SCHOOL SPHERE

Administrator User Guide

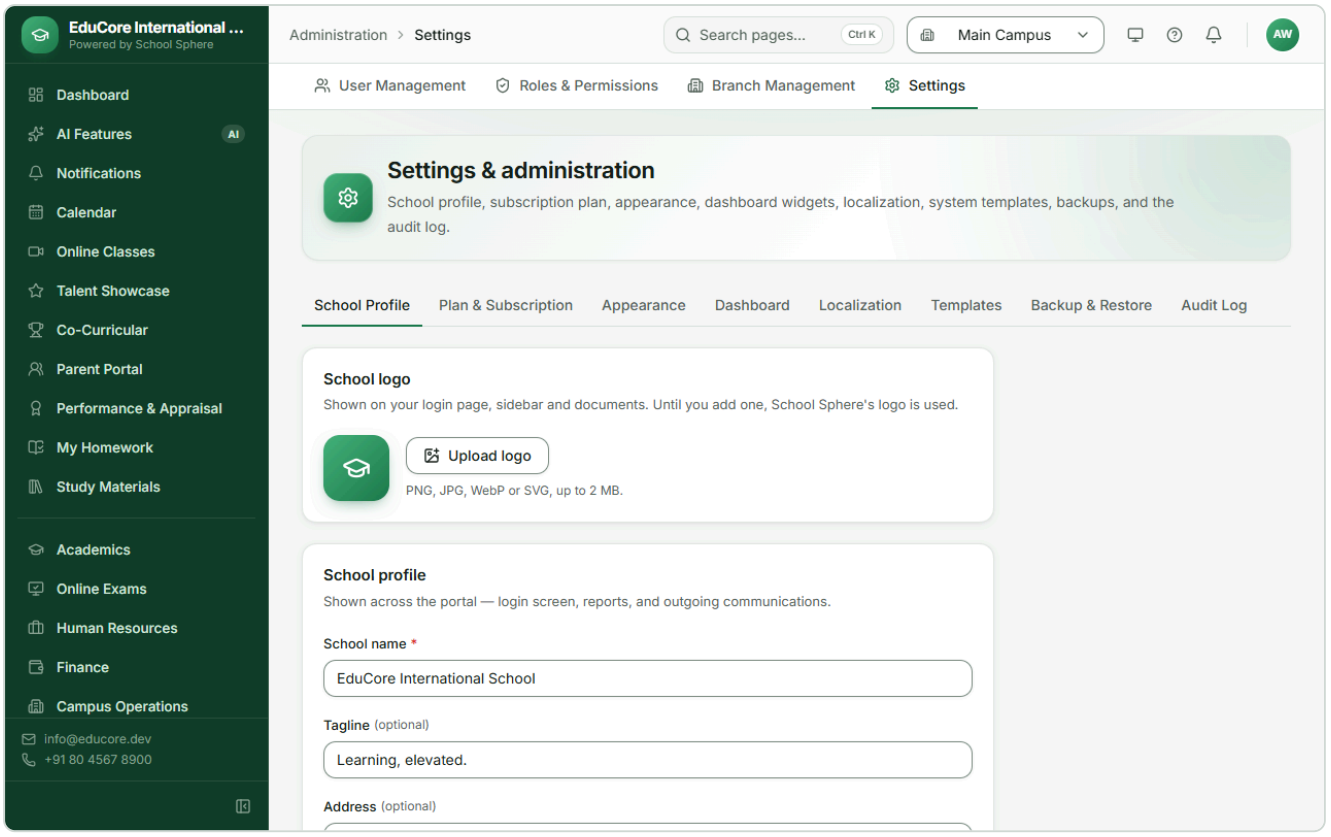

1. Settings › School Profile
2. Academics › Academic Setup
3. Academics › Students

November 2026 · Screens captured from the demo school

1. Settings › School Profile

The School Profile tab holds your school's identity: logo, name, contact details and the current academic year. These appear on the login page, the sidebar, reports and messages sent to parents.

Open it: sidebar **Administration** › **Settings**. The page is headed **Settings & administration**; stay on the **School Profile** tab.

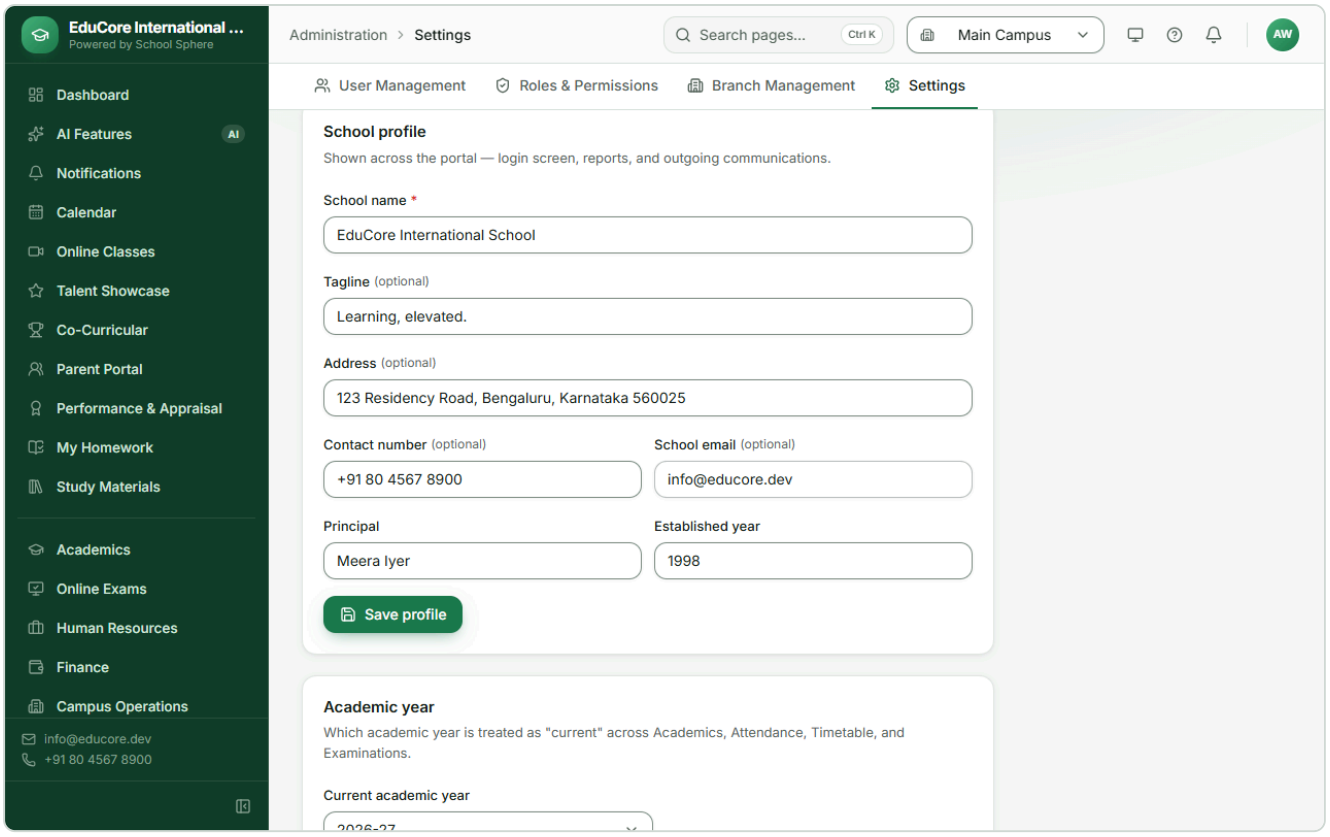

Settings › School Profile: the School logo card and the start of the School profile form.

