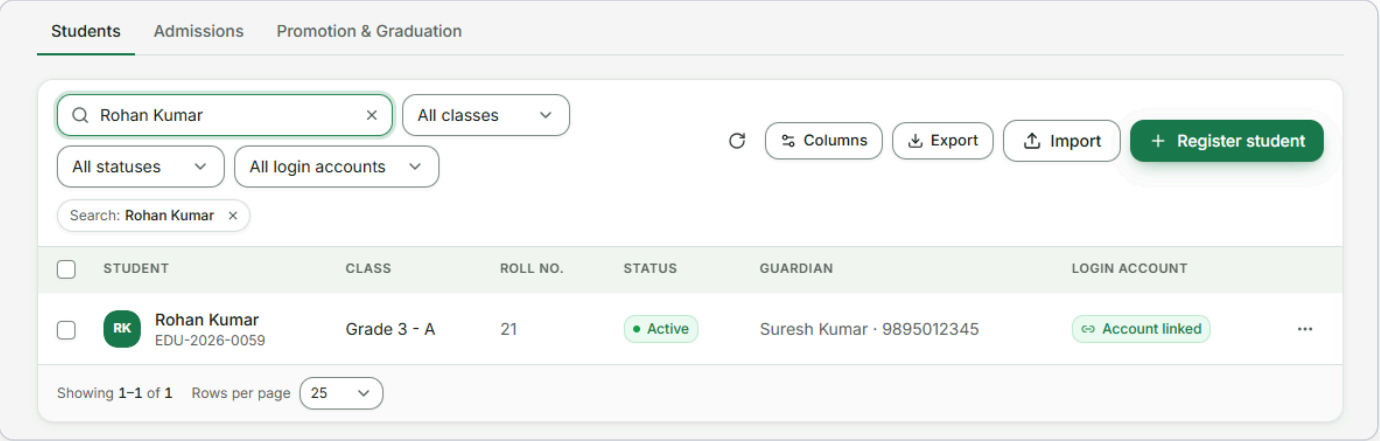

2 · Fill in the Register student panel

1. **Branch**: the campus where the student is enrolled.
2. **First name** and **Last name**.
3. **Date of birth** and **Gender**.
4. **Class**, then **Section**, and an optional **Roll number**. Classes and sections come from Academic Setup.
5. **Address**: required.
6. **Guardian name**, **Relation** (father, mother or guardian) and **Guardian mobile**.
7. **Student email** / **Student mobile** (optional): creates the student's own sign-in.
8. **Parent email** (optional): creates the parent sign-in for the Parent Portal and app.
9. Select **Register student**. The message *“Student registered”* confirms it.

PART 2 · CONTINUED

After saving: the student is on the roll

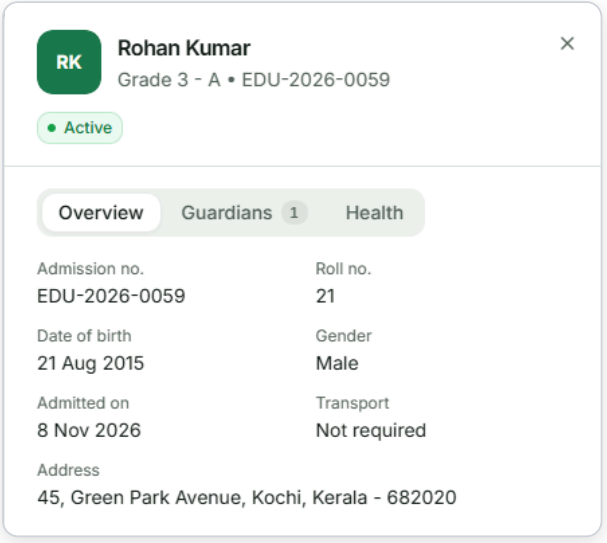

Searching for the new student: admission number EDU-2026-0059, Grade 3 - A, roll 21, “Account linked”.

What happens automatically

- An **admission number** is generated (EDU-year-number).
- The student is placed in the chosen **class and section** with status **Active**.
- The **guardian** is saved against the student.
- Each email gives a login: **student email** → student login, **parent email** → parent login, both linked, with an invitation to set a password. A mobile number signs in with a one-time code.
- If the parent already has a login (a brother or sister is enrolled), the new student is **linked to it** instead of creating a second one.

Open the student record

Select the student's name for a quick view: admission number, roll number, date of birth, admission date and address, plus **Guardians** and **Health** tabs. **Open full profile** shows everything, and **Edit** changes details later.

Student quick view.

Other ways to add students

Method	When to use it
Admissions tab	The child is applying. Track enquiry → exam → interview → fee → decision, then register.
Import button	Enrolling many students at once from a prepared file.

QUICK REFERENCE

Field checklist and tips

New joining (staff / teacher)

Field	Required	Notes
Branch	**Yes**	Pre-selected when the school has one campus.
First name, Last name	**Yes**	
Date of birth, Gender	**Yes**	Male, Female or Other.
Designation / Role	**Yes**	Teacher, Principal, Accountant, Librarian, Receptionist and other roles your school defines.
Department	Select one	Choose the person's department. Departments are maintained by your administrator.
Reporting person	Optional	Receives the joinee's profile-change requests for approval. With none, they go to the school administrators.
Mobile number, Email	Optional	At least one is needed to create a sign-in.
Address	**Yes**	

Register student

Field	Required	Notes
Branch	**Yes**	
First name, Last name	**Yes**	
Date of birth, Gender	**Yes**	
Class, Section	**Yes**	The class and section must already exist for the branch.
Roll number	Optional	Leave blank if you do not use roll numbers.
Address	**Yes**	
Guardian name, Relation, Guardian mobile	**Yes**	Relation: father, mother or guardian.
Student email / mobile, Parent email	Optional	Each one creates a sign-in. Leave blank to create logins later.

Good to know

- Leave email and mobile blank when you do not want a login yet. You can link one later from the profile's **Login** tab.
- Red messages under a field tell you what is missing; the panel will not save until they clear.
- If a name, email or mobile already has a login, the screen tells you rather than creating a duplicate.

Also from the Staff screen

- **Promote**: change designation with an effective date
- **Record resignation** / **Reactivate**
- **Import**: bulk onboarding from a file
- **Leave Requests** tab: staff leave approvals
