# School Sphere Mobile Apps

Three apps for Android and iOS, connected to the same School Sphere platform as the web app

**School Sphere Student**
For students and parents. One parent login covers all their children.

**School Sphere Teacher**
For teachers: attendance, homework, marks, lessons and parent messages.

**School Sphere Staff**
For office and support staff, administrators and principals. Screens adapt to each user's permissions.

## Student & Parent App

### Home
- Dashboard with attendance, homework due, average score and notices
- Child switcher for parents with several children
- Today's classes and latest notices

### Attendance
- Attendance percentage with present, late and absent counts
- Colour-coded recent days
- Warning when attendance falls below 75%

### Homework & study
- To do, submitted and graded homework, with teacher feedback
- Students submit answers in the app
- Study materials from teachers, with "Ask AI about this material"

### Timetable, exams & results
- Weekly timetable and school calendar
- Online exams with a server-timed countdown, autosave, auto-submit and resume
- Published results by exam and subject, with grades
- Syllabus progress: taught, in progress, next, and upcoming exam portions

### Fees & payments
- Invoices per child, overdue first, with full breakdown
- Parents pay by UPI, card or netbanking through Razorpay
- Payment verified by the server before a receipt is issued
- Shareable receipts

### School bus & online classes
- Route, the child's stop, stop timeline and live bus location
- Open the bus location in Google Maps
- Join live video classes in the app, with screen share and camera controls

### Communication
- Message the class teacher, one conversation per child
- Parents submit leave requests
- Notification inbox that opens the related screen

### Activities & AI
- Clubs, sports and houses, with enrolment requests and parental consent
- Ask School AI chat with sources, voice input and read-aloud
- AI prepares leave requests or teacher messages; nothing happens until you confirm
- Learning profile with AI study suggestions

## Teacher App

### Today
- Periods today, including substitution cover
- Registers to take, work to grade and homework due
- New items from parents at a glance

### Attendance (works offline)
- One-tap register: everyone starts present, tap to mark absent or late
- Take attendance with no signal; it syncs automatically later
- Rosters and registers available offline

### Classes & students

- My classes and other classes, with roster search
- Student profile with attendance, guardians (tap to call) and medical notes

### Homework & marks

- Create homework with quick class, subject and due-date picks
- Grade inline or ask a student to redo
- Exam marks entry with absent toggle and validation
- Mark written answers in online exams and publish results

### Lessons & activities

- Today's lessons and syllabus status (on track, at risk, behind)
- Record what was taught for each topic
- Activity session attendance

### Communication & classes

- Parent messages inbox with "Needs reply"
- Approve or decline leave requests
- Start and host live video classes
- School calendar and study materials

### AI for teachers

- Ask School AI with voice; AI drafts notices and homework that the teacher confirms
- Draft notices with AI in the chosen tone, rewrite and translate them, then send for approval
- Review and publish queue, AI-explained insights, and at-risk students with suggested next steps (for permitted users)

## Staff App — screens adapt to each user's permissions

### Library

- Book catalogue with availability
- Issue and return books, with fines
- Overdue list and members

### Visitors

- Who is on campus now
- Check-in with badge number and watchlist warning
- Check-out and expected visits

### Fees counter

- Pending, overdue and part-paid invoices
- Record payments at the counter
- Receipts

### School buses

- Live map of the whole fleet
- Driver mode: the driver's phone shares the bus location during a trip, no GPS device needed

### Inventory & help desk

- Stock by urgency, low-stock list, issues and deliveries
- Help desk tickets with comments, resolve and reopen

### For every staff member

- Home built from the user's permissions, with quick actions
- Searchable menu, alerts and school calendar
- Branch switcher for administrators and principals
- Custom roles created on the web appear in the app automatically

## Built into all apps

### Notifications

- Push notifications for messages, leave, announcements, class reminders and exams
- Tapping a notification opens the right screen

### Security & privacy

- Login tokens stored in the phone's secure keychain
- Safe on shared phones: all data cleared on sign-out
- No advertising or tracking analytics
- Each app accepts only its own user roles

### Experience

- Automatic dark mode, contrast checked to accessibility (WCAG AA) standards
- Screen reader labels and Reduce Motion support
- Share receipts and notices through the phone's share sheet

### Reliability

- Sessions renew silently in the background
- Crash reporting with personal data removed
- Exam timers run on the server clock, so changing the phone time doesn't help

### What makes the School Sphere apps different

1. AI assistant in the app, with voice, sources and confirm-before-action
2. Live video classes inside the app, with no Zoom or Meet needed
3. Teacher attendance that works without internet
4. Bus tracking from the driver's phone, with no GPS hardware
5. One staff app that adapts to any role the school creates
6. Fee payment by UPI and cards, verified on the server