Change the logo

1. Under **School logo**, select **Upload logo** (or **Replace logo**).
2. Choose a PNG, JPG, WebP or SVG image of 2 MB or smaller.
3. A message confirms the update. **Remove** goes back to School Sphere's own logo.

Update the school profile

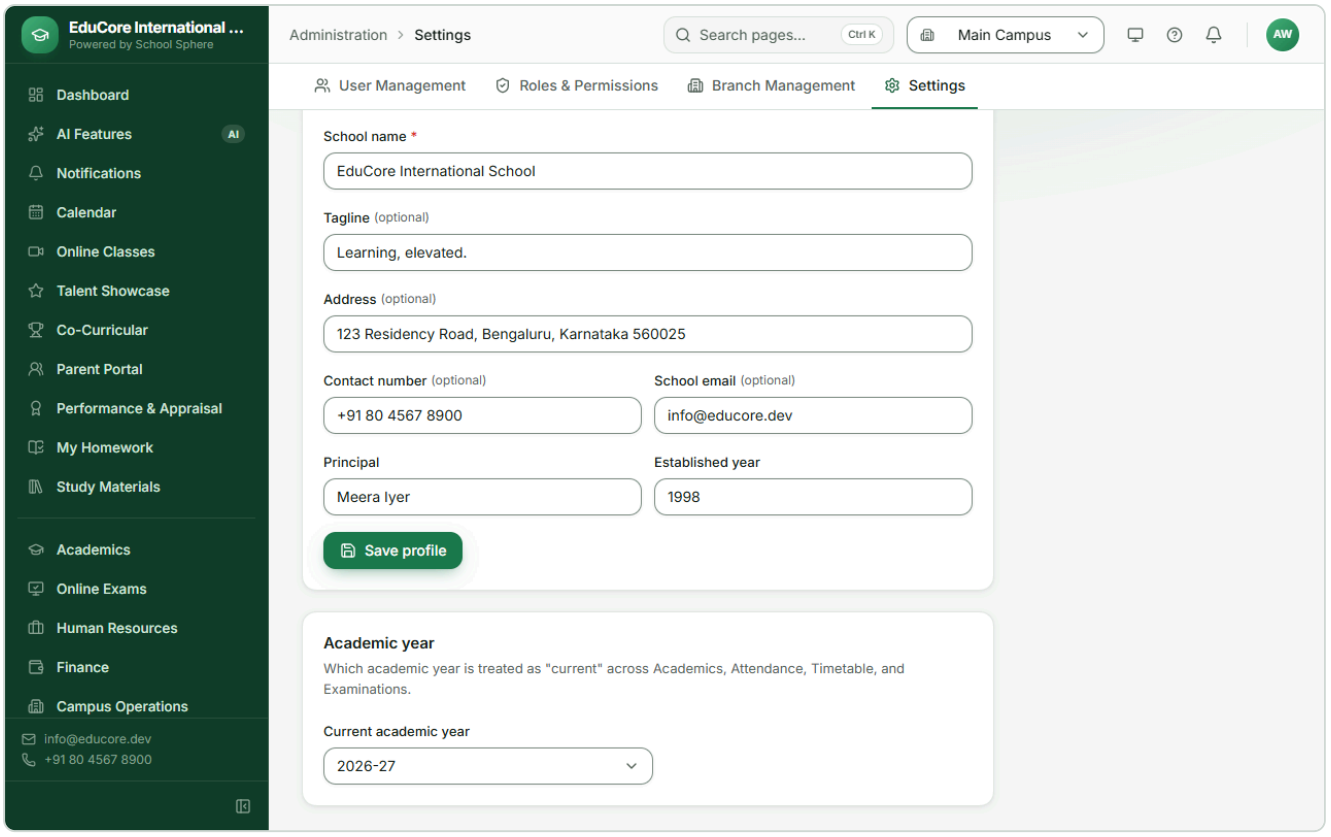

The School profile form: name, tagline, address, contact number, email, principal and established year.

1. Change **School name** (required), **Tagline**, **Address**, **Contact number**, **School email**, **Principal** and **Established year**.
2. Select **Save profile**. A message says "School profile saved".

> **Checks:** School name is required; the contact number needs at least 6 characters; the email must be valid.

Set the current academic year

Save profile, and the Academic year card below it.

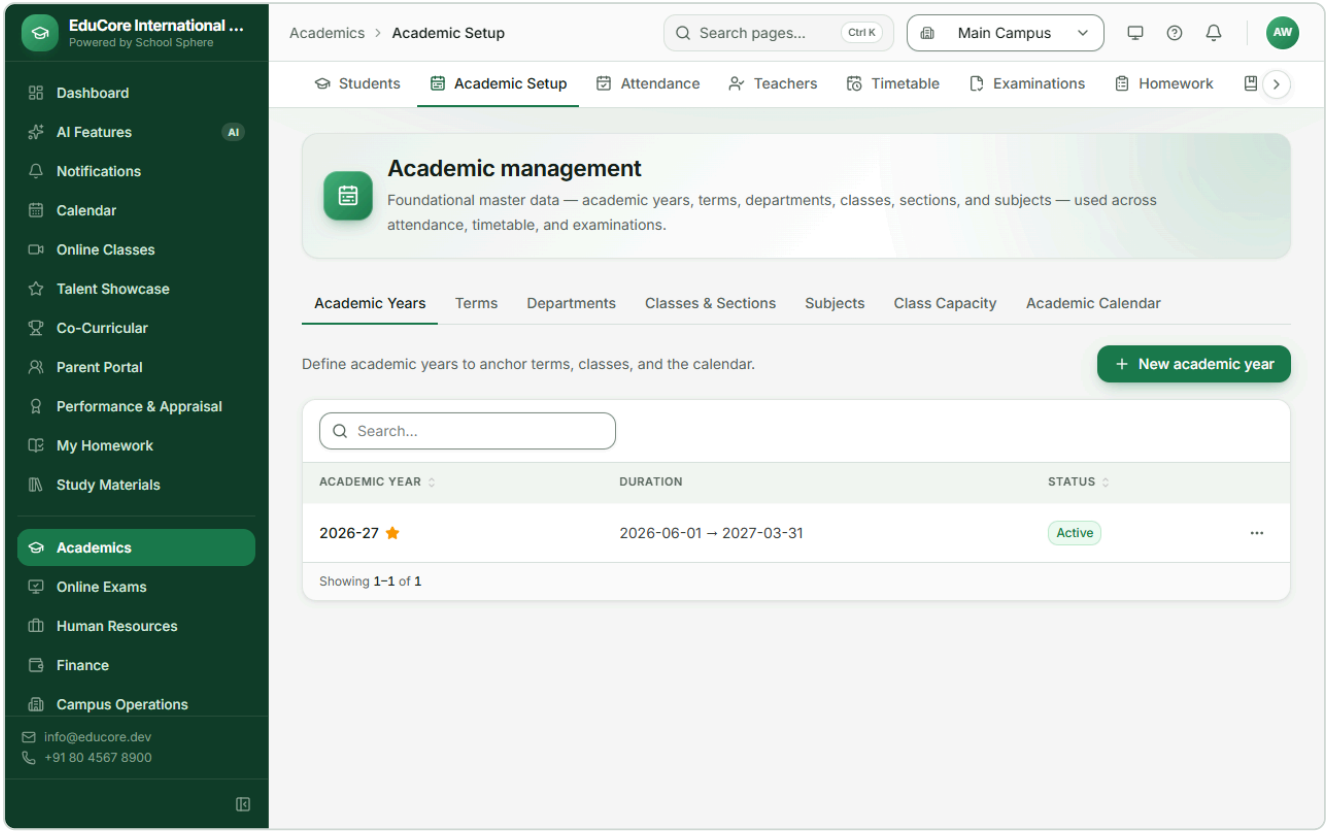

Under **Academic year**, choose the **Current academic year**. It is treated as current across Academics, Attendance, Timetable and Examinations. A message says "Current academic year updated".

2. Academics › Academic Setup

Academic Setup is the foundation for attendance, timetable and examinations: academic years, terms, departments, classes and sections, subjects, capacity and the academic calendar. Set it up before registering students.

Open it: sidebar **Academics** › **Academic Setup**. The page is headed **Academic management** and has seven tabs.

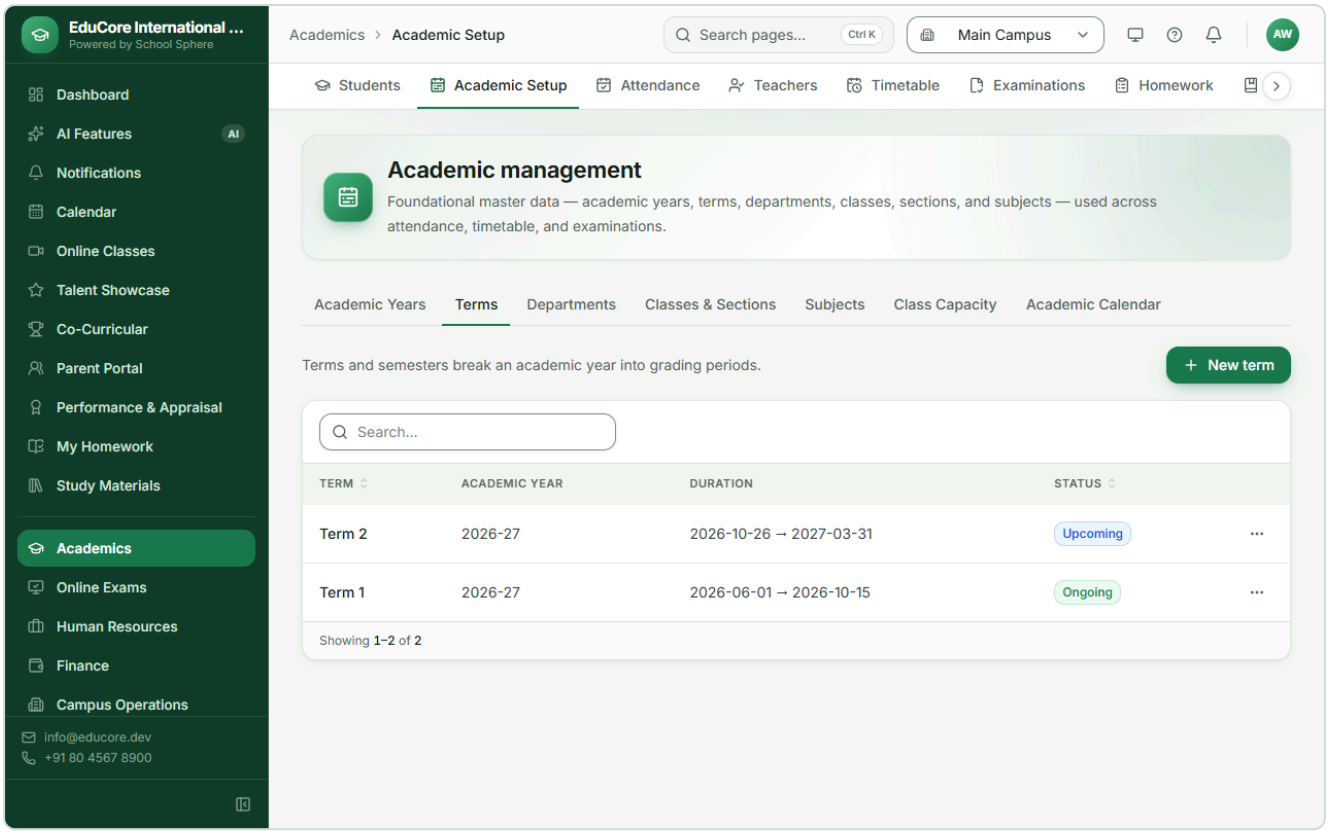

Tab	Use it to
Academic Years	Create years and mark the current one
Terms	Split a year into terms
Departments	Group classes (Primary, Science…), set heads and employees
Classes & Sections	Create classes, sections and capacity; merge sections
Subjects	Create subjects and link them to classes
Class Capacity	See seats, enrolment and utilisation
Academic Calendar	Add term dates, exam windows and holidays

Academic Years tab.

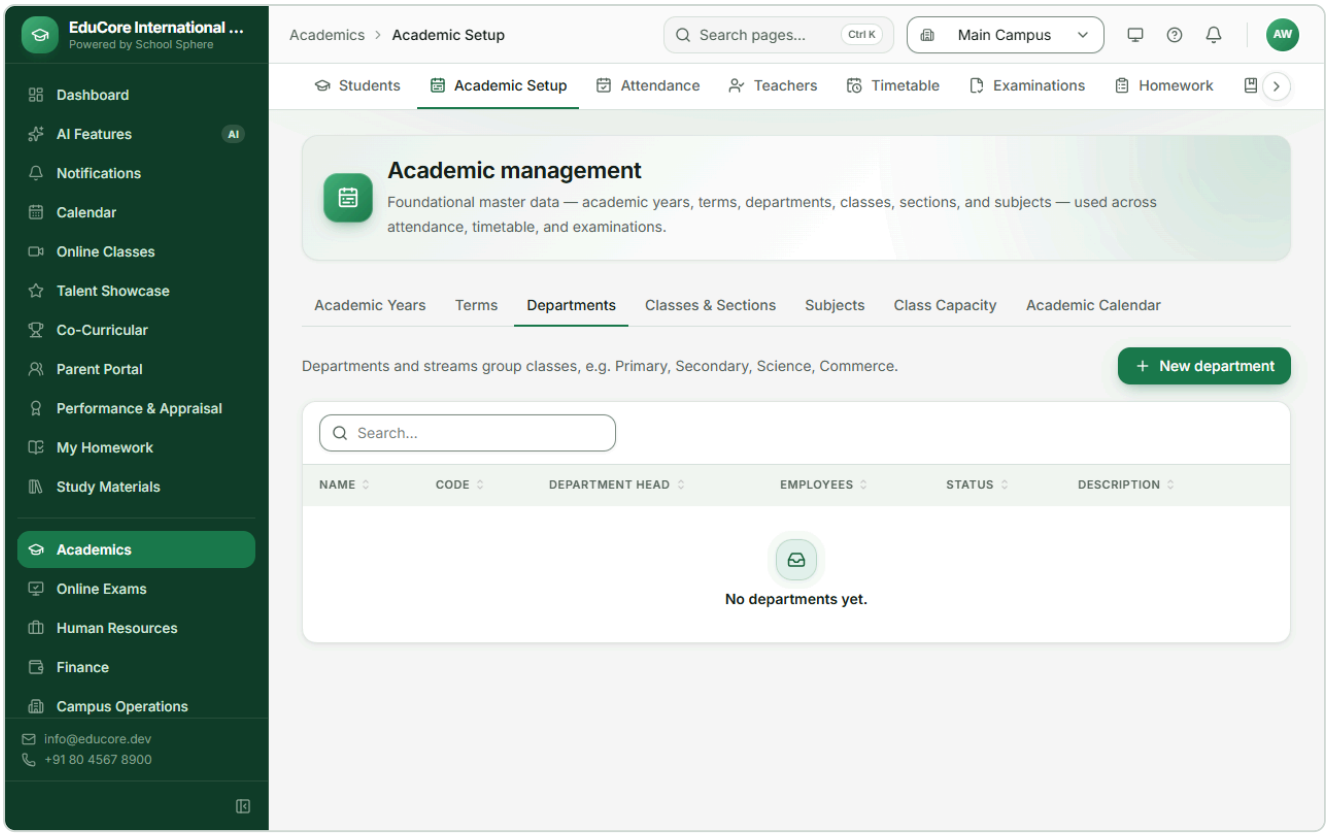

Create an academic year and terms

1. On **Academic Years**, enter the **Name**, **Start date**, **End date** and **Status**. Tick **Set as current year** if it is in use. Select **Create academic year**.
2. Open **Terms** and enter **Name**, **Academic year**, **Start date**, **End date** and **Status**, then **Create term**.

Terms tab.

Create a department

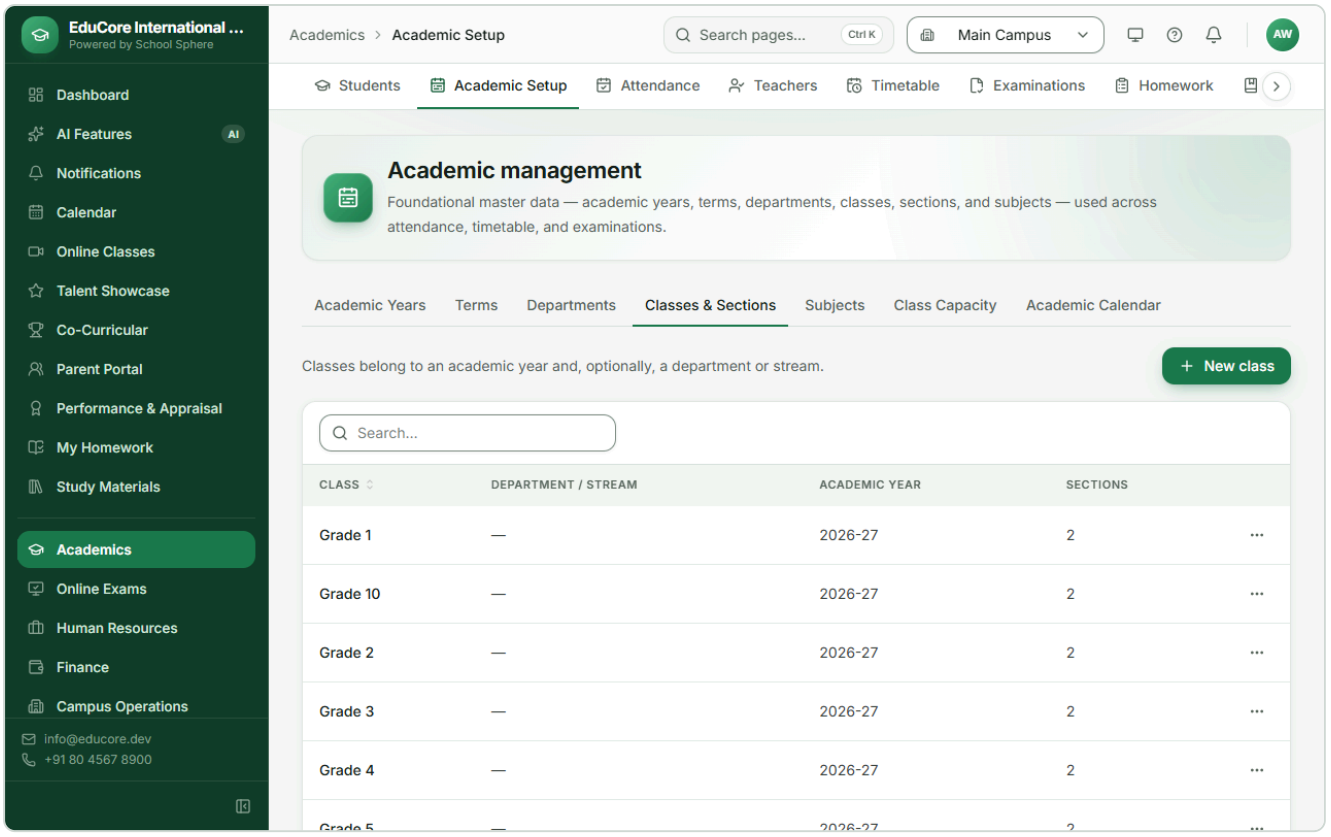

Departments tab.

1. Select the **Departments** tab, then **New department**.
2. Enter **Name** (e.g. Science) and **Code** (e.g. SCI); add a **Description** if you like.
3. Leave **Active** ticked and select **Create department**.
4. Use **Head and employees** on the row to choose the **Department head** and add employees with their **Reporting person**.

> Profile changes go for approval to a person's reporting person, or to the department head.

Create a class and its sections

Classes & Sections tab, listing each class with its academic year and section count.

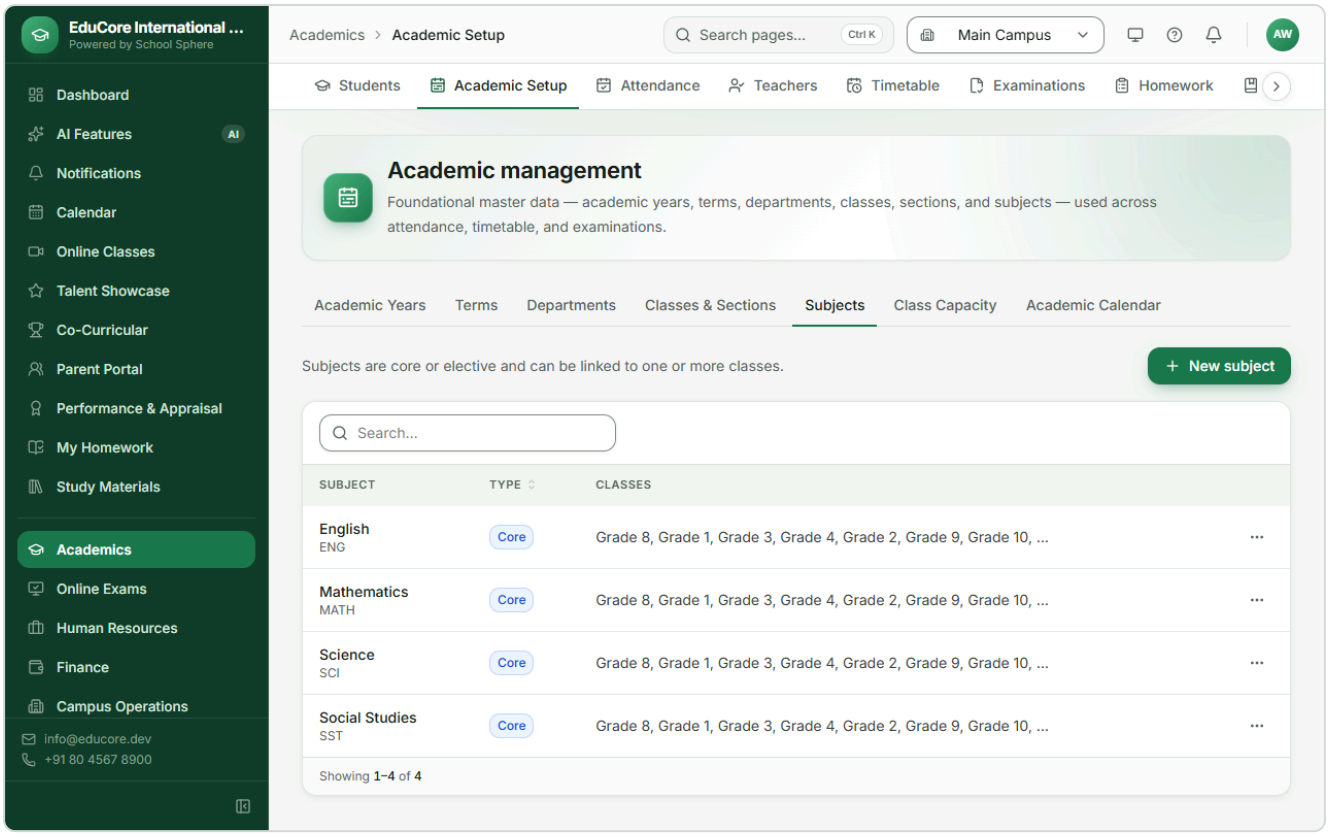

1. Open **Classes & Sections** and select **New class**. Enter the **Name**, choose the **Academic year** (department is optional) and select **Create class**.
2. Select **New section** (or **Add section** on a class). Enter **Name**, choose the **Class**, set **Capacity** (at least 1) and **Current strength**, optionally a **Class teacher**, then **Create section**.

Merge two sections

Select **Merge sections**, choose the **Class**, the section to **Keep** and the one to **Merge into it**, then **Merge** and **Confirm section merge**.

> **Warning:** A merge cannot be undone and student records are not moved automatically. Check both sections' students afterwards.

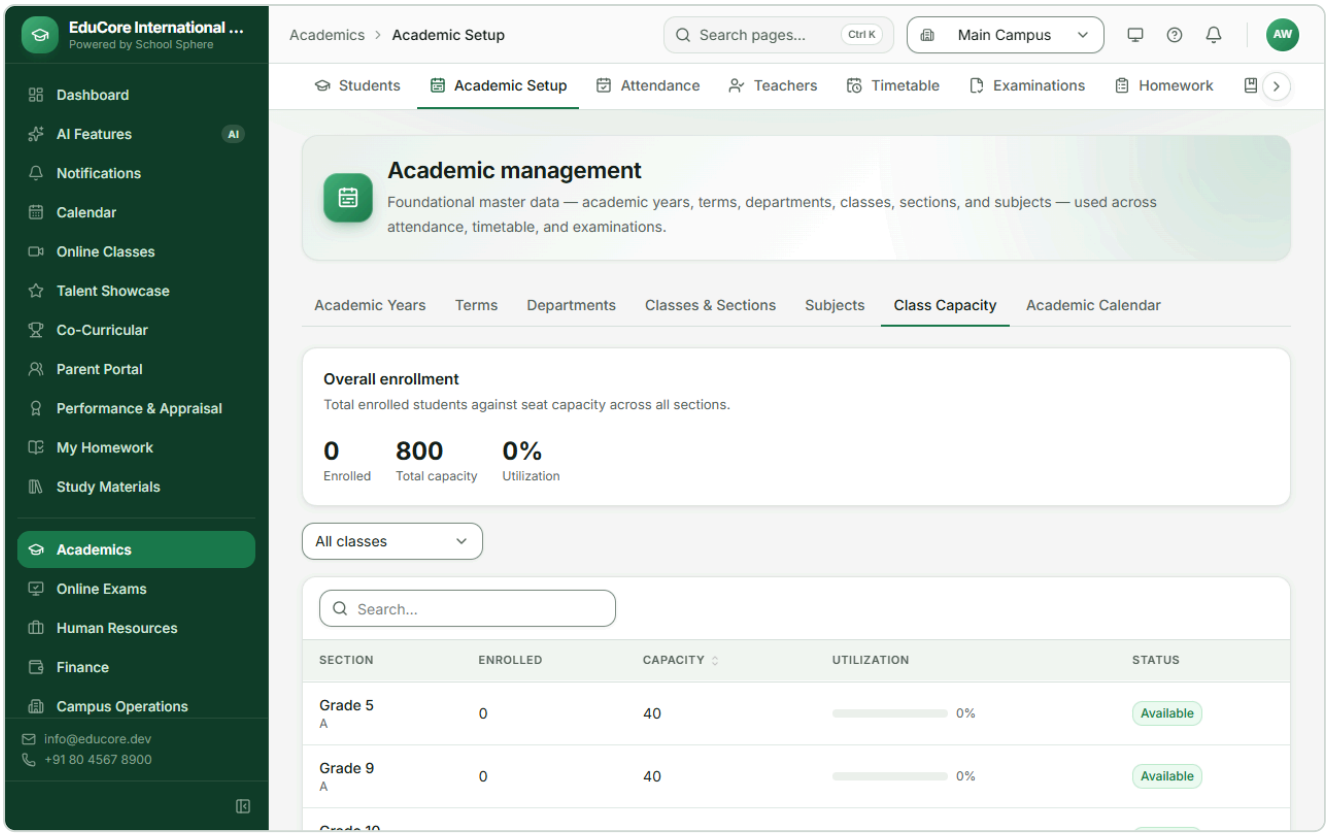

Add a subject

Subjects tab.

1. Open **Subjects** and select **New subject**.
2. Enter **Name** and **Code**, choose the **Type** (core or elective), and tick every class that studies it.
3. Save. A message says "Subject created".

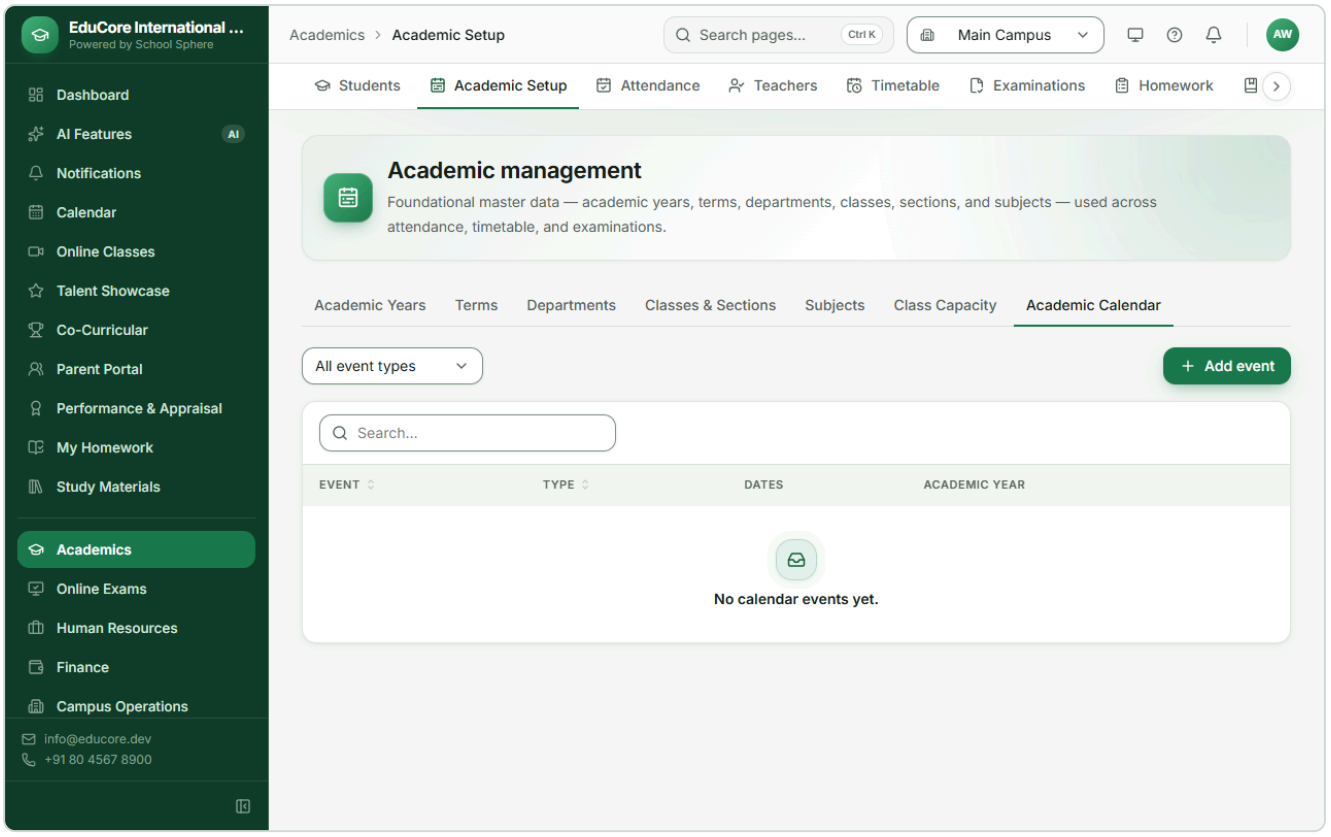

Check class capacity

Class Capacity tab.

Overall enrollment shows total students against seats. Use **Filter by class** to see each section's **Capacity**, **Enrolled** and **Utilization**. The status reads **Available**, **Near capacity** (75% or more) or **Full** (100%).

Add a calendar event

Academic Calendar tab.

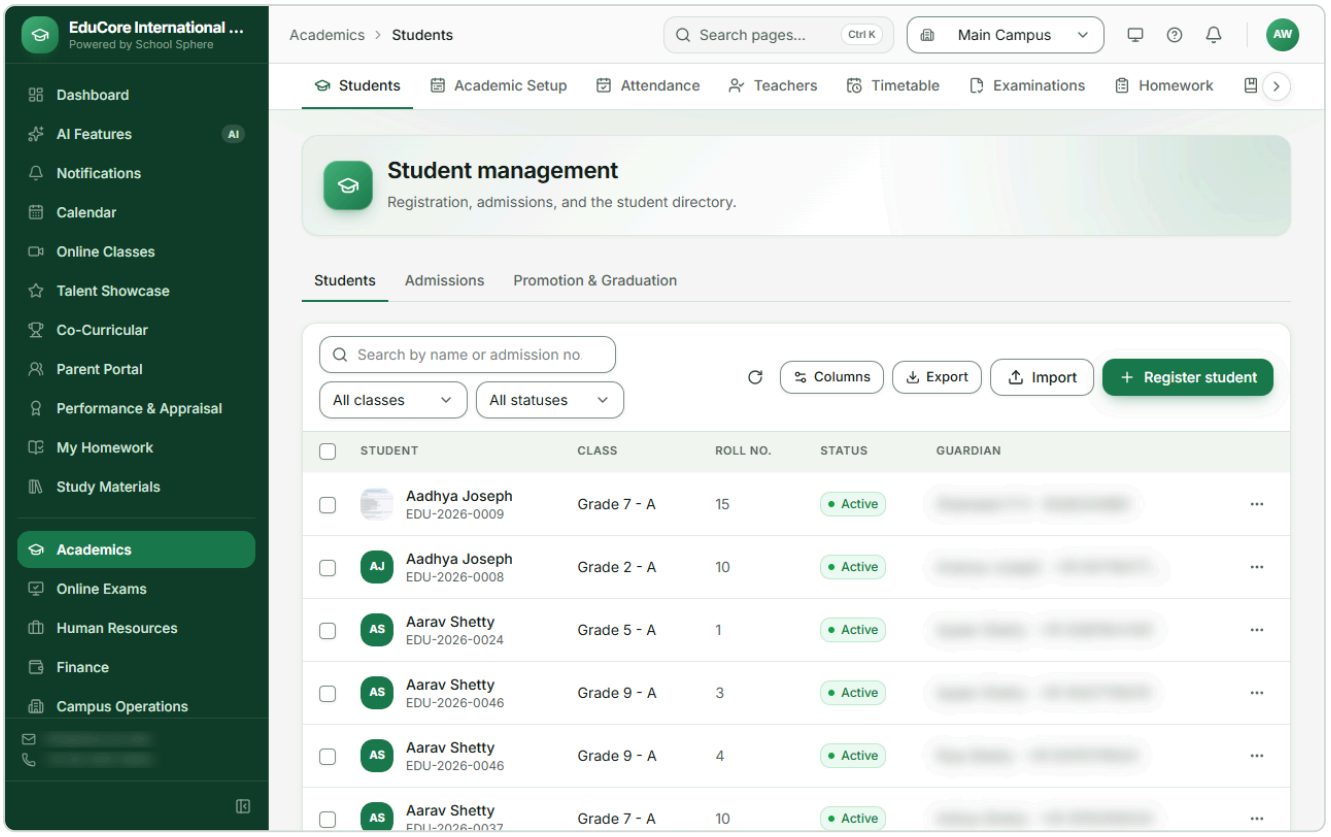

1. Open **Academic Calendar** and select **Add event**.
2. Enter the **Title** and choose the **Type** (Term start, Term end, Exam window, Holiday or Other).
3. Set the **Start date** (required), optional **End date** and the **Academic year**, then **Add event**.

Holidays and other dates added here appear on the school Calendar.

3. Academics › Students

Student management covers registration, admissions and the student directory. Class and section must exist first (see section 2).

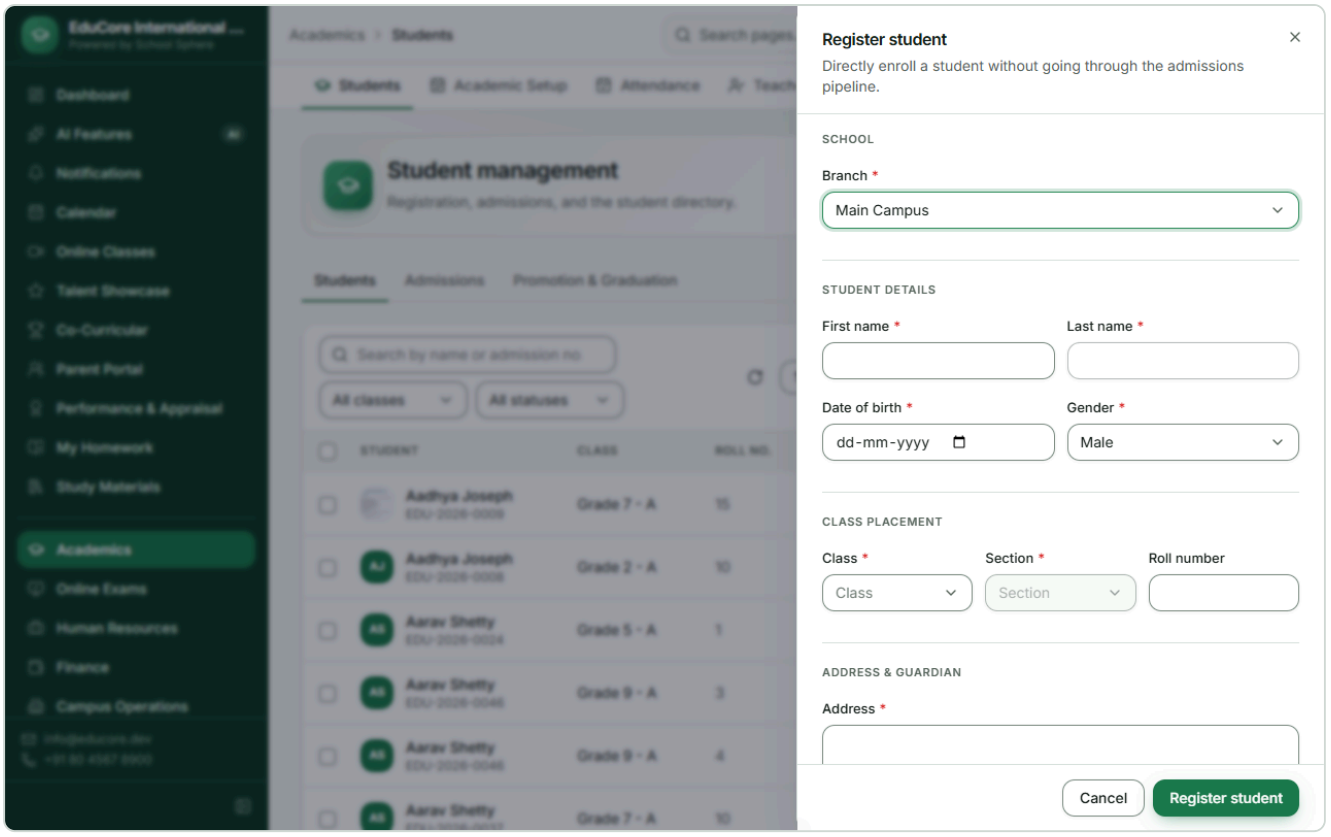

Open it: sidebar **Academics** › **Students**. The page is headed **Student management** with tabs **Students**, **Admissions** and **Promotion & Graduation**.

Students tab: search, class and status filters, Columns, Export, Import and Register student. Guardian details are blurred in this guide.

Register a student

Use this to put a student on the roll immediately. If the student is still applying, use the **Admissions** tab instead.

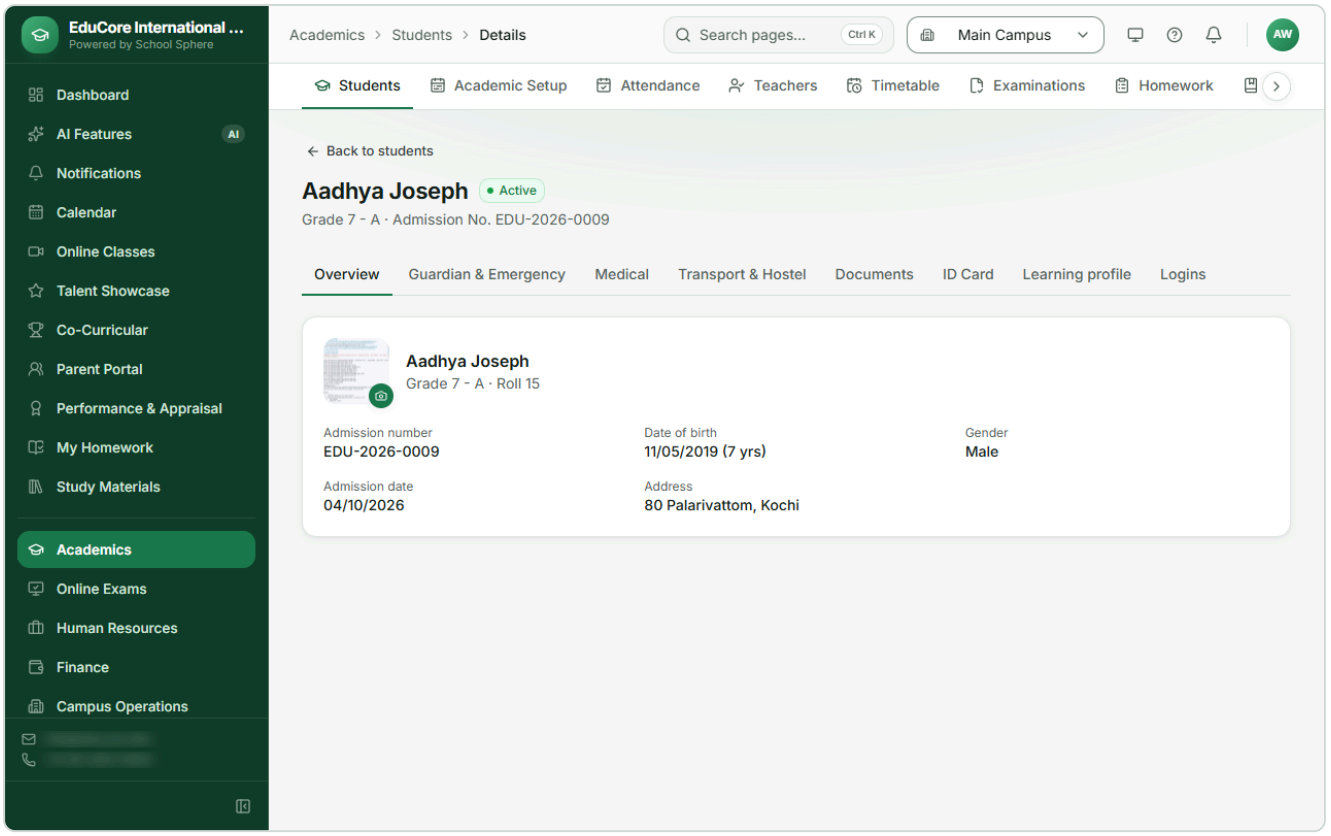

The Register student form.

1. On the **Students** tab select **Register student**.
2. **School:** check the **Branch**.
3. **Student details: First name**, **Last name**, **Date of birth**, **Gender**.
4. **Class placement:** choose **Class**, then **Section**; add a **Roll number** if used.
5. **Address & guardian: Address**, **Guardian name**, **Relation**, **Guardian phone**.
6. Optionally enter **Student email** and **Parent email**.
7. Select **Register student**. A message says "Student registered".

Field	Required	Message if wrong
Branch	Yes	Select a branch
First / Last name	Yes	First name is required / Last name is required
Date of birth	Yes	Date of birth is required
Class / Section	Yes	Select a class / Select a section
Address	Yes	Address is required
Guardian name / phone	Yes	Guardian name is required / Guardian phone is required
Student / Parent email	No	Enter a valid email address

Important: Each email you enter creates a login automatically (student or parent) and a temporary password is emailed to it. Leave the emails empty if you do not want logins created yet.

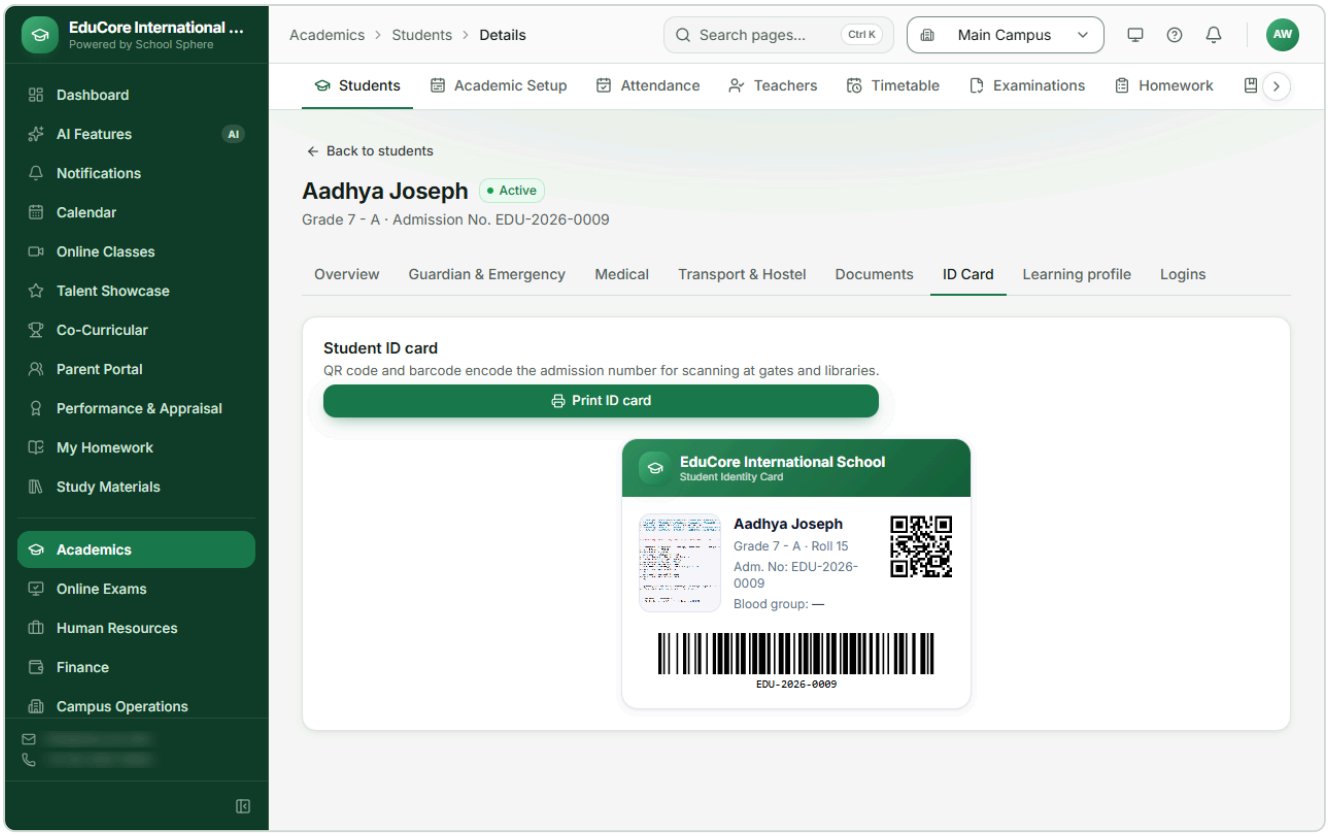

Open and use a student profile

A student profile: Overview tab with admission number, date of birth and address.

On the Students list open the ⋯ menu on a row and choose **View profile**. Use **Back to students** to return. Tabs: **Overview**, **Guardian & Emergency**, **Medical**, **Transport & Hostel**, **Documents**, **ID Card**, **Learning profile** (when AI features include it) and **Logins** (administrators).

Tab	What to do
Guardian & Emergency	**Add guardian** (Name, Relation, Phone required); fill the emergency contact, then **Save emergency contact**.
Medical	Blood group, allergies, conditions, medications, doctor; **Save medical information**.
Transport & Hostel	Tick **Requires school transport**, pick Route then Pickup point; for hostel pick Hostel then Room number; save each.
Documents	**Upload document**; the remove button deletes one.
ID Card	Card with QR code and barcode of the admission number; **Print ID card**.
Logins	Link or unlink the login that signs in as the student.

ID Card tab.

Other student tasks

Bulk import (the **Import** button), editing and transferring a student, admissions, and promotion and graduation are covered in the Help Center articles under Students.
